## Part I. Informal Logic

1. Appraising Arguments Logically	3
<i>Arguments</i>	3
<i>Correct Arguments</i>	9
<i>Fallacies and the General Circumstances of Arguments</i>	11
2. Traditional Informal Fallacies	21
<i>The Material Fallacies of Relevance</i>	22
<i>The Material Fallacies of Insufficient Evidence</i>	41
<i>The Fallacies of Ambiguity</i>	47
3. Words and Meaning	67
<i>Intension and Extension</i>	67
<i>Paradigm Examples, Semantic Features, and Criteria</i>	71
<i>Ambiguity and Vagueness</i>	77
<i>Factual and Verbal Disputes</i>	86
<i>Persuasive Definitions</i>	97
4. Uses of Language	104
<i>Three Common Uses of Language</i>	104
<i>Nonsense and Category Mistakes</i>	115
5. Analogy, Dilemma, and Paradox	126
<i>Analogical Arguments</i>	126
<i>Dilemmas</i>	135
<i>Summary</i>	143
<i>Paradoxes</i>	146

## Part II. Formal Logic

6. Validity	157
<i>Valid Deductive Arguments</i>	157

	<i>Argument Patterns</i>	159
	<i>Valid Arguments and Valid Argument Patterns</i>	162
	<i>Summary</i>	163
7.	The Statement Connectives	164
	“ $\sim$ ” and English “not”	164
	“ $\cdot$ ” and English “and”	165
	“ $\vee$ ” and English “or”	167
	“ $\supset$ ” and English “if, then”	168
	“ $\equiv$ ” and English “if and only if”	171
	<i>The Scope of Statement Connectives</i>	172
	<i>Determining the Truth Value of Compound Statements</i>	173
8.	Truth Tables	176
	<i>Truth Tables for the Logical Connectives</i>	176
	<i>Logical Equivalence</i>	178
	<i>Testing Argument Patterns</i>	183
	<i>Testing Arguments</i>	185
	<i>Truth Table Short-cut Method</i>	189
	<i>Symbolizing Arguments</i>	192
9.	Elementary Inferences	197
	<i>Rules of Inference</i>	198
	<i>Replacement Rules of Inference</i>	203
	<i>Conditional Proof Rule</i>	211
	<i>Reductio ad Absurdum Rule</i>	214
	<i>Consistency of Premisses</i>	218
10.	Traditional Syllogistic Logic	223
	<i>Categorical Sentences</i>	223
	<i>Disguised Categorical Sentences</i>	228
	<i>Syllogisms</i>	231
	<i>Testing Syllogisms</i>	235
	<i>Immediate Inferences</i>	245
	<i>Syllogistic Chains (Sorites) and Enthymemes</i>	250
	<i>Boolean Algebra</i>	255
11.	Predicate Logic	259
	<i>Singular and General Sentences</i>	260
	<i>Categorical and Other General Sentences</i>	263
	<i>Valid Monadic Predicate Argument Patterns</i>	268
	<i>Reductio ad Absurdum Test for Monadic Predicate Arguments</i>	270
	<i>Quantifier Rules for Monadic Predicate Logic</i>	276
	<i>Relational Predicate Logic</i>	284

12.	Axioms	291
	<i>Truths of Logic</i>	292
	<i>Axioms for Sentential Logic</i>	296
	<i>Some Theorems of PM</i>	300
	<i>Consistency of PM</i>	305
	<i>Independence of the Axioms of PM</i>	307
	<i>Completeness of PM</i>	309
<b>Part III. The Logical Structure of Science</b>		
13.	Science and Hypotheses	317
	<i>Four Episodes from the History of Science</i>	318
	<i>Empirical and Theoretical Hypotheses, Theories, and Laws</i>	327
	<i>Induction and Deduction</i>	330
	<i>Summary</i>	334
14.	Crucial Experiments and Inductive Techniques	342
	<i>Crucial Experiments and Empirical Hypotheses</i>	342
	<i>Crucial Experiments and Theoretical Hypotheses</i>	343
	<i>"Death Blows"</i>	345
	<i>Fact of the Cross</i>	347
	<i>Summary</i>	348
	<i>Traditional Inductive Techniques and Correct Inductive</i>	
	<i>Arguments</i>	352
	<i>Summary</i>	362
15.	Patterns of Scientific Explanation	367
	<i>Deductive Explanations</i>	367
	<i>Probabilistic Explanations</i>	372
	<i>Historical Explanations</i>	373
	<i>Functional Explanations</i>	375
	<i>Empathetic Explanations</i>	376
	<i>Summary</i>	378
	<i>Genuine and Pseudoscientific Explanations</i>	386
	<i>Satisfactory and Unsatisfactory Explanations</i>	395
	<i>Summary</i>	397
16.	Probability	404
	<i>Four Problems in Probability Theory</i>	405
	<i>The Calculus of Probability</i>	410
	Name Index	417
	Subject Index	421
