

TABLE OF CONTENTS

INTRODUCTION	v
CHAPTER I: THE IDEAL OF RATIONALITY	1
1. Physical and Regulative Ideals	1
2. Rational Belief Systems	5
3. The Ideal of Completability	9
4. P-Completability	12
5. The Logical Correspondence Principle	16
CHAPTER II: THE LAWS OF RATIONALITY	21
1. Critique of Classical Semantics	21
2. New Foundations for Logical Systems	27
3. Sentential Calculus	30
4. The Modal Sentential Calculi	32
5. First-Order Predicate Calculus	37
6. Other Developments	39
7. Logic and Psychology	42
CHAPTER III: THE LAWS OF HYPOTHETICAL REASONING	48
1. Objections to "Possible Worlds" Semantics for Counterfactuals	49
2. Languages with Conditionals	54
3. Indicative and Subjunctive Conditionals	60
4. Simplification of Disjunctive Antecedents	69
5. The Probability of Conditionals	75
CHAPTER IV: THE DYNAMICS OF BELIEF SYSTEMS	84
1. Inductive Scepticism	85
2. On Vindicating Induction	86
3. The Importance of Theories	92
4. Laws of Inductive Projection	95
CONCLUSION	100
