

Contents

Part I: Introduction and Overview

Chapter 1

INTRODUCTION TO NEUROBIOLOGICAL ISSUES IN AUTISM

Eric Schopler and Gary B. Mesibov

Tensions between Basic and Applied Research	3
Overview of the Book	5
Summary	11
References	11

Chapter 2

OVERVIEW OF BIOMEDICAL ISSUES IN AUTISM

Robert Jay Reichler and Eugene M. C. Lee

Specificity Model	14
Etiological Specificity	15
Biological Mechanisms and Models	16
Neurological/Anatomical Approach	16
Brain Anatomy and Autistic Symptoms	21
Neurochemistry	29
Genetics	32
Critique of Localization Approaches and Models	33
Developmental Approach	34
Summary and Conclusions	36
References	38

Chapter 3

NEUROBIOLOGICAL RESEARCH PRIORITIES IN AUTISM

Judith M. Rumsey and Martha B. Denckla

Characterization and Classification of Behavioral Pathology	44
Localization Research	47
Neurochemistry	52
Conclusion	53
Glossary	54
References	57

Chapter 4

ETHICAL ISSUES IN THE HEALTH CARE OF CHILDREN WITH DEVELOPMENTAL HANDICAPS

Alan W. Cross, Larry R. Churchill, Michael C. Sharp, and Nancy M. P. King

<i>The Role of Ethical Reflection in Medicine</i>	63
The Case Approach to Ethical Analysis	65
Case 1: Leonard	66
Case 2: Monica	68
Case 3: Charlie	70
Case 4: Robert	72
Case 5: Susan	74
Case 6: Samantha	75
Summary	78
References	79

Part II: Neurological and Genetic Issues: Theory Based

Chapter 5

AUTISM: FAMILIAL AGGREGATION AND GENETIC IMPLICATIONS

Susan E. Folstein and Michael L. Rutter

Introduction	83
Characteristics of Autism	84

Evidence for Genetic Factors in Autism Derived from Family and Twin Studies of Cases of Unknown Etiology	86
Single Gene Disorders Associated with Autism	91
Genetic Evaluation and Counseling for Families with an Autistic Child	96
Conclusions	99
References	100

Chapter 6

CEREBRAL–BRAINSTEM RELATIONS IN INFANTILE AUTISM

Marcel Kinsbourne

Overactivation in Autism: Behavioral Observations	107
Overactivation in Autism: Psychopathological Observations	109
The Varieties of Hemispheric Dysfunction	110
Activational Pathology	111
Neurological Findings in Autism	111
Peripheral Laterality	112
Evidence on Peripheral Laterality in Infantile Autism	113
Hemisphere Dysfunction: Less Is More?	114
Evidence on Central Laterality in Infantile Autism	115
Ascending Activation and Laterality	117
Overactivation and Autistic Symptomatology	117
Approach versus Withdrawal and the Balance of Hemispheric Activation	119
References	120

Chapter 7

IMPLICATIONS OF SOCIAL DEFICITS IN AUTISM FOR NEUROLOGICAL
DYSFUNCTION

Deborah Fein, Bruce Pennington, and Lynn Waterhouse

Introduction	127
Social Deficits in Autism	127
Neurological Basis of Social Behavior	131
Neurological Involvement in Autism	136

Conclusions	139
References	140

Chapter 8

THE NEUROCHEMICAL BASIS OF SYMPTOMS IN THE LESCH-NYHAN SYNDROME: RELATIONSHIP TO CENTRAL SYMPTOMS IN OTHER DEVELOPMENTAL DISORDERS

George R. Breese, Robert A. Mueller, and Stephen R. Schroeder

Introduction	145
Neurological Symptoms	146
Neurochemical Assessment	146
Comparison with Parkinsonism and Huntington Chorea	148
Modeling the Neurochemical Deficit	149
Age-Dependent Responses: Neurobiological Considerations	150
Investigation of Dopamine Receptor Supersensitivity	152
Purinergic Mechanisms Associated with Self-Biting	153
Possible Treatment Strategies	153
Relevance of Neurochemical Findings to Other Developmental Disorders	155
Summary	155
References	156

Part III: Neurological and Genetic Issues: Empirical Basis

Chapter 9

THE SEARCH FOR NEUROLOGICAL SUBGROUPS IN AUTISM

Mary Coleman

Introduction	163
Genetic Disorders	164
Infectious Disorders	166
Birth Injury	167
Metabolic Diseases	167
Structural Changes in the Brain Associated with Autistic Symptoms	170
Other Disease Entities	171
Blindness and Deafness	173

Conclusion	173
References	174

Chapter 10

PRE-, PERI-, AND NEONATAL FACTORS IN AUTISM

Luke Y. Tsai

Prenatal Factors	180
Perinatal Factors	184
Neonatal Factors	186
Conclusions	187
References	187

Chapter 11

NEUROBIOLOGICAL IMPLICATIONS OF SEX DIFFERENCES IN AUTISM

Catherine Lord and Eric Schopler

Sex Differences in Incidence	192
Sex Ratios, Autism, and Mental Retardation	194
Genetic Implications of Differences in Sex Ratios	196
Relevance of Sex Differences in Normal Development to Autism	202
Sex Differences in Identification, Diagnosis, and Referral	206
Conclusion	207
References	207

Chapter 12

THE ROLE OF ABNORMAL HEMISPHERIC SPECIALIZATION IN AUTISM

Geraldine Dawson

Introduction	213
Review of the Evidence	213
Theories Regarding the Role of Abnormal Hemispheric Specialization in Autism	215
A Test of Some Predictions	219
The Possible Role of Abnormal Hemispheric Specialization in the Affective and Social Deficits of Autistic Children	221
Conclusion	223
References	224

Chapter 13

BRAIN LESIONS IN AUTISM

G. Robert DeLong and Margaret L. Bauman

Introduction	229
The Significance of Brain Lesions: Neurological versus Nonneurological Autism	229
Clinical Studies	230
Epidemiological Factors Associated with Encephalopathy	231
Neuroradiological Studies	231
Cases with Discrete Medial Temporal Lobe Lesions	235
Neuroanatomic Studies	237
Discussion	238
References	240

Part IV: Neurochemical, Biochemical, and Nutritional Issues

Chapter 14

NEUROCHEMICAL HYPOTHESES OF CHILDHOOD PSYCHOSES

Glen R. Elliott and Roland D. Ciaranello

Introduction	245
Evidence of Central Nervous System Abnormalities	246
Evidence of Abnormalities in Brain Neuroregulators	249
Future Directions for Research	254
References	256

Chapter 15

NEUROTRANSMITTER RESEARCH IN AUTISM

Arthur Yuwiler and Daniel X. Freedman

General Introduction	263
Transmitters	264

Conclusion	276
References	277

Chapter 16

A NEUROPHYSIOLOGICAL VIEW OF AUTISM

Eric Courchesne

Introduction	285
An Introduction to ERPs	287
ERP Research Requirements and Studies of Autism	292
ERP Studies in Autism	293
ERP Findings: Summary and Concluding Remarks	310
A Conjecture about the Pathophysiology of Autism	312
References	319

Chapter 17

NUTRITION AND DEVELOPMENTAL DISABILITIES: ISSUES IN CHRONIC CARE

Daniel J. Raiten

Introduction	325
Dietary Adequacy	327
Nutrition and Behavior	327
Pharmacology and Nutrition	330
References	334

Part V: Medication Issues

Chapter 18

OVERVIEW OF DRUG TREATMENT IN AUTISM

Magda Campbell, Richard Perry, Arthur M. Small, and Wayne H. Green

Introduction	341
Historical Background	346
Recent Studies	348
Conclusion	352
References	352

Chapter 19

POSSIBLE BRAIN OPIOID INVOLVEMENT IN DISRUPTED SOCIAL INTENT AND LANGUAGE DEVELOPMENT OF AUTISM

Jaak Panksepp and Tony L. Sahley

Background Information	357
Possible Neurochemical Dysfunctions in Autism	361
Concluding Remarks	366
References	367

Chapter 20

THE MEDICAL TREATMENT OF AUTISTIC PEOPLE: PROBLEMS AND SIDE EFFECTS

Thomas Gualtieri, Randall W. Evans, and Debra R. Patterson

Neuroleptic Drugs	374
Fenfluramine	377
“Megavitamin” Therapy	378
Anticonvulsant Drugs	384
References	385

Chapter 21

MEGAVITAMIN B6 AND MAGNESIUM IN THE TREATMENT OF AUTISTIC CHILDREN AND ADULTS

Bernard Rimland

The First Institute for Child Behavior Research Vitamin Study	390
The Institute for Child Behavior Research/University of California Medical School Vitamin B6 Study	394
<i>Additional Studies in the United States of Vitamin B6 with Autistic Individuals</i>	395
The French Studies of Vitamin B6 and Magnesium	396
Criticisms of Vitamin B6 Therapy with Autism	399
Discussion	402
References	404
INDEX	407
