

Table of Contents

Introduction	11
What is E-Prime® and what will I learn?	11
Why should I learn E-Prime®?	12
Online support	12
Chapter I: E-Prime® at a glance	15
E-Studio, E-DataAid, E-Recovery and E-Merge	15
Object Oriented Programming	17
Conceptualising an experiment	19
E-Studio's structure	22
E-Objects	24
Procedures, Lists and TextDisplays	25
TextDisplays	26
Tutorial I: A simple RT experiment	36
Exercises	41
Advanced Exercises	43
Chapter II: Attributes, Slides and more on Lists	45
Experimental design in E-Prime®	46
More on lists	47
Showing an image	53
Showing multiple images and layers of texts	56
Feedback	56
Tutorial II: The Simon Task	58
Exercises	62
Tutorial III: Implicit Association Task	62
Exercises	64
Advanced Exercises	65

Chapter III: Sound, movies, hardware, and nested Lists	67
SoundOut objects and digital audio	68
MovieDisplay object	73
Wait object	74
Labels	75
Experiment properties	76
Nested Lists	79
Counterbalancing and between-subject manipulations	80
Tutorial IV: Visual search and distracting sound	81
Exercises	86
Tutorial V: Ego depletion experiment	87
Exercises	88
Advanced excercises	89
Chapter IV: Beginning programming in E-Prime®	91
E-Basic in E-Prime®	92
Different types of variables	93
Math operators	95
Mathematical functions	98
Combining numbers and text	98
String functions	100
Linking variables to input/output windows	101
Linking variables to attributes	103
Inlines everywhere	105
Tutorial VI: A working memory test	108
Exercises	111
Advanced excercises	111
Chapter V: Decision making in E-Basic	113
The If-Then statement	113
Combining conditional expressions	115
Comparing values	118
How to terminate parts of your experiment	119
Tutorial VII: The Ultimatum game	121
Tutorial VIII: The Cyberball game	128
Exercises	134
Advanced excercises	134

Chapter VI: Loops and Arrays in E-Basic	137
Looping with Labels	137
The For-Next Loop	139
Loops with conditional expressions	141
Lists and arrays	143
Arrays of a user-defined data type	149
Tutorial IX: Quasi-random trial selection	150
Exercises	159
Advanced exercises	159
Chapter VII	161
Interactions between Slide objects and the Mouse	161
The Slide object	162
Accessing the mouse in E-Prime®	165
Programming user interactions	166
Tutorial X: A simple questionnaire	169
Tutorial XI: A mouse tracking task	172
Exercises	175
Advanced exercises	176
Chapter VIII: Various Input/Output devices	179
The Serial-Response box	180
Voice-key experiments	182
Sending signals using the parallel port	185
Reading and writing text files	190
Tutorial XII: Making a Voicekey (VK) test program	192
Exercises	194
Advanced Exercises	194
Reference List	197
Appendix: Overview of available E-Objects	199
About the authors	201
Index	203
