Preface	xv
Foreword	xxi
1. Building Web Apps with WordPress	1
What Is a Website?	1
What Is an App?	1
What Is a Web App?	1
Features of a Web App	2
Why Use WordPress?	3
You Are Already Using WordPress	4
Content Management Is Easy with WordPress	4
User Management Is Easy and Secure with WordPress	4
Plugins	5
Flexibility Is Important	5
Frequent Security Updates	6
Cost	6
.NET App	6
WordPress App	7
Responses to Some Common Criticisms of WordPress	7
When Not to Use WordPress	10
You Plan to License or Sell Your Site's Technology	10
There Is Another Platform That Will Get You "There" Faster	10
Flexibility Is NOT Important to You	11
Your App Needs to Be Highly Real Time	11
WordPress as an Application Framework	11
WordPress Versus MVC Frameworks	12
Anatomy of a WordPress App	15
What Is SchoolPress?	15
SchoolPress Runs on a WordPress Multisite Network	15

The SchoolPress Business Model	15
Membership Levels and User Roles	16
Classes Are BuddyPress Groups	16
Assignments Are a Custom Post Type	16
Submissions Are a (Sub)CPT for Assignments	17
Semesters Are a Taxonomy on the Class CPT	17
Departments Are a Taxonomy on the Class CPT	17
SchoolPress Has One Main Custom Plugin	17
SchoolPress Uses a Few Other Custom Plugins	18
SchoolPress Uses the StartBox Theme Framework	18
2. WordPress Basics.....	21
WordPress Directory Structure	21
Root Directory	22
/wp-admin	22
/wp-includes	22
/wp-content	22
WordPress Database Structure	23
wp_options	23
Functions Found in /wp-includes/option.php	24
wp_users	26
Functions Found in /wp-includes/...	27
wp_usermeta	30
wp_posts	34
Functions found in /wp-includes/post.php	34
wp_postmeta	38
Functions Found in /wp-includes/post.php	38
wp_comments	42
Functions Found in /wp-includes/comment.php	42
wp_commentsmeta	46
Functions Found in /wp-includes/comment.php	47
wp_links	49
wp_terms	50
Functions Found in /wp-includes/taxonomy.php	50
wp_term_taxonomy	53
/wp-includes/taxonomy.php	53
wp_term_relationships	54
Extending WordPress	55
3. Leveraging WordPress Plugins.....	57
The GPLv2 License	58
Installing WordPress Plugins	58

Building Your Own Plugin	59
File Structure for an App Plugin	60
/adminpages/	61
/classes/	61
/css/	62
/js/	63
/images/	63
/includes/	63
/includes/lib/	64
/pages/	64
/services/	65
/scheduled/	65
/schoolpress.php	65
Add-Ons to Existing Plugins	66
Use Cases and Examples	66
The WordPress Loop	66
WordPress Global Variables	67
Action Hooks	77
Filters	78
Free Plugins	79
All in One SEO Pack	79
BadgeOS	79
Custom Post Type UI	80
Posts 2 Posts	80
Members	81
W3 Total Cache	81
Premium Plugins	81
Gravity Forms	81
Backup Buddy	82
WP All Import	82
Community Plugins	82
BuddyPress	82
4. Themes.....	95
Themes Versus Plugins	95
When Developing Apps	95
When Developing Plugins	96
When Developing Themes	97
The Template Hierarchy	97
Page Templates	99
Sample Page Template	99
Using Hooks to Copy Templates	102

When to Use a Theme Template	103
Theme-Related WP Functions	103
Using locate_template in Your Plugins	104
Style.css	106
Versioning Your Theme's CSS Files	106
Functions.php	108
Themes and Custom Post Types	108
Popular Theme Frameworks	108
WP Theme Frameworks	109
Non-WP Theme Frameworks	110
Creating a Child Theme for StartBox	111
Including Bootstrap in Your App's Theme	111
Menus	113
Nav Menus	113
Dynamic Menus	114
Responsive Design	115
Device and Display Detection in CSS	115
Device and Feature Detection in JavaScript	116
Device Detection in PHP	118
Final Note on Browser Detection	122
Versioning CSS and JS Files	123
5. Custom Post Types, Post Metadata, and Taxonomies.....	125
Default Post Types and Custom Post Types	125
Page	125
Post	125
Attachment	126
Revisions	126
Nav Menu Item	126
Defining and Registering Custom Post Types	126
register_post_type(\$post_type, \$args);	127
What Is a Taxonomy and How Should I Use It?	135
Taxonomies Versus Post Meta	135
Creating Custom Taxonomies	137
register_taxonomy(\$taxonomy, \$object_type, \$args)	137
register_taxonomy_for_object_type(\$taxonomy, \$object_type)	141
Using Custom Post Types and Taxonomies in Your Themes and Plugins	141
The Theme Archive and Single Template Files	142
Good Old WP_Query and get_posts()	142
Metadata with CPTs	145
add_meta_box(\$id, \$title, \$callback, \$screen, \$context, \$priority, \$callback_args)	146

Custom Wrapper Classes for CPTs	148
Extending WP_Post Versus Wrapping It	150
Why Use Wrapper Classes?	151
Keep Your CPTs and Taxonomies Together	151
Keep It in the Wrapper Class	152
Wrapper Classes Read Better	154
6. Users, Roles, and Capabilities.....	155
Getting User Data	156
Add, Update, and Delete Users	158
Hooks and Filters	161
What Are Roles and Capabilities?	162
Checking a User's Role and Capabilities	163
Creating Custom Roles and Capabilities	164
Extending the WP_User Class	166
Adding Registration and Profile Fields	168
Customizing the Users Table in the Dashboard	172
Plugins	174
Theme My Login	174
Hide Admin Bar from Non-Admins	174
Paid Memberships Pro	174
PMPro Register Helper	174
Members	175
7. Other WordPress APIs, Objects, and Helper Functions.....	177
Shortcode API	177
Shortcode Attributes	178
Nested Shortcodes	179
Removing Shortcodes	180
Other Useful Shortcode-Related Functions	180
Widgets API	181
Before You Add Your Own Widget	182
Adding Widgets	182
Defining a Widget Area	186
Embedding a Widget Outside of a Dynamic Sidebar	188
Dashboard Widgets API	188
Removing Dashboard Widgets	189
Adding Your Own Dashboard Widget	191
Settings API	193
Do You Really Need a Settings Page?	194
Could You Use a Hook or Filter Instead?	194
Use Standards When Adding Settings	196

Ignore Standards When Adding Settings	196
Rewrite API	197
Adding Rewrite Rules	198
Flushing Rewrite Rules	199
Other Rewrite Functions	200
WP-Cron	202
Adding Custom Intervals	204
Scheduling Single Events	204
Kicking Off Cron Jobs from the Server	205
Using Server Crons Only	206
WP Mail	207
Sending Nicer Emails with WordPress	207
File Header API	209
Adding File Headers to Your Own Files	211
Adding New Headers to Plugins and Themes	212
8. Secure WordPress.....	215
Why It's Important	215
Security Basics	216
Update Frequently	216
Don't Use the Username "admin"	216
Use a Strong Password	217
Examples of Bad Passwords	217
Examples of Good Passwords	218
Hardening Your WordPress Install	218
Don't Allow Admins to Edit Plugins or Themes	218
Change Default Database Tables Prefix	218
Move wp-config.php	219
Hide Login Error Messages	220
Hide Your WordPress Version	220
Don't Allow Logins via wp-login.php	221
Add Custom .htaccess Rules for Locking Down wp-admin	221
Backup Everything!	222
Scan Scan Scan!	223
Useful Security Plugins	223
Spam-Blocking Plugins	223
Backup Plugins	224
Scanner Plugins	224
Login and Password-Protection Plugins	225
Writing Secure Code	225
Check User Capabilities	226
Custom SQL Statements	227

Data Validation, Sanitization, and Escaping	227
Nonces	232
9. JavaScript, jQuery, and AJAX.....	237
What Is AJAX?	237
What Is JSON?	237
jQuery and WordPress	238
Enqueuing Other JavaScript Libraries	238
Where to Put Your Custom JavaScript	239
AJAX Calls with WordPress and jQuery	240
Managing Multiple AJAX Requests	244
Heartbeat API	246
Initialization	246
Client-side JavaScript	247
Server-side PHP	248
Initialization	248
Client-side JavaScript	249
Server-side PHP	250
WordPress Limitations with Asynchronous Processing	251
Backbone.js	251
10. XML-RPC.....	255
wp.getUsersBlogs	255
wp.getPosts	256
wp.getPost	257
wp.newPost	259
wp.editPost	259
wp.deletePost	260
wp.getTerms	261
wp.getTerm	261
wp.newTerm	262
wp.editTerm	263
wp.deleteTerm	263
wp.getTaxonomies	263
wp.getTaxonomy	264
wp.getUsers	264
wp.getUser	265
wp.getProfile	265
wp.editProfile	266
wp.getCommentCount	266
wp.getPageTemplates	267
wp.getOptions	267

wp.setOptions	267
wp.getComment	268
wp.getComments	269
wp.deleteComment	269
wp.editComment	270
wp.newComment	270
wp.getMediaLibrary	271
wp.getMediaItem	271
wp.uploadFile	272
wp.getPostFormats	273
wp.getPostType	273
wp.getPostTypes	273
11. Mobile Apps with WordPress.....	275
App Wrapper	275
iOS Applications	275
Enrolling as an Apple Developer	276
Building Your App with Xcode	277
App Distribution	280
iOS Resources	280
Android Applications	281
AndroidManifest.xml	282
activity_main.xml	283
Creating an APK file	284
Getting Your App on Google Play	285
Android Resources	285
Extend Your App	285
AppPresser	286
Mobile App Use Cases	286
12. PHP Libraries, External APIs, and Web Services.....	289
Imagick	290
MaxMind GeoIP	290
Google Maps JavaScript API v3	292
Directions	293
Distance Matrix	293
Elevation	293
Geocoding	293
Street View Service	293
Practical App	293
Google Translate	296
Google+	297

People	297
Activities	297
Comments	297
Moments	297
Amazon Product Advertising API	298
Request Parameters	298
Operations	299
Response Groups	300
Twitter REST API v1.1	301
Set Up Your App on Twitter.com	302
Leverage a PHP Library	303
Facebook	304
Pictures	304
Search	305
Permissions	305
Building an Application	306
Leverage What's Out There	306
Twilio	306
Microsoft Sharepoint	307
We Missed a Few	309
13. Building WordPress Multisite Networks.....	311
Why Multisite?	311
Setting Up a Multisite Network	312
Managing a Multisite Network	313
Dashboard	314
Sites	314
Users	314
Themes	315
Plugins	315
Settings	316
Updates	317
Multisite Database Structure	317
Network-Wide Tables	317
Individual Site Tables	319
Shared Site Tables	320
Multisite Plugins	320
WordPress MU Domain Mapping	320
Blog Copier	321
More Privacy Options	321
Multisite Global Search	321
Multisite Robots.txt Manager	321

Basic Multisite Functionality	321
\$blog_id	321
is_multisite()	322
get_current_blog_id()	322
switch_to_blog(\$new_blog)	322
restore_current_blog()	323
get_blog_details(\$fields = null, \$get_all = true)	323
update_blog_details(\$blog_id, \$details = array())	325
get_blog_status(\$id, \$pref)	325
update_blog_status(\$blog_id, \$pref, \$value)	325
get_blog_option(\$id, \$option, \$default = false)	326
update_blog_option(\$id, \$option, \$value)	326
delete_blog_option(\$id, \$option)	327
get_blog_post(\$blog_id, \$post_id)	327
add_user_to_blog(\$blog_id, \$user_id, \$role)	327
create_empty_blog(\$domain, \$path, \$weblog_title, \$site_id = 1)	328
Functions We Didn't Mention	328
14. Localizing WordPress Apps.....	329
Do You Even Need to Localize Your App?	329
How Localization Is Done in WordPress	330
Defining Your Locale in WordPress	330
Prepping Your Strings with Translation Functions	331
__(\$text, \$domain = "default")	331
_e(\$text, \$domain = "default")	331
_x(\$text, \$context, \$domain = "default")	332
_ex(\$title, \$context, \$domain = "default")	333
Escaping and Translating at the Same Time	333
Creating and Loading Translation Files	333
Our File Structure for Localization	334
Generating a .pot File	335
Creating a .po File	336
Creating a .mo File	337
Loading the Textdomain	337
Localizing Nonstring Assets	339
15. Ecommerce.....	341
Choosing a Plugin	341
Shopping Cart Plugins	341
Membership Plugins	343
Digital Downloads	344
Payment Gateways	344

Merchant Accounts	345
SSL Certificates and HTTPS	346
Installing an SSL Certificate on Your Server	346
SSL with Paid Memberships Pro	348
SSL with Jigoshop	349
WordPress Login and WordPress Admin over SSL	350
WordPress Frontend over SSL	350
SSL on Select Pages	351
Avoiding SSL Errors with the “Nuclear Option”	355
Setting Up Software as a Service (SaaS) with Paid Memberships Pro	357
The Software as a Service Model	357
Step 0: Figure Out How You Want to Charge for Your App	357
Step 1: Installing and Activating Paid Memberships Pro	358
Step 2: Setting Up the Level	359
Step 3: Setting Up Pages	361
Step 4: Payment Settings	362
Step 5: Email Settings	363
Step 6: Advanced Settings	364
Step 7: Locking Down Pages	365
Step 8: Customizing Paid Memberships Pro	367
16. WordPress Optimization and Scaling.	377
Terms	377
Origin Versus Edge	378
Testing	379
What to Test	379
Chrome Debug Bar	381
Apache Bench	384
Siege	390
Blitz.io	391
W3 Total Cache	391
Page Cache Settings	393
Minify	395
Database Caching	395
Object Cache	395
CDNs	396
GZIP Compression	396
Hosting	396
WordPress-Specific Hosts	397
Rolling Your Own Server	397
Selective Caching	410
The Transient API	411

Multisite Transients	414
Using JavaScript to Increase Performance	414
Custom Tables	416
Bypassing WordPress	418
Index.....	419
