<i>About the authors</i>	ix
One: Introduction	1
Ways to use this book	4
Two: Why teach?	7
How much can I handle?	11
How might I start to teach?	14
Research seminars	16
Three: Seminar presentations to your peers	17
Research seminar opportunities	17
Why contribute to a research seminar?	19
Preparing the right material	20
Getting the tone right	23
Maximising the benefits	27
Four: Leading an undergraduate seminar	33
Allow students the freedom to express an opinion, even the ‘wrong’ opinion	35
Allow students to ask questions, even the ‘wrong’ questions	36
Allow you to talk through a topic, even the ‘wrong’ topic	38
Allow you to share your expertise, even the ‘wrong’ expertise	40

Why lead a seminar?	42
Your role as educator	44
Setting objectives for seminars	47
Getting the timing right	49
Encouraging discussion	54
Ice-breakers	55
Five: Dynamic learning environments	61
Preparing your material	61
Supportive, not overwhelming, material	62
Dynamic, not static, material	62
Student-produced material	63
Judging and balancing time	65
Try to avoid revealing your entire plan	66
Use breaks to control time	67
Handouts leave you carefree	68
Structuring your aims and objectives	70
A series of dynamic learning events	71
Techniques for encouraging engagement	73
Sharing the chairing	73
Brainstorming	74
Learning needs analysis	74
Skills inventory	75
Psychometric-/personality-type testing	76
Recording events	76
Peer support and assessment	77
Six: Lectures	79
Why give a lecture?	80
Getting the brief	81
The casual approach	81
Being clear	82
Regular or new lecture?	82
Communicate by planning	82
Thinking in context	83
Lecture performance	83
Teaching aids	84
Interactivity	84

Learning hurdles	85
Timing the preparation	85
Decisions to make	86
Number of students	87
Level of knowledge	87
Do they know you? Do they know each other?	87
What time of day is the lecture?	88
Show you care	88
Preparing to write the lecture	89
Is it a core lecture?	89
What do your students need to get out of it?	89
You cannot do too much	90
General or niche?	91
Planning the lecture	91
Writing the lecture	93
How long should it take to write it?	93
How long should the word count be?	93
How should it look?	94
Knowing the space	94
Getting your timing right	95
Time warping	95
Practising	97
Nerves	98
Reflections	101
Seven: Productive teaching aids	103
Do you need teaching aids?	105
What options do you have?	106
Blackboard, whiteboard, flipchart	107
Data projector, slide projector, overhead projector	110
Interactive whiteboard (smartboard)	113
Handouts	116
Virtual learning environment (VLE), including 'Turnitin'	119
Wikis and online polling systems	123
Demonstration	126
Film and audio	129
Online resources and mobile phones	131
Students	135

Eight: Handling assessment	137
A special note about evaluation	141
The marking rhythm	142
Marking criteria	143
Setting examination questions	144
Moderation and double marking	145
Written feedback	147
Tutorials	147
Voluntary or compulsory tutorials?	147
One or several students?	148
Frequency of tutorials	148
Written or verbal delivery of an assessed piece?	148
Immediate or considered feedback?	149
Making a difference	149
<i>Conclusion</i>	151
<i>Glossary of assessment terms</i>	153
<i>Recommended further reading</i>	159
<i>Index</i>	162
