1 Introduction	1
Outline, plan and a theoretical approach	1
Health: definitions and indices	2
Inputs, mediators and outcomes: a review	5
<i>Social inputs; Stressful life-events; Social support; Emotional factors; Knowledge, information and communication; Cognitive dispositions: personal control; Cognitive dispositions: beliefs and attitudes; Stress and coping; Appropriate and inappropriate behaviours</i>	
Social inputs, social psychological mediators and health outcomes: a theoretical model	53
References	56
2 Pregnancy Outcome	76
Indices of pregnancy outcome	77
<i>Early childhood mortality and low birthweight; Complications of pregnancy; Satisfaction with maternity care</i>	
Social inputs and mediators: psychosocial risk factors and a theoretical model	86
<i>Psychosocial risk factors; A model of pregnancy outcome</i>	

A programme of research	103
<i>Study I Parents' satisfaction with maternity care: the importance of pre-existing attitudes and knowledge; Study II Women's satisfaction with the quality of the birth experience; Study III Breaking the news of severe mental impairment: a study of doctor-parent communication</i>	
Conclusion: implications for theory, policy and practice	127
<i>Implications for theory; Implications for policy and practice</i>	
References	130
3 Breast Cancer Screening	145
The epidemiology of breast cancer	146
<i>Mortality; Incidence; Survival; Causes, prevention and treatment</i>	
Social inputs and mediators: the role of screening	151
<i>X-ray mammography and its effectiveness; Breast self-examination and its effectiveness; Attendance rates and the acceptability of screening</i>	
A programme of research	166
<i>Main study: attendance and satisfaction; Follow-up study: discomfort and pain</i>	
Implications for theory, policy and practice	188
<i>Implications for theory; Implications for policy and practice</i>	
References	191
4 Motorcycling	196
Death and injury among motorcyclists	197
Social inputs, behaviours and mediators	200
<i>Social inputs; Behaviour; Mediators; Implications from the literature review</i>	
A programme of research	208
<i>Theoretical models; The investigation</i>	
Implications for theory, policy and practice	232
<i>The value of psychological models for predicting road safety behaviour; The value of the findings for future policy and practice</i>	

References	238
5 Discussion and Conclusions	244
Theoretical issues	247
<i>Conceptual questions; Design questions</i>	
Issues for policy and practice	256
<i>Defining and setting objectives; Meeting objectives; Implications of our model</i>	
References	264
<i>Index</i>	266
