

part I Introduction

- 1 Preliminaries 2
- 2 Supply and Demand 25
- 3 Balancing Benefits and Costs 64

part II Economic Decision Making

IIA: Consumption Decisions 90

- 4 Principles and Preferences 91
- 5 Constraints, Choices, and Demand 123
- 6 From Demand to Welfare 166

IIB: Production Decisions 208

- 7 Technology and Production 209
- 8 Cost 249
- 9 Profit Maximization 293

IIC: Additional Topics Concerning Decisions 324

- 10 Choices Involving Time 325
- 11 Choices Involving Risk 365
- 12 Choices Involving Strategy 402
- 13 Behavioral Economics 447

part III Markets

IIIA: Competitive Markets 494

- 14 Equilibrium and Efficiency 495
- 15 Market Interventions 539
- 16 General Equilibrium, Efficiency, and Equity 576

IIIB: Market Failures 621

- 17 Monopoly 622
- 18 Pricing Policies 664
- 19 Oligopoly 701
- 20 Externalities and Public Goods 752
- 21 Asymmetric Information (Online: www.mhhe.com/berheimle)

part I Introduction

I Preliminaries 2

- 1.1 **What Is Microeconomics?** 3 / Institutions for Allocating Resources 3 / Economic Motives 7 / Positive versus Normative Analysis 8 / The Scope of Microeconomics 10
 - 1.2 **Tools of Microeconomics** 11 / The Scientific Method 11 / Models and Mathematics 12 / Simplifying Assumptions 13 / Data Analysis 14 / Why Economists Sometimes Disagree 15
 - 1.3 **Themes of Microeconomics** 16 / Decisions: Some Central Themes 16 / Markets: Some Central Themes 18
 - 1.4 **Uses of Microeconomics** 20
- Chapter Summary* 22 / *Additional Exercises* 23

2 Supply and Demand 25

- 2.1 **Demand** 26 / Demand Curves 26 / Demand Functions 28
 - 2.2 **Supply** 29 / Supply Curves 29 / Supply Functions 31
 - 2.3 **Market Equilibrium** 32 / Changes in Market Equilibrium 34 / The Size of Changes in Market Equilibrium 41
 - 2.4 **Elasticities of Demand and Supply** 45 / The (Price) Elasticity of Demand 46 / The (Price) Elasticity of Supply 54 / The Size of Changes in Market Demand, Revisited 55 / Other Elasticities 55
- Chapter Summary* 57 / *Additional Exercises* 58 / *Appendix: Estimating Demand and Supply Curves* 59 / *Add-On 2A: Enron's Stock Price Collapse* / *Add-On 2B: Elasticities and Calculus* / *Add-On 2C: The Elasticity of Demand and Total Expenditure*

3 Balancing Benefits and Costs 64

- 3.1 **Maximizing Benefits Less Costs** 65 / Maximizing Net Benefits with Finely Divisible Actions 66
 - 3.2 **Thinking on the Margin** 71 / Marginal Cost 71 / Marginal Benefit 72 / Best Choices and Marginal Analysis 73 / Marginal Benefit and Marginal Cost with Finely Divisible Actions 74 / Best Choices and Marginal Analysis with Finely Divisible Actions 77 / Finding Best Choices Using Marginal Analysis 80
 - 3.3 **Sunk Costs and Decision Making** 81
- Chapter Summary* 84 / *Additional Exercises* 84 / *Appendix: Finding a Best Choice Using Marginal Analysis* 85 / *Add-On 3A: Best Choices with Avoidable Fixed Costs* / *Add-On 3B: Regulation of Arsenic Levels in Drinking Water*

part II Economic Decision Making

IIA: Consumption Decisions 90

4 Principles and Preferences 91

- 4.1 **Principles of Decision Making** 92

- 4.2 Consumer Preferences 95** / How Do People Rank Consumption Bundles? 95 / Consumer Preferences with Finely Divisible Goods 97 / Consumer Indifference Curves 98 / Goods versus Bads 104
- 4.3 Substitution between Goods 106** / Rates of Substitution 106 / Special Cases: Perfect Substitutes and Complements 112
- 4.4 Utility 114** / From Indifference Curves to Utility Functions and Back 115 / Ordinal versus Cardinal Utility 117 / Utility Functions and the Marginal Rate of Substitution 118
Chapter Summary 121 / Additional Exercises 121
- 5 Constraints, Choices, and Demand 123**
- 5.1 Affordable Consumption Bundles 124** / Income, Prices, and the Budget Line 124 / Changes in Income and Prices 127 / Other Limits on Consumption 130
- 5.2 Consumer Choice 130** / The No-Overlap Rule 132 / Interior Solutions 133 / Boundary Solutions 136
- 5.3 Utility Maximization 139** / Maximizing Utility with Finely Divisible Goods 141 / Utility Maximization and Best Affordable Bundles 142
- 5.4 Prices and Demand 143** / The Price-Consumption Curve 143 / Individual Demand Curves 144 / Price Changes and Shifts in Demand 148
- 5.5 Income and Demand 149** / The Income-Consumption Curve 150 / Normal versus Inferior Goods 150 / Engel Curves 155 / Changes in Income and Shifts in the Demand Curve 156
- *5.6 How Economists Determine a Consumer's Preferences 160** / The Principle of Revealed Preference 160 / The Use of Statistical Tools 162
Chapter Summary 163 / Additional Exercises 164 / Add-On 5A: Maximizing a Utility Function / Add-On 5B: Application: Substitution between Domestic and Imported Automobiles / Add-On 5C: What Makes a Good Normal or Inferior? / Add-On 5D: Volume-Sensitive Pricing
- 6 From Demand to Welfare 166**
- 6.1 Dissecting the Effects of a Price Change 167** / Compensated Price Changes 167 / Substitution and Income Effects 169 / The Direction of Substitution and Income Effects 172 / Why Do Demand Curves Usually Slope Downward? 174
- 6.2 Measuring Changes in Consumer Welfare Using Demand Curves 177** / Compensating Variation 177 / Consumer Surplus 178 / Using Consumer Surplus to Measure Changes in Welfare 180
- 6.3 Measuring Changes in Consumer Welfare Using Cost-of-Living Indexes 183** / What Is a Cost-of-Living Index? 183 / A Perfect Cost-of-Living Index 184 / Fixed-Weight Price Indexes 185
- 6.4 Labor Supply and the Demand for Leisure 188** / The Effect of Wages on Hours of Work 189 / The Effect of Wages on Labor Force Participation 191
- *6.5 Another Type of Demand Curve 193** / The Relationship between the Two Types of Demand Curves 195 / Exact Consumer Surplus 199
Chapter Summary 202 / Additional Exercises 203 / Appendix: The Slutsky Equation 205
- IIB: Production Decisions 208**
- 7 Technology and Production 209**
- 7.1 Production Technologies 210** / The Production Possibilities Set and the Efficient Production Frontier 213 / Production Functions 215 / Production in the Short Run and the Long Run 216
- 7.2 Production with One Variable Input 217** / Average and Marginal Products 217 / The Relationship between Average and Marginal Product 219 / Average and Marginal Product Curves with Finely Divisible Inputs 219 / Using the Marginal Product of Labor to Make Production Decisions 223

7.3 Production with Two Variable Inputs 226 / Isoquants 227 / Average and Marginal Products with More than One Input 232 / Substitution between Inputs 233 / The MRTS and Marginal Products 234 / Input Substitution for Three Special Production Technologies 235

7.4 Returns to Scale 238 / Reasons for Increasing and Decreasing Returns to Scale 241 / Implications of Returns to Scale 241

7.5 Productivity Differences and Technological Change 242 / Productivity Differences and Technological Change with Two Inputs 243 / Productivity Comparisons 244 / Reasons for Productivity Differences 244

Chapter Summary 246 / Additional Exercises 246 / Add-On 7A: Output and Productivity Growth

8 Cost 249

8.1 Types of Cost 250

8.2 What Do Economic Costs Include? 253 / Opportunity Costs 253 / The User Cost of Capital 255

8.3 Short-Run Cost: One Variable Input 255

8.4 Long-Run Cost: Cost Minimization with Two Variable Inputs 259 / Isocost Lines 261 / Least-Cost Production 262 / Interior Solutions 263 / Boundary Solutions 265 / Finding the Least-Cost Input Combination 267 / The Firm's Cost Function 268

8.5 Average and Marginal Costs 272 / Average and Marginal Cost Curves with Finely Divisible Output 274 / Marginal Cost, Marginal Products, and Input Prices 277 / Marginal Costs and Variable Cost 278 / More Average and Marginal Costs 278

8.6 Effects of Input Price Changes 281

8.7 Short-Run versus Long-Run Costs 283

8.8 Economies and Diseconomies of Scale 287

***8.9 Multiproduct Firms and Economies of Scope 288**

Chapter Summary 290 / Additional Exercises 292 / Add-On 8A: Finding a Least-Cost Input Combination Using Calculus

9 Profit Maximization 293

9.1 Profit-Maximizing Quantities and Prices 295 / Choosing Price versus Choosing Quantity 295 / Maximizing Profit 296

9.2 Marginal Revenue, Marginal Cost, and Profit Maximization 300 / Marginal Revenue 300 / The Profit-Maximizing Sales Quantity 303

9.3 Supply Decisions by Price-Taking Firms 304 / The Profit-Maximizing Sales Quantity of a Price-Taking Firm 304 / The Supply Function of a Price-Taking Firm 307 / The Law of Supply 310 / Changes in Input Prices and Shifts in the Supply Function 311

9.4 Short-Run versus Long-Run Supply by Price-Taking Firms 313

9.5 Producer Surplus 318

***9.6 Supply by Multiproduct Price-Taking Firms 320**

Chapter Summary 322 / Additional Exercises 322 / Add-On 9A: Input Demands by a Price-Taking Firm / Add-On 9B: Profit Maximization by a Price-Taking Firm when the Marginal Cost Curve Is Not Upward Sloping

IIC: Additional Topics Concerning Decisions 324

0 Choices Involving Time 325

10.1 Transactions Involving Time 326 / Interest Rates and Compound Interest 326 / Present Value and the Price of a Future Dollar 329 / Valuing Streams of Future Payments or Receipts 331 / Why Do Interest Rates Differ? 335 / Real versus Nominal Interest 336

10.2 Saving and Borrowing 338 / The Timing of Consumption 338 / Saving, Borrowing, and the Interest Rate 343 / Saving and Consumption over the Life Cycle 346

10.3 Investment 350 / Measuring the Profitability of Investments: Net Present Value 352 / The Internal Rate of Return 354 / Investment and the Interest Rate 354 / Choosing between Mutually Exclusive Projects 356 / Investing in Human Capital 359
Chapter Summary 362 / Additional Exercises 363

II Choices Involving Risk 365

11.1 What Is Risk? 366 / Possibilities 366 / Probability 367 / Uncertain Payoffs 367 / Expected Payoff 370 / Variability 371
11.2 Risk Preferences 372 / Consumption Bundles 373 / Preferences and Indifference Curves 375 / The Concept of Risk Aversion 376 / Alternatives to Risk Aversion 379 / Expected Utility 381
11.3 Insurance 385 / The Nature of Insurance 385 / The Demand for Insurance 386 / The Value of Insurance 389
11.4 Other Methods of Managing Risk 392 / Risk Sharing 392 / Hedging and Diversification 395 / Information Acquisition 399
Chapter Summary 400 / Additional Exercises 401 / Add-On 11A: The Demand for Risky Assets

12 Choices Involving Strategy 402

12.1 What Is a Game? 403 / Two Types of Games 404 / How to Describe a Game 404
12.2 Thinking Strategically in One-Stage Games 406 / Dominant Strategies 407 / Dominated Strategies 410 / Weakly Dominated Strategies 413
12.3 Nash Equilibrium in One-Stage Games 416 / The Concept of Nash Equilibrium 416 / Nash Equilibria in Games with Finely Divisible Choices 420 / Mixed Strategies 423
12.4 Games with Multiple Stages 428 / Credible Threats in Games with Perfect Information 428 / Cooperation in Repeated Games 435
***12.5 Games in Which Different People Have Different Information 440** / The Winner's Curse 440 / Reputation 442
Chapter Summary 443 / Additional Exercises 444 / Add-On 12A: Analyzing Multiple-Stage Games

13 Behavioral Economics 447

13.1 Objectives and Methods of Behavioral Economics 449 / Motivations and Objectives 449 / Methods 450 / How to Evaluate Behavioral Evidence 452
13.2 Departures from Perfect Rationality 453 / Incoherent Choices 453 / Bias toward the Status Quo 456 / Narrow Framing 460 / Salience 463 / Rules of Thumb 463
13.3 Choices Involving Time 465 / Maintaining Self-Control 465 / Ignoring Sunk Costs 471 / Forecasting Future Tastes and Needs 473
13.4 Choices Involving Risk 474 / Trouble Assessing Probabilities 474 / Preferences toward Risk 477
13.5 Choices Involving Strategy 482 / Possible Shortcomings of Game Theory 482 / The Importance of Social Motives 484
13.6 Neuroeconomics: A New Frontier 487
Chapter Summary 489 / Additional Exercises 491

part Markets

IIIA: Competitive Markets 494

14 Equilibrium and Efficiency 495

14.1 What Makes a Market Competitive? 496

14.2 Market Demand and Market Supply 498 / Market Demand 498 / Market Supply 500

- 14.3 Short-Run and Long-Run Competitive Equilibrium 505** / Long-Run Competitive Equilibrium with Free Entry 506 / Short-Run and Long-Run Responses to Changes in Demand 507 / Short-Run and Long-Run Responses to Changes in Cost 510 / Price Changes in the Long Run 514
- 14.4 Efficiency of Perfectly Competitive Markets 515** / Aggregate Surplus and Economic Efficiency 515 / How Perfectly Competitive Markets Maximize Aggregate Surplus 517
- 14.5 Measuring Surplus Using Market Demand and Supply Curves 524** / Aggregate Surplus 525 / Consumer and Producer Surpluses 527
- Chapter Summary 531 / Additional Exercises 532 / Appendix: Equilibrium in Factor Markets 534*
- 15 Market Interventions 539**
- 15.1 Taxes (and Subsidies) 540** / The Burden of a Tax 541 / The Welfare Effects of a Tax 547 / Which Goods Should the Government Tax? 550 / Government Subsidies and Their Effects 552
- 15.2 Policies Designed to Raise Prices 556** / Price Floors 556 / Price Supports 559 / Production Quotas 561 / Voluntary Production Reduction Programs 561 / Policies that Lower Prices 563
- 15.3 Import Tariffs and Quotas 565** / Tariffs 565 / Quotas 566 / Beneficial Trade Barriers 567
- Chapter Summary 570 / Additional Exercises 571 / Appendix: Tax Incidence and Ad Valorem Taxes 573 / Add-On 15A: Deadweight Loss of a Specific Tax with Income Effects*
- 16 General Equilibrium, Efficiency, and Equity 576**
- 16.1 The Nature of General Equilibrium 577**
- 16.2 Positive Analysis of General Equilibrium 579** / Market-Clearing Curves 580 / A General Equilibrium in Two Markets 581 / The Effects of a Sales Tax 582
- 16.3 Normative Criteria for Evaluating Economic Performance 588** / Efficiency 588 / Equity 589 / Social Welfare Functions 591
- 16.4 General Equilibrium and Efficient Exchange 592** / General Equilibrium in Exchange Economies 592 / The First Welfare Theorem 595 / Efficiency in Exchange 596
- 16.5 General Equilibrium and Efficient Production 601** / Efficiency in Production 601 / The First Welfare Theorem, Again 607 / Efficiency as a Justification for Free Markets 611
- 16.6 Equity and Redistribution 612** / The Second Welfare Theorem 613 / The Conflict between Equity and Efficiency 614
- Chapter Summary 618 / Additional Exercises 619 / Add-On 16A: Arrow's Impossibility Theorem / Add-On 16B: Bargaining and Competitive Markets*
- IIIB: Market Failures 621**
- 17 Monopoly 622**
- 17.1 Market Power 623** / How Do Firms Become Monopolists? 625
- 17.2 Monopoly Pricing 627** / Marginal Revenue for a Monopolist 627 / Monopoly Profit Maximization 630 / Markup: A Measure of Market Power 633
- 17.3 Welfare Effects of Monopoly Pricing 635**
- 17.4 Distinguishing Monopoly from Perfect Competition 638** / Response to Changes in Demand 639 / Response to Changes in Cost 640
- 17.5 Nonprice Effects of Monopoly 642** / Product Quality 642 / Advertising 645 / Investments Made to Become a Monopolist 647
- 17.6 Monopsony 648** / Marginal Expenditure 649 / Monopsony Profit Maximization 650 / The Welfare Effects of Monopsony Pricing 651
- 17.7 Regulation of Monopolies 652** / Why Are Some Monopolies Regulated? 653 / First-Best versus Second-Best Price Regulation 654 / Nonprice Effects of Price Regulation 654 / Regulatory Failure 655 / The Trend toward Deregulation 655 / Government Ownership of Monopolies 657

17.8 Multiproduct Monopoly 657

Chapter Summary 660 / Additional Exercises 662 / Add-On 17A: Canadian Drug Prices and Government Regulation / Add-On 17B: Regulation of a Multiproduct Monopolist (and Optimal Taxation)

18 Pricing Policies 664

18.1 Price Discrimination: Pricing to Extract Surplus 665

18.2 Perfect Price Discrimination 667 / Two-Part Tariffs 669

18.3 Price Discrimination Based on Observable Customer Characteristics 672 / Welfare Effects of Imperfect Price Discrimination 677 / Price Discrimination and Market Power 680

18.4 Price Discrimination Based on Self-Selection 681 / Quantity-Dependent Pricing and Self-Selection 683 / The Profit-Maximizing Two-Part Tariff 685 / Using Menus to Increase Profit 689

18.5 Bundling 694 / Mixed Bundling 697

Chapter Summary 698 / Additional Exercises 699 / Add-On 18A: Profit-Maximizing Quantity-Dependent Pricing

19 Oligopoly 701

19.1 Oligopoly and Game Theory 702

19.2 The Bertrand Model: Price Competition with Homogeneous Goods 704

19.3 Cournot Quantity Competition 707 / Nash Equilibrium in a Cournot Market 709 / Oligopoly versus Monopoly Deadweight Loss 714 / Oligopoly and Perfect Competition 715 / Markups in a Cournot Market 716

19.4 Price Competition with Differentiated Products 720

19.5 Collusion 725 / Factors that Inhibit Collusion 727 / Tacit versus Explicit Collusion 728

19.6 Market Entry and Monopolistic Competition 731 / Factors that Affect the Number of Firms Entering a Market 732 / Market Entry and Social Welfare 735 / Market Entry, Product Differentiation, and Monopolistic Competition 737

19.7 Strategic Behavior that Shapes Future Competition 738 / Raising Rivals' Costs 739 / Strategic Precommitment 740

19.8 Antitrust Policy 744 / U.S. Antitrust Law 745 / Antitrust Violations 745

Chapter Summary 748 / Additional Exercises 750 / Add-On 19A: Credible Entry Deterrence

20 Externalities and Public Goods 752

20.1 Externalities and Inefficiency 753 / What Is an externality? 754 / Negative Externalities and Inefficiency in Competitive Markets 755 / Positive Externalities and Inefficiency in Competitive Markets 759 / Externalities in Imperfectly Competitive Markets 761

20.2 Remedies for Externalities: The Private Sector 763 / Property Rights and Negotiation 763 / Limitations of Bargaining 767

20.3 Remedies for Externalities: The Public Sector 768 / Policies that Support Markets 768 / Quantity Controls 769 / Policies that Correct Private Incentives 770 / Controlling Quantities versus Correcting Incentives 776 / Hybrid Market Approaches 780

20.4 Common Property Resources 782

20.5 Public Goods 785 / The Efficient Provision of Public Goods 786 / Public Goods and Market Failure 787 / Public Policy toward Public Goods 789

Chapter Summary 795 / Additional Exercises 796

21 Asymmetric Information 21-1 (Online: www.mhhe.com/bernheimle)

21.1 Adverse Selection 21-2 / Adverse Selection and Lemons 21-3 / Adverse Selection in a Labor Market 21-4 / Responses to Informational Asymmetries 21-8

21.2 Signaling 21-10 / A Simple Model of Educational Attainment 21-10 / Equilibrium with Separation 21-12 / Equilibrium with Pooling 21-15 / Comparing Separating Equilibria and

Pooling Equilibria 21-16 / Which Equilibrium Will Prevail? 21-17 / A Possible Role for the Government 21-18

21.3 Screening 21-21 / A Simple Model of Workplace Responsibilities 21-22 / Equilibrium with Separation 21-25 / Are There Pooling Equilibria? 21-29 / A Possible Role for the Government 21-30

21.4 Incentives and Moral Hazard 21-32 / Efficiency and Incentive Pay 21-33 / Ownership and Incentives 21-38 / The Cost of Incentives 21-39 / Other Sources of Incentives 21-41

Chapter Summary 21-42 / Additional Exercises 21-43 / Add-On 21A: Adverse Selection and Screening in Insurance Markets / Add-On 21B: Incentives and Risk Aversion
