<i>Preface</i>	xiii
Introduction	1
Pragmatics and the calculus conception of language	1
Aims and methods of the investigation	6
The use of examples	9
PART I DEIXIS	
1 Language and Context	15
1.1 Deixis and the notion of language as an autonomous system	15
1.2 The linguistic perspective in pragmatics	17
1.3 The mastery of language involves the mastery of activities of life: an example	18
1.4 How time-expressions have meaning	20
1.5 To ascribe meaning is to establish a practice	22
1.6 Concluding remarks	24
2 The Pragmatic Account of Deixis	25
2.1 The notion of grammaticalization	25
2.2 The pragmatic account of deixis projects the general description of a speech event onto the actual event	27
2.3 Similar accounts of deixis in philosophy	28
2.4 Concluding remarks	30
3 Context-Dependence	31
3.1 The pragmatic notion of the difference between deictic and non-deictic expressions	31
3.2 The way time-expressions refer depends internally on the organization of the context	32
3.3 Effects of linguistically based methods of observation: the case of disambiguation	35

3.4	Effects of linguistically based methods of observation: the case of the compositional nature of meaning	37
3.5	Explanation of the phenomenon of context-dependence and other forms of functional dependence	39
3.6	A notion of context-dependence contingent on a misuse of linguistic terminology	40
3.7	Using ordinary things in communication	41
3.8	Concluding remarks	43
4	Ironical Use of Indexical Expressions	45
4.1	The pragmatic conception of irony	45
4.2	The utterance of a word is a part of a way of acting	46
4.3	Meaning and established uses of words	47
4.4	Irony is a modified language game	48
4.5	Concluding remarks	49
 PART II CONVERSATIONAL IMPLICATURE		
5	The Semantic Reading and Conversational Implicature	53
5.1	Meaning more than we actually say	53
5.2	The semantic reading is a technique of paraphrase	54
5.3	The pragmatic notion of conversational implicature	58
5.4	Some examples of how the theory of implicature works	62
5.5	Defeasibility of implicatures	64
5.6	Concluding remarks	65
6	Literal Meaning	66
6.1	Literal meaning: an instinctive attitude toward the semantic reading	66
6.2	Distinct uses of one sentence	67
6.3	The notion of literal meaning condenses distinct uses into one paraphrase	68
6.4	Does use follow from meaning?	70
6.5	Meaning is not grounded in linguistic structure	73
6.6	Concluding remarks	75

7	The Pragmatic Notion of Order	76
7.1	The conceptual possibility of a reversed order of events	76
7.2	How order in language is determined	78
7.3	Can there be an independently defined notion of the order in language?	80
7.4	The difference between explaining particular acts of language use and explaining the phenomenon of language use in general	82
7.5	Concluding remarks	83
8	General Principles of Rationality as a Basis for Language Use	84
8.1	The semantic reading is responsible for the phenomenon of 'meaning more than we actually say'	84
8.2	The maxims of Quantity and Relevance, and the language game of evidence	86
8.3	The maxim of Relevance and the use of a simple imperative	88
8.4	The maxim of Quality and the idea of a general notion of Truth	90
8.5	The notions of rationality and cooperation cannot ground our conduct	92
8.6	Meaning-inferences	97
8.7	Concluding remarks	98
9	Formal Pragmatics	99
9.1	On some prevailing motives for formalization	99
9.2	The calculus conception of the process of language use	100
9.3	On the formal treatment of scalar implicatures	101
9.4	Remarks on the applicability of the formal theory	104
9.5	Concluding remarks	106

PART III SPEECH ACTS

10	The Speaker–Hearer Scheme of Communication	109
10.1	Two approaches to meaning and communication	109
10.2	The speaker–hearer scheme	113

10.3	The method of philosophical analysis employed in speech-act theory defines the notions of communication in a logically reversed order	117
10.4	Concluding remarks	119
11	Speech Acts versus Language Games	120
11.1	John R. Searle's conception of the problem of communication and its solution	120
11.2	The notion of a request is the notion of one move within a language game	122
11.3	Remarks on the investigation of the game of requesting and passing toys	126
11.4	The idea that speech acts are effect-independent	128
11.5	Investigation of an intuitive justification of the speech-act conception of requests	131
11.6	Remark on the notions of meaning and understanding	133
11.7	Concluding remarks	135
12	Language vs Languages and Philosophy vs Linguistics	136
12.1	Searle's conception of the relationship between language in general and particular languages: conventional realization of underlying rules	136
12.2	A comparison: road signs	139
12.3	First language learning versus second language learning	143
12.4	If use is all that matters, why can I not invent words and expressions at the moment of speaking?	145
12.5	A problem caused by a misuse of the linguistic notion of particular languages: the problem of linguistic relativity	147
12.6	Philosophy versus linguistics	150
12.7	Concluding remarks	152
13	Intentions and Beliefs as Conditions for Use	153
13.1	The role of beliefs in making statements	
13.2	Searle's explanation of Moore's paradox	
13.3	Statements cannot be divided exhaustively into sincere and insincere statements: the normal use of ordinary sentences is neither sincere nor insincere	158

13.4	The role of intentions in making promises: speaker's intention to place himself under an obligation	161
13.5	The role of intentions in communication: Grice's analysis of meaning in terms of communicative intentions	165
13.6	Concluding remarks	169
14	The Semantic Reading and the Notion of Indirect Speech	171
14.1	The notion of indirect speech in speech-act theory is a technical notion	171
14.2	Inventing different readings: the game of indirectness	172
14.3	The facts of use which the game of indirectness draws on	174
14.4	The differences between inventing readings in the game of indirectness and the employment of the semantic reading in semantics and pragmatics	176
14.5	An example of how the semantic reading misconstrues forms of use as indirect: metaphor	178
14.6	The relationship between the practice of semantic reading and theories of meaning	179
14.7	Indirect speech acts and idioms	181
14.8	Concluding remarks	
 PART IV PRESUPPOSITION		
15	The Notion of Presupposition in Pragmatics	185
15.1	Presuppositions as background assumptions about the context	185
15.2	The identification of presuppositions in linguistic tests	186
15.3	Pragmatic versus semantic conceptions of presupposition	188
15.4	Concluding remarks	190
16	Presuppositions and Methods of Linguistics	191
16.1	Description of a language game	191
16.2	A formal notion of precondition	193
16.3	A precondition for a linguistic practice belongs to the practice as a whole	195

16.4	Making inferences from isolated verbal utterances	197
16.5	Linguists 'overhearing' language use	198
16.6	The idea that presuppositions are inferences about the context	200
16.7	The idea that presuppositions are merely assumed to be true	202
16.8	The idea that utterances are inappropriate if the presuppositions are not mutually known	206
16.9	Concluding remarks	208
17	Defeasibility and the Projection Problem	209
17.1	Examples of the property of defeasibility	209
17.2	The identification of the phenomenon of defeasibility is contingent upon a general way of reading presupposition triggers	210
17.3	Investigation of the examples: the first example	211
17.4	Remarks on the second example	213
17.5	Remarks on the third example	214
17.6	Remarks on the fourth example	214
17.7	Inferences from linguistic data versus features of actual use	215
17.8	The projection problem	216
17.9	Concluding remarks	217
	<i>Notes and References</i>	219
	<i>Bibliography</i>	227
	<i>Index</i>	231
