

TABLE OF CONTENTS

Foreword	VIII
Introduction	1
Chapter 1. Verse and Syllable	17
1. The method "from verse to language"	17
2. The syllable and syllabication	18
3. The problem of "verse and syllable"	20
4. The syllabic structure of words of the type <i>Cardinal, murderer,</i> <i>insolent</i>	21
5. The syllabic function of sonorants	30
6. The syllabic function of triphthongs	34
Chapter 2. Verse and Word Stress	40
1. The problem of Middle English word stress	40
2. The method of investigation	45
3. The total number of "noncorrespondences" between word stress and ictus in the verse	46
4. The distribution of native-English and French loan words within the line	50
5. The morphological and sound features of native-English "noncorrespondences"	53
6. Conclusions	56
Chapter 3. Verse and Phrasal Stress	60
1. The rhythmical variation of phrasal stress	60
2. The problem of the accentual interpretation of monosyllables in verse	63
3. The general accentual differentiation of monosyllables in verse: the method of metrical indices	66
4. The metrical features of adjectives and adverbs and their phrasal stress in verse	71
5. The accentual categories of monosyllables	76
6. The degree of phrasal stress. A system for the transcription of the verse rhythm	78
Chapter 4. The Formation of English Syllabo-Tonic Poetry	84
1. The Problem	84

2. The reasons for the loss of alliteration and the emergence of rhymed verse	85
3. Identifying the meter of 13th–14th century English rhymed verse	88
4. The rhythmical features of 13th–14th century English rhymed verse	93
5. Conclusions	97
Chapter 5. A Typology of English Four-Ictic Verse	84
1. Introduction	100
2. The iambic tetrameter	101
A. The stress profile of the lines	102
B. “Noniambic” combinations of syllables	103
C. The rhythmical structure of the lines	104
3. The 19th century trochaic tetrameter	105
4. The dol’nik	107
I. The four-ictic dol’nik	108
A. The syllabic structure	108
B. The accentual structure	121
II. The three-ictic dol’nik	123
A. The syllabic structure	123
B. The accentual structure	127
III. Conclusions	128
5. The ternary syllabo-tonic meter	128
A. The types of anacrusis	129
B. The ictic stress	130
C. The structure and stress of the non-ictuses	131
D. Conclusions	135
Chapter 6. The Nondramatic Iambic Pentameter	138
1. Introduction	138
2. The syllabic structure of the lines	139
3. The accentual structure of the lines	143
A. The stress profile	143
B. The distribution of several types of rhythmic inversion within the foot and at foot junctures	147
C. “Noniambic” trisyllabic combinations with the central syllable on an ictus	151
D. The rhythmical structure of the lines	152
4. Conclusions	155
Chapter 7. The Dramatic Iambic Pentameter	159
1. Introduction	159
2. The syllabic structure of the lines	160
3. The accentual structure of the lines	164
A. The stress profile	164

B. The distribution of several types of inversion within the foot . . .	169
C. Inversions at foot junctures	172
D. "Noniambic" trisyllabic combinations with the central syllable on an ictus	173
E. The rhythmical structure of the lines	174
4. The evolution of line endings	177
5. Conclusions	181
Chapter 8. The Transition from Iambics to Syllabics	183
1. The problem	183
2. The metrical "thresholds" of the iambic pentameter	184
3. The verse structure of the unknown meter	187
4. A model of English quasi-syllabic verse	190
5. Conclusions	197
Appendices:	
1. "Noncorrespondences" of word stress and ictus in German verse . .	199
2. Differentiating the stress of monosyllables in the Russian iamb . . .	201
3. An attempt at attributing a verse text	208
4. A genre differentiation of the nondramatic iambic pentameter	219
Conclusion	230
