<i>Preface</i>	page vii
<i>Introduction</i>	ix
<i>List of participants</i>	x
<i>Trimester Seminar</i>	xiii
<i>Workshop on Serre's conjecture</i>	xxiii
<i>The research conference</i>	xxviii
1 Galois groups of local fields, Lie algebras and ramification	1
<i>Victor Abrashkin</i>	
2 A characterisation of ordinary modular eigenforms with CM	24
<i>Rajender Adibhatla and Panagiotis Tsaknias</i>	
3 Selmer complexes and p-adic Hodge theory	36
<i>Denis Benois</i>	
4 A survey of applications of the circle method to rational points	89
<i>T.D. Browning</i>	
5 Arithmetic differential equations of Painlevé VI type	114
<i>Alexandru Buium and Yuri I. Manin</i>	
6 Differential calculus with integers	139
<i>Alexandru Buium</i>	
7 Un calcul de groupe de Brauer et une application arithmétique	188
<i>Jean-Louis Colliot-Thélène</i>	
8 Connectedness of Hecke algebras and the Rayuela conjecture: a path to functoriality and modularity	193
<i>Luis Dieulefait and Ariel Pacetti</i>	

9	Big image of Galois representations and congruence ideals	217
	<i>Haruzo Hida and Jacques Tilouine</i>	
10	The skew-symmetric pairing on the Lubin–Tate formal module	255
	<i>M. A. Ivanov and S. V. Vostokov</i>	
11	Equations in matrix groups and algebras over number fields and rings: prolegomena to a lowbrow noncommutative Diophantine geometry	264
	<i>Boris Kunyavskii</i>	
12	On the ℓ-adic regulator as an ingredient of Iwasawa theory	283
	<i>L. V. Kuz'min</i>	
13	On a counting problem for G-shtukas	318
	<i>Ngo Dac Tuan</i>	
14	Modular forms and Calabi-Yau varieties	351
	<i>Kapil Paranjape and Dinakar Ramakrishnan</i>	
15	Derivative of symmetric square p-adic L-functions via pull-back formula	373
	<i>Giovanni Rosso</i>	
16	Uniform bounds for rational points on cubic hypersurfaces	401
	<i>Per Salberger</i>	
17	Descent on toric fibrations	422
	<i>Alexei N. Skorobogatov</i>	
18	On filtrations of vector bundles over $\mathbb{P}_{\mathbb{Z}}^1$	436
	<i>A. Smirnov</i>	
19	On the dihedral Euler characteristics of Selmer groups of Abelian varieties	458
	<i>Jeanine Van Order</i>	
20	CM values of higher Green's functions and regularized Petersson products	493
	<i>Maryna Viazovska</i>
