2.5 Associative adjectives and the pro-form <i>one</i>	34
2.6 The stress patterns of associative attribution	39
Chapter 3 A mythology of fore-stress, end-stress and tree geometry	43
3.1 Introduction	43
3.2 The first myth: ‘All phrases have end-stress’	48
3.3 End-stressed NNs – compounds or phrases?	53
3.3.1 Background	53
3.3.2 Fore-stress and end-stress in NNs	55
3.3.3 End-stressed NNs and the limits of formal prediction	58
3.3.4 Tendencies for end-stress: attribution, transparency, ascription	60
3.3.5 Compound stress in Scottish English	64
3.4 The stress patterns of NNNs	67
3.4.1 The myth and the facts	67

3.4.2	Analysis 1: all end-stressed NNs are phrases	70
3.4.3	Analyses 2 and 3: all NNs are or may be compounds	72
3.5	Conclusion	74
Chapter 4 Interlude: the porous nature of lexical stratification		76
4.1	Introduction	76
4.2	The nature of lexical strata	78
4.2.1	Productivity and semantic transparency	79
4.2.2	Phonological transparency	80
4.2.3	Embedding and affix ordering	82
4.2.4	An illustrative example: noun-forming <i>-er</i>	83
4.3	Brackets and their erasure	86
4.4	Overlapping strata: unexpected stress preservation and its unexpected failure	87
4.5	More on stratal overlap	92
Chapter 5 Lexical integrity?		96
5.1	On the nature of the lexicon–syntax divide	96
5.2	The purported integrity of the lexicon	99
5.2.1	Lexical integrity and bracket erasure	99
5.2.2	Syntactic operations as diagnostics of phrasal status	101
5.2.2.1	Co-ordination reduction	101
5.2.2.2	Pro- <i>one</i>	103
5.2.2.3	Phrases inside compounds	106
5.2.3	Listed semantics, regular form	110
5.2.4	Unlisted semantics: anaphoric compounding	114
5.3	Compounds in no-man’s land	118
5.3.1	Lexical non-integrity	118
5.3.2	Overlapping modules	120
