

Contents

<i>Lecture 1</i>	<i>The Theme of Natural Theology: How the Challenge Will Be Met</i>	1
	Synopsis and Introduction	1
1.1	Sherrington's Gifford Lectures	2
1.2	Subsequent Contributions on the General Theme of Sherrington's Lectures	4
1.3	Development of the Theme for the Present Lectures	7
1.4	Philosophical Basis of the Present Lectures	8
<i>Lecture 2</i>	<i>Origin and Evolution of the Universe</i>	11
	Synopsis and Introduction	11
2.1	The Big Bang	14
2.2	Formation of Galaxies and Life Histories of Stars	15
2.3	Cooking of the Elements	22
2.4	Galaxies in Space	23
2.5	Future of the Universe and Gravitational Collapse	24
2.6	The Question of Genesis	28
<i>Lecture 3</i>	<i>Planetary System and Planet Earth</i>	33
	Synopsis	33
3.1	The Solar System	33
3.1.1	Origin and Evolution	35
3.1.2	Chemical Composition of the Planets	37
3.2	Frequency of Planetary Systems	43
3.3	Fitness of Other Planets for Supporting Life	44
3.4	Conclusions	48

<i>Lecture 4</i>	<i>Origin of Life and Biological Evolution</i>	49
	Synopsis	49
4.1	What is Known to Have Happened: The Fossil Record	50
4.2	Explantations of Fossil Records by Evolutionary Theories	60
4.2.1	Prebiotic Organic Chemistry	60
4.2.2	Steps in the Building of Proteins and Nucleic Acids	62
4.2.3	The Living Cell	63
4.2.4	Biological Evolution	66
4.2.5	Evolution and Environment	69
4.3	General Considerations	71
4.4	Extraterrestrial Life?	72
<i>Lecture 5</i>	<i>Human Evolution:</i> <i>The Story of Cerebral Development</i>	74
	Synopsis and Introduction	74
5.1	What is Known to Have Happened: The Fossil Record	75
5.2	Evaluation of Human Cerebral Development	81
5.2.1	Allowance for Body Weight	81
5.2.2	Progression Indices of Cerebral Components	87
5.2.3	Qualitative Comparison	88
5.3	Selection Pressures and the Pre-Eminence of Linguistic Development	93
5.4	Theory of Biological Evolution	96
<i>Lecture 6</i>	<i>Cultural Evolution With Language and Values:</i> <i>The Human Person</i>	98
	Synopsis	98
6.1	The World of Culture (World 3)	98
6.2	Evolution of Culture	101
6.2.1	The Paleolithic and Mesolithic Ages	101
6.2.2	The Neolithic Age	106
6.2.3	The Rise of Cities and the Flowering of Culture	107
6.2.4	Sumerian Technology	112
6.2.5	Sumerian Literature	113

6.3	Cultural Evolution and World 3	114
6.4	World 2: The World of Self-Consciousness . .	115
6.5	Relationship of Biological Evolution to Cultural Evolution	118
6.6	Values – Altruism	118
6.7	The Future for Biological and Cultural Evolution	120
<i>Lecture 7</i>	<i>From the General to the Particular:</i> <i>The Creation of a Self</i>	123
	Synopsis and Introduction	123
7.1	Building of the Structure	124
7.2	Development of the Functional Performance of the Human Brain	130
7.2.1	Learning of Motor Control	131
7.2.2	Participation Learning	133
7.3	Participation in Culture: The Influence of World 3	135
7.3.1	Learning of Language	135
7.3.2	Effect of Deprivation of World 3 Inputs	136
7.4	Interaction of Worlds 2 and 3 in the Creation of the Self	141
<i>Lecture 8</i>	<i>Structure of the Neocortex;</i> <i>Conscious Perception</i>	145
	Synopsis	145
8.1	Structure of the Neocortex	145
8.1.1	General Anatomical Features	146
8.1.2	Columnar Arrangement and Modular Concept of the Cerebral Cortex	151
8.1.2.1	Modules Defined by Association and Callosal Fibres	151
8.1.2.2	Specific Afferent Fibres from the Thalamus . .	153
8.1.2.3	Cortical Inhibition	155
8.1.3	Summary on Cortical Modules	158
8.2	Conscious Perception	161
8.2.1	Cutaneous Perception (Somaesthesia)	163
8.2.2	Visual Perception	166
8.2.3	The Perceived Visual Image	173
8.2.4	Auditory Perception	174

8.2.5	Olfactory Perception	175
8.2.6	Pain	176
8.2.7	Emotional Colouring of Conscious Perceptions	176
8.2.8	Summary of Conscious Perception	177
<i>Lecture 9</i>	<i>Learning and Memory</i>	<i>180</i>
	Synopsis and Introduction	180
9.1	Structural and Functional Changes Possibly Related to Memory	183
9.2	Role of the Self-Conscious Mind in Short-Term Memory	188
9.3	Neural Pathways Concerned in Laying Down Long-Term Memories	189
9.3.1	Loss of Long-Term Memory	189
9.3.2	Neural Pathways Concerned in Laying Down Long-Term Memories	194
9.3.3	Storage of Memories	202
9.4	Memory Retrieval	203
9.5	Duration of Memories	206
9.6	Retrograde Amnesia	207
9.7	Conclusions	208
<i>Lecture 10</i>	<i>The Mind-Brain Problem:</i>	
	<i>Experimental Evidence and Hypothesis</i>	<i>210</i>
	Synopsis and Introduction	210
10.1	Dualist-Interactionist Hypothesis	214
10.1.1	Relationships of Mind to Brain in Voluntary Action	214
10.1.2	Mind-Brain Relationship as Studies in Commissurotomed Patients	217
10.1.3	Time Relationship of Brain to Mind in Conscious Perception	225
10.2	Radical Dualist-Interactionist Theory of Brain and the Self-Conscious Mind	226
10.3	Hypothesis of Cortical Modules and the Self-Conscious Mind	229
10.4	Conclusions	234
	Epilogue	235
	References	238
	Subject Index	246
