

CONTENTS

List of figures	xiii
List of tables	xv
1. SETTING AND SUBISTENCE	1
Africa in early recorded history	1
A brief geography	3
The limits of Southern Africa	3
The topography of Southern Africa	8
African climatic regions	11
The climates of Southern Africa	13
The vegetation	15
The fauna, including man	16
Macroscopic and microscopic predators as hazards to man	17
Animal husbandry and agriculture in Southern Africa	21
The nature and extent of cultural competition	23
Man-made changes in the Southern African environment	26
2. EARLY MAN IN SOUTHERN AFRICA	31
The evolution of man	32
The pace of human evolution	35
Climatic changes during the Upper Pleistocene and Early Holocene	36
Could the Southern African environment have had a bearing on the hominization process?	38
True man in Southern Africa	40
The continuity of human occupation	41

Early evidence of modern man in Southern Africa: additional considerations	43
The pre-industrial environment and the scope for early primary industry	45
Cultural divergence and the differentiation of the populations	51
Probable interactions between the earliest Khoisan and the earliest Negroes	53
3. MIGRATION AND ADAPTATION	56
Trans-Saharan migration and gene flow	56
Sub-Saharan migrations and their motives	62
Pre-adaptation and prior adaptation	65
Migration, the spread of cultures, and cultural selection	67
The size of migrant parties	69
The <i>Mfecane</i> or <i>Difaqane</i>	72
Migration and natural selection	76
4. THE KHOI AS MIGRANTS AND NOMADS	78
The origins and migrations of the Khoi	79
The modern distribution of the Khoi	81
Government and economy	89
Physical characters: morphology	92
Physical characters: genetic markers	94
Genetic implications of Khoi pastoralism: lactose absorption	97
Disease among the Khoi	99
Gene markers, selection and drift: smallpox and blood group B	100
Social change and gene flow	101
5. THE SAN YESTERDAY AND TODAY	103
The modern distribution of the San	104
The languages of the San	109
The social and political economy of the San	110
Physical characters: morphology	115
Physical characters: genetic markers	117
Patterns of disease among the San	121
San technology in a period of change	123

6. THE NEGRO INCURSIONS	127
Physical characters: morphology	128
Physical characters: genetic markers	129
The origins and antiquity of the Negroes	134
The expansion of the Negroes	136
The Bantu expansion	138
Negro migrations into Southern Africa	140
The effect of the Kalahari on Negro migrations	146
The problem of the Khoisan-speaking Negroes	149
Servitude and gene flow in Africa	154
Bantu-speaking hunter-gatherers in Southern Africa	156
Seaborne Negro immigration	157
The effect of Negro immigration on the environment	158
7. THE SOUTHERN AFRICAN NEGROES TODAY	162
The curtailment of Negro expansion	165
The growth of urbanization	170
Changing disease patterns	173
Infectious disease as a contemporary problem	174
Genetic disease and congenital malformations	177
Urbanization and the pattern of malignant disease	179
Changes in dietary practice	183
The limits of prior adaptation	185
8. THE SEABORNE IMMIGRATIONS	186
The Caucasoids at the Cape	187
Prior adaptation, selection, and drift in the seventeenth, eighteenth, and nineteenth centuries	192
Later European immigration	194
The Indians in South Africa	199
The Mongoloid settlements	203
Physical characters: morphology	203
Gene marker studies	204
Founder effect and seaborne immigration	206
Inbreeding among Southern African Caucasoids	213
9. THE GROWTH OF HYBRID COMMUNITIES	218
Origins of the hybrid peoples: the Cape 'Coloureds'	219
Origins of the hybrid peoples: the Griqua	224
Origins of the hybrid peoples: the Basters	228
Origins of the hybrid peoples: the smaller local groups	231
The deracinated Khoisan	234

Origins of the hybrid peoples: the mestiços	235
Physical characters and miscegenation	236
Health and the hybrid peoples	236
Social mobility and social selection	238
10. ADAPTATION AND SELECTION IN SOUTHERN AFRICA	241
Adaptation and the Southern African environment	242
Anatomical and physiological factors in adaptation	243
Ecology of the hunter-gatherers: energy flow cycle, climate, and work	246
The ecology of the pastoralists and their energy flow cycle	247
Climate, work, and energy flow in the agricultural ecology	249
Reproductive physiology and the Southern African ecosystems	252
Pigmentation and adaptation: some paradoxes	255
Selection and the monogenic markers	257
Culture, technology, and adaptation	259
Adaptation to technology	260
11. HUMAN AFFINITIES IN A CHANGING ENVIRONMENT	262
Hybridization and selective adaptation	263
Negro adaptation to the urban environment	266
The rural Negro and adaptation to a changing rural environment	271
The population structure of the modern Southern African Negro peoples	273
The affinities of the Southern African populations with other populations of sub-Saharan Africa	280
Affinities among some Southern African populations	285
The impact of the Khoi and San on the environment	290
The Caucasoids and the environment	292
The environmental impact of the Southern African hybrid	295
Futures for hybrid peoples: predominance or disappearance	295
TABLES: Genetic polymorphisms in the peoples of Southern Africa	298
