PART I

PHILOSOPHY: ITS SUBJECT MATTER, METHOD, AND UTILITY

CHAPTER

1. METAPHYSICS, KNOWLEDGE, AND THE MIND-BODY PROBLEM.. 3
 1. The genuine problems of metaphysics important and solvable. 2. Philosophy a search for knowledge, hence by intent a science. 3. Defects of method in philosophical inquiries. 4. Need for empirical verification of philosophical hypotheses. 5. Two maxims of scientific method in philosophy.

2. THE PROBLEMS OF ANY SCIENCE..... 13
 1. The logical movement and structure of a science. 2. What constitutes the "subject matter" of a science? 3. Problems "for" and problems "of" a science. 4. What is a "practical" problem? 5. Two possible confusions. 6. "Subject matter" ultimately defined in terms of the primitive facts of a science.

3. THE PRACTICAL PROBLEMS OF PHILOSOPHY..... 27
 1. What kind of practical problems are problems for philosophy? 2. Spontaneous resort to philosophical reflection. 3. Examples of practical problems "for" philosophy. 4. The major and minor branches of philosophy. 5. The practical function of theory essentially the same in philosophy as elsewhere. 6. Philosophy and wisdom. 7. "Problems of men" and "problems of philosophers."

CHAPTER	PAGE
4. THE THEORETICAL PROBLEMS OF PHILOSOPHY.....	36
1. The primitive problems of philosophy. 2. The subject matter ultimately distinctive of philosophy. 3. Conditions under which conflicts of evaluation can be settled rationally. 4. The two directions in which philosophical reflection proceeds. 5. The derivative problems of philosophy.	
5. THE METHOD OF KNOWLEDGE IN PHILOSOPHY.....	51
1. The theoretical problems of philosophy essentially semantical. 2. Philosophical problems solved when purged of semantical obscurity. 3. Scientific method in semantical inquiry. 4. Do semantical discoveries have extralinguistic import?	
6. PHILOSOPHICAL METHOD, REALITY, AND THE MIND-BODY PROBLEM.....	62
1. Some formulations of the problem as to the nature of reality. 2. Need to specify the data of the problem. 3. Some technical senses of "real." 4. What it means to be "really" of a kind K. 5. "Really" as qualifying "exists." 6. What it means "to exist." 7. The question as to what water "really" is. 8. Ontological "positions" distinguished from ontological hypotheses. 9. Some objections considered. 10. Is there still another "problem of reality"? 11. The mind-matter and mind-body problems.	

PART II

FUNDAMENTAL CATEGORIES

7. CAUSALITY: CRITIQUE OF HUME'S ANALYSIS.....	91
1. Hume's skepticism. 2. Hume's analysis of causality. 3. Hume's analysis fails to fit some of the facts. 4. Hume on ascertainment of causation by a single experiment. 5. Hume's "Rules by which to judge of causes and effects."	
8. ANALYSIS OF THE CAUSAL RELATION.....	101
1. The principal questions concerning the causal relation. 2. The data of the problem as to the nature of causality. 3. Definition of causality in terms of the factors of experiments. 4. Etiological necessity distinguished from logical.	

CHAPTER	PAGE
5. Is causation observable? 6. Causality a relation between concrete individual events. 7. Ambiguity of "the cause of an event." 8. Pragmatic interest in causal connections. 9. Causality distinct from legality. 10. Causality not a two-term relation. 11. Causes distinguished from agents and from forces. 12. The relations of events to "times." 13. Contiguity, or action at a distance? 14. Causation and transfer of energy. 15. Causation, volition, and compulsion. 16. Causation, mechanism, and telism. 17. Summary.	
9. THE UNIVERSALITY AND UNIFORMITY OF CAUSATION.....	150
1. The universality of causation. 2. The uniformity of causation. 3. The principle of "uniformity of nature" as employed in prediction.	
10. CAUSALITY, SUBSTANCES, PROPERTIES, AND EVENTS.....	161
1. Data of the problem of the nature of substance. 2. An implication of the data of the problem. 3. Substances, properties, and qualities. 4. The parts of a substance. 5. Existence of instances of a substance. 6. Uniformity of causation and the nature of substances.	
11. CAUSALITY, DETERMINISM, AND FREEDOM.....	174
1. Determinism as universality of causation. 2. Fatalism. 3. Determinism as theoretically universal predictability. 4. Predictive inference, prescription, and prevision. 5. "Indeterminacy" and freedom. 6. Determinism as denial of free will. 7. Freedom to act as one wills. 8. Meaning of "I can." 9. Activities, volitions, acts, and deeds. 10. Freedom to will. 11. Freedom, and determination of a volition by an anterior volition. 12. Free will as undetermined volition. 13. Responsibility, and determination of volitions by circumstances. 14. Freedom of "self-determination." 15. Freedom of choice. 16. Is freedom ever compatible with compulsion? 17. Does antecedent external determination of one's volitional nature negate freedom? 18. Does the possibility of inference predictive of human acts negate freedom? 19. Does the possibility of veridical preperception of human acts negate freedom? 20. Summary of Conclusions.	

PART III

NATURE, MATTER, AND MINDS

CHAPTER	PAGE
12. NATURE, MATTER, AND MIND AS BEHAVIOR.....	219
1. Naturalism, materialism, and behaviorism. 2. Singer and Stevens on mind conceived as behavior. 3. The naturalistic "meaning" of a language response. 4. Mind vs. the behavior of bodies that have minds. 5. Arbitrariness of the behavioristic definition of "mind." 6. The natural-scientific definition of "mind" dictated only by a certain ontological position. 7. The behavioristic definition of "introspection." 8. Observed psychological events vs. postulated brain traces. 9. The conservation of energy. 10. Dewey on how mind is to be known.	
13. THE RELATION OF SENSU TO SENSING.....	246
1. Moore's "Refutation of Idealism." 2. Moore's argument. 3. Alexander's proposed criterion of the mental. 4. Cognate vs. objective accusatives. 5. Accusatives coordinate or subordinate in generality to a given process. 6. Existence of an accusative connate with a given process possible only in occurrence of the process. 7. Existence of a cognitum connate with the cognizing thereof possible only in the cognizing. 8. The hypothesis to be opposed to Moore's. 9. The objection that what is sensed is not "blue" but a case of "blue." 10. The objection that one may be aware without being aware that one is aware. 11. Moore's criticism of the hypothesis that blue is "content" of the sensing of blue. 12. Does existential independence follow from the fact that the awareness is of blue? 13. Does existential independence follow from the introspective distinguishability of the awareness from the blue? 14. Comment on some relevant remarks of Broad's. 15. The hypothesis that bitter, blue, etc., are "directly present" to the mind. 16. Taste a species, not an object, of experience. 17. Bitter a species, not an object, of taste. 18. Linguistic inertia responsible for the error that taste is object of experience. 19. "Bitter" as name of a species of taste, vs. as name	

CHAPTER	PAGE
of a property of some substances. 20. Special sources of confusion when visual sensa are taken as examples. 21. Summary of the argument. 22. Moore's allegation that the argument does not prove its contention. 23. The problem of the speckled hen.	
14. WHAT IS MENTAL?.....	291
1. The basic criterion of the mental. 2. Intuition, introspection, inspection, and sensations. 3. The possibility of introspective analysis. 4. Epistemological introspection. 5. The allegation of direct acquaintance with "universals." 6. Mental objects.	
15. OBJECTIVE REFERENCE, OBJECTS, AND THE PERCEPTION OF NATURE	304
1. Some statements of the problem of objective reference. 2. The proper statement of the problem. 3. Two possible objections to the proposed formulation of the problem. 4. Removal of some possible sources of confusion. 5. Intuited time. 6. Objective reference in the remembrance or expectation of mental events. 7. Remarks on method, relevant to the discussion of space intuitions. 8. Space in terms of tactual intuition. 9. Comments on James's criticism of Wundt's theory of space perception. 10. Physical objectivity in tactual terms. 11. Perception of physical events. 12. Perception of physico-psychical properties, and of physical substance. 13. Perception of physico-physical properties. 14. Which perceived body is "our own"? 15. Physical places of origin. 16. Enrichment of the tactually perceived physical world on the basis of intuitions other than tactual. 17. Space in terms of visual intuitions. 18. Intuition of color without place or extent. 19. Physical objectivity in visual and other terms. 20. Visual identification of the body we call "our own." 21. "Sameness" of something visually perceived and something tactually perceived. 22. Externality to our body and externality to our mind. 23. Fourfold classification of "real" properties. 24. Epistemic status of the analyses offered in this chapter.	

CHAPTER	PAGE
16. THE MENTAL OPERATIONS.....	354
1. Mental operations. 2. Interpretation. 3. Interpretation of perceptions distinguished from interpretation in perception. 4. Interpretation—ideative, affective, or conative. 5. Interpretation an irreducibly tetradic affair. 6. Semeiotic interpretation. 7. Signs. 8. Symbols. 9. Signals. 10. Discursive entities. 11. Verbal and real interpretands. 12. Technical and nontechnical terms. 13. Four types of semeiotic interpretation. 14. Rei-real interpretation: Perceiving, imagining, remembering. 15. Rei-verbal interpretation: Formulating, describing, counting. 16. Verbo-real and verbo-verbal interpretation: Understanding words, calculating. 17. Discovery vs. prescription of the meaning of words. 18. Abstract ideas and "notional understanding." 19. Perceiving, conceiving, imagining. 20. Merits and defects of notional and of verbal understanding of words. 21. Conditions under which verbo-verbal operations can substitute for rei-real ones. 22. The main branches of general hermeneutics.	
17. THE SUBSTANTIALITY OF MINDS.....	400
1. Mind as a substance. 2. Determinable and determinate kinds of mind. 3. What constitutes existence of a mind of a given determinate kind. 4. The stream of intuitions. 5. Why no two minds can have the same history. 6. Location of minds in psychical "Space" and "Time." 7. The parts of minds. 8. Molecular minds. 9. The species of consciousness.	

PART IV

THE MIND-BODY RELATION AND THE POSSIBILITY OF A LIFE AFTER DEATH

18. THE MIND-BODY RELATION.....	423
1. Which human body is one's own? 2. Mind-body interaction analytically true. 3. The alleged mysteriousness of psycho-physical interaction. 4. The basic relation between a mind and its body. 5. Media of action and of response. 6. Purposiveness vs. feed-back mechanism. 7. The body as proxi-	

CHAPTER	PAGE
mate physical medium of extra-somatic interaction. 8. The body an integrative medium. 9. The body as "vehicle" of the mind.	
19. THE CASE AGAINST THE POSSIBILITY OF SURVIVAL.....	444
1. Why belief in survival is easy and widespread. 2. The hypothesis of survival logically independent of the hypothesis that a God exists. 3. The case against the possibility of survival. 4. Critique of the case against the possibility of survival. 5. What accounts for the <i>prima facie</i> plausibility of the arguments against the possibility of survival.	
20. THE CASE FOR THE POSSIBILITY OF SURVIVAL.....	464
1. Credulity and credibility, incredulity and incredibility. 2. The empirical evidence for the possibility of survival. 3. Critique of the empirical evidence for survival.	
21. SOME THEORETICALLY POSSIBLE FORMS OF SURVIVAL.....	484
1. Status of the descriptions to follow, of possible forms of survival. 2. The simplest theoretically possible form of survival. 3. Survival as dream consciousness. 4. Survival consciousness as reflective reminiscence. 5. Survival as critically controlled creative imagination. 6. Survival as including objective experience and activity. 7. Survival as transmigration. 8. Examination of the transmigration hypothesis.
