Preface .....	xiii
Chapter 1 Introduction.....	1
1.1 Straight-Line Programs.....	4
1.2 Simple Loops.....	6
1.2.1 Horner's Method.....	6
1.3 Numbers .....	9
1.3.1 Integer Value .....	9
1.4 Division: Quotients and Remainders .....	11
1.4.1 Addition .....	12
*1.4.2 Arithmetic Modulo $n$ .....	13
*1.4.3 The Euclidean Algorithm .....	15
1.5 Exponents and Logarithms.....	17
1.5.1 Binary Search .....	19
1.6 Simple Nested Loops .....	20
1.6.1 Matrix Addition .....	21
1.6.2 Multiplication .....	22
1.6.3 Matrix Multiplication.....	23
1.6.4 Shortest Path.....	24
1.7 Linear Sums .....	25
1.7.1 Triangular Matrix Addition .....	27
1.8 Probability .....	28
1.8.1 Combining Probabilities.....	29
1.8.2 Conditional Probabilities.....	30
1.9 Average Case and Worst Case.....	31
1.9.1 Insertion Sort.....	35
1.10 Big $O$ Notation and Limits.....	37
*1.11 Relations and Orderings .....	41
1.12 Proof by Induction.....	45
*1.12.1 Induction with Well-Orderings .....	47
*1.12.1.1 Binary Merge---Part 1.....	48
*1.12.1.2 Binary Merge---Part 2.....	51
*1.12.2 Noetherian Induction .....	55
Chapter 2 Summing Series.....	58
2.1 Summation Notation .....	58
2.1.1 Linear Searching .....	64

*2.1.2 Infinite Sums .....	65
*2.1.3 Conventions .....	66
2.2 Operators .....	67
2.3 Polynomial Sums .....	69
2.3.1 Quicksort .....	72
2.4 Exponential Sums .....	76
2.4.1 Random Hashing .....	76
2.5 Summation by Parts .....	79
2.5.1 Cumulative Probabilities .....	81
2.5.2 Heap Sorting .....	82
2.5.3 Random Hashing (Variance) .....	84
2.6 Fractional Sums .....	84
*2.6.1 Finding Partial Fraction Decompositions .....	87
*2.7 Derivatives and Integrals of Sums .....	89
Chapter 3 Products and Binomials .....	90
3.1 Factorials .....	91
3.1.1 Permutations .....	92
3.1.2 Anagrams .....	93
3.1.3 Nonrepeating Random Hashing .....	95
*3.1.4 The Gamma Function .....	96
3.2 Binomials .....	99
3.2.1 Relations among Binomials .....	102
3.2.2 Strategies for Summation Formulas .....	106
3.2.3 Coin Flipping .....	108
3.2.4 Nonrepeating Hashing .....	109
†3.3 Multiple Sums .....	112
3.3.1 Hashing with Chaining .....	117
3.4 Periodic Terms .....	121
3.4.1 Complex Numbers .....	123
*3.4.2 General Formula .....	125
3.5 Products of Binomials .....	127
3.6 Multinomial Coefficients .....	131
*3.7 Stirling Numbers .....	132
*3.7.1 Find the Maximum .....	136
*3.8 Hypergeometric Functions .....	139
*3.9 Inclusion and Exclusion .....	146
Chapter 4 Asymptotic Approximation .....	148
4.1 Bounding Functions .....	148
4.1.1 Resource Trade-offs .....	152
†4.2 Asymptotic Notation .....	155
†4.2.1 Power Series .....	158
†4.2.2 Techniques for Asymptotic Expansions .....	161
*4.2.3 Asymptotics and Convergence .....	165

4.3 Bounding Summations .....	166
*4.3.1 Backtracking .....	168
*4.3.1.1 Backtracking (Average Time) .....	171
4.4 Rapidly Changing Summands .....	180
4.5 Slowly Varying Summands .....	183
4.5.1 The Euler Summation Formula .....	184
*4.5.2 The Generalized Euler Summation Formula .....	186
*4.5.3 Functions with Slowly Varying Tails .....	188
†4.5.4 Harmonic Numbers .....	189
†4.5.4.1 Random Hashing Finding Items .....	191
†4.5.5 Stirling's Approximation .....	193
4.6 Alternating Summands .....	195
*4.7 Asymptotic Iteration .....	196
*4.8 Asymptotics and Measurements .....	198
Chapter 5 Simple Linear Recurrences .....	200
5.1 Notation .....	201
5.2 Linear First Order Recurrences .....	204
5.2.1 Secondary Recurrences .....	205
5.2.2 Divide and Conquer Algorithms .....	210
5.2.3 Faster Multiplication .....	212
5.2.3.1 Break-even Points .....	214
5.2.4 Quicksort (Best Case) .....	215
5.2.5 Strassen's Algorithm .....	217
5.3 Generating Functions .....	219
5.3.1 Fibonacci Numbers .....	221
5.3.2 Properties of Fibonacci Numbers .....	224
*5.3.3 Tape Sorting: Three Tapes .....	226
*5.3.3.1 Simple Merge Sort .....	228
*5.3.3.2 Polyphase Merge .....	229
5.4 Constant Coefficients .....	234
5.4.1 The Characteristic Equation .....	235
5.4.2 Undetermined Coefficients .....	238
*5.4.3 A Simple Queue .....	240
5.5 Divide and Conquer with Uneven Parts .....	243
5.5.1 Medians .....	245
Chapter 6 General Linear Recurrences .....	251
*6.1 Polynomial Coefficients .....	251
*6.1.1 Storage Needs .....	254
*6.1.2 Differential Equations .....	255
*6.2 Properties of Linear Recurrences .....	256
*6.2.1 Linear Combinations .....	257
*6.2.2 Reducing the Order with a Solution .....	259
*6.2.3 Reducing the Order by Factoring .....	261

*6.2.4 Variation of Parameters . . . . .	264
*6.2.5 Variation of Parameters: The General Case . . . . .	266
*6.3 Generating Functions of Probabilities . . . . .	268
*6.3.1 Find the Maximum . . . . .	272
*6.4 First Order Linear Recurrences . . . . .	273
Chapter 7 Full-History and Nonlinear Recurrences . . . . .	277
7.1 Full History . . . . .	277
7.1.1 Elimination of the History . . . . .	277
7.1.1.1 Quicksort (Average Time) . . . . .	278
7.1.1.2 Binary Search Trees . . . . .	279
7.1.2 Multiplying Generating Functions . . . . .	282
*7.1.2.1 Traversing Threaded Binary Trees . . . . .	283
7.1.3 Exponential Generating Functions . . . . .	292
*7.1.3.1 A Silly Algorithm . . . . .	293
*7.1.4 Repertoire . . . . .	296
7.2 Nonlinear Equations . . . . .	299
7.2.1 Transformation to Linear Recurrences . . . . .	300
7.2.1.1 Decision Tables . . . . .	301
*7.2.2 Almost Linear Recurrences . . . . .	303
7.2.3 Generating Functions and Convolutions . . . . .	306
*7.3 Integer Part . . . . .	309
*7.4 Min and Max . . . . .	314
*7.4.1 The Clever Approach . . . . .	315
*7.4.2 The Brute-Force Approach . . . . .	317
7.4.3 Dynamic Programming . . . . .	320
7.4.3.1 Multiplying Series of Matrices . . . . .	321
*7.4.3.2 Least-Cost Parsing . . . . .	325
*7.5 Advanced Asymptotic Methods . . . . .	328
Chapter 8 Multidimensional Recurrences . . . . .	329
8.1 Systems of Equations . . . . .	329
*8.1.1 Transformations . . . . .	329
*8.1.1.1 Parallel Or . . . . .	331
*8.1.2 Discrete Linear Systems . . . . .	335
*8.1.3 Characteristic Equations . . . . .	336
*8.1.3.1 Tape Sorting: Four Tapes . . . . .	337
*8.1.4 Steady-State Solutions . . . . .	343
8.2 Recurrences in Several Variables . . . . .	345
*8.2.1 Linear Transformation of Indices . . . . .	347
*8.2.2 Separation of Variables . . . . .	352
8.2.2.1 Binary Search Tree . . . . .	354
*8.2.3 Simplifying Multiple-Variable Recurrences . . . . .	357
Chapter 9 Global Techniques . . . . .	361

9.1 Flow Graphs .....	361
9.1.1 Transforming Nodes into Edges .....	367
9.1.2 Kirchhoff's Law .....	370
9.2 Credit and Amortized Cost .....	374
9.2.1 Pattern Matching on Strings .....	375
9.2.2 Move to Front .....	379
9.2.3 Set Union Algorithms .....	385
9.2.3.1 Set Union with Ranks .....	389
*9.2.3.2 Set Union with Ranks and Collapsing .....	390
†9.3 The Fourier Transform .....	393
†9.3.1 The Fourier Transform and Convolutions .....	393
†9.3.2 The Fast Fourier Transform .....	395
*9.3.3 The All-Integer Fourier Transform .....	400
*9.4 Modular Arithmetic .....	403
*9.4.1 Representation of Numbers .....	404
*9.4.2 Doing Arithmetic .....	405
*9.4.3 Conversion to Radix Representation .....	406
*9.4.4 Applications .....	407
Chapter 10 Lower Bounds and NP Completeness .....	409
10.1 Input-Output Lower Bounds .....	411
10.2 Information Theoretic Lower Bounds .....	411
10.2.1 Sorting .....	412
10.2.2 Merging .....	413
10.2.3 Adversary Lower Bounds .....	413
10.3 Problems That Require Similar Times .....	415
10.3.1 Boolean and Integer Matrix Multiplication .....	416
10.3.2 Boolean Matrix Multiplication and Transitive Closure ...	417
10.4 NP-Complete Problems .....	422
10.4.1 3-Satisfiability .....	430
10.4.2 Vertex Cover .....	433
10.4.3 Hamiltonian Circuit .....	434
10.5 Approximation and Heuristics .....	437
*10.6 Undecidability .....	439
Chapter 11 Statistics .....	443
11.1 Distribution Functions .....	444
11.2 Hypothesis Testing .....	445
11.3 The Riemann-Stieltjes Integral .....	449
11.4 Using Distribution Functions .....	451
11.5 The Normal Distribution .....	454
11.6 Estimating Mean and Variance .....	456
*11.7 The Central Limit Theorem .....	458
*11.8 Practical Considerations .....	459
11.9 Bounding Tails of Distributions .....	461

*11.10 Estimating Backtrack Trees .....	465
*11.10.1 Analysis .....	468
*11.10.2 Interpretation .....	475
*11.11 Linear Least Squares Estimation.....	477
*11.12 Measuring Asymptotic Performance.....	481
*11.12.1 Deletion in Binary Search Trees.....	481
Appendix .....	487
A.1 Linear Programming.....	487
*A.2 Contour Integration .....	487
References .....	495
Analysis of Algorithms .....	495
Mathematics .....	496
Algorithms.....	498
Other references .....	499
Math Index .....	504
Notation.....	504
Definitions .....	505
Conventions.....	510
Identities .....	510
Relations and Orderings .....	515
Binomials.....	516
Summations.....	516
Particular Results.....	516
General Laws.....	517
Binomial Sums .....	519
Bounds .....	519
Particular Results.....	519
General Laws.....	520
