

# Contents

<b>1</b>	<b>Period Mappings for Families of Complex Manifolds</b> .....	1
1.1	Introduction .....	1
1.2	The $A^p$ Construction .....	5
1.3	Locally Split Exact Triples and Their Extension Classes.....	15
1.4	Connecting Homomorphisms .....	28
1.5	Frameworks for the Gauß-Manin Connection .....	44
1.6	The Gauß-Manin Connection .....	60
1.7	Generalities on Period Mappings .....	67
1.8	Period Mappings of Hodge-de Rham Type .....	81
	References .....	97
<b>2</b>	<b>Degeneration of the Frölicher Spectral Sequence</b> .....	99
2.1	Problem Description.....	99
2.2	Coherence of Direct Image Sheaves .....	101
2.3	The Infinitesimal Lifting of the Degeneration .....	108
2.4	Comparison of Formal and Ordinary Direct Image Sheaves .....	125
2.5	Compactifiable Submersive Morphisms.....	129
	References .....	141
<b>3</b>	<b>Symplectic Complex Spaces</b> .....	143
3.1	Symplectic Structures on Complex Spaces .....	143
3.2	The Beauville-Bogomolov Form .....	154
3.3	Deformation Theory of Symplectic Complex Spaces .....	170
3.4	The Local Torelli Theorem .....	180
3.5	The Fujiki Relation .....	195
	References .....	211
<b>A</b>	<b>Foundations and Conventions</b> .....	213
A.1	Set Theory .....	213
A.2	Category Theory .....	215
A.3	Homological Algebra .....	221
A.4	Sheaves.....	227

A.5	Ringed Spaces .....	234
A.6	Multilinear Algebra .....	238
A.7	Complex Spaces .....	243
	References .....	248
<b>B</b>	<b>Tools</b> .....	249
B.1	Base Change Maps .....	249
B.2	Hodge Theory of Rational Singularities .....	260
	References .....	267
	<b>Terminology</b> .....	269
