

Contents

| | | |
|----------|---|----|
| 1 | Introduction | 1 |
| 1.1 | Two Extension Problems | 3 |
| 1.1.1 | Where to Find It | 3 |
| 1.2 | Quantum Physics | 5 |
| 1.3 | Stochastic Processes | 6 |
| 1.3.1 | Early Roots | 6 |
| 1.3.2 | An Application of Lemma 1.1: A Positive Definite Function on an Infinite Dimensional Vector Space | 10 |
| 1.4 | Overview of Applications of RKHSs | 11 |
| 1.4.1 | Connections to Gaussian Processes | 11 |
| 1.5 | Earlier Papers | 14 |
| 1.6 | Organization | 15 |
| 2 | Extensions of Continuous Positive Definite Functions | 17 |
| 2.1 | The RKHS \mathcal{H}_F | 18 |
| 2.1.1 | An Isometry | 21 |
| 2.2 | The Skew-Hermitian Operator $D^{(F)}$ in \mathcal{H}_F | 23 |
| 2.2.1 | The Case of Conjugations | 26 |
| 2.2.2 | Illustration: $G = \mathbb{R}$, Correspondence Between the Two Extension Problems | 31 |
| 2.3 | Enlarging the Hilbert Space | 34 |
| 2.4 | $Ext_1(F)$ and $Ext_2(F)$ | 38 |
| 2.4.1 | The Case of $n = 1$ | 40 |
| 2.4.2 | Comparison of p.d. Kernels | 40 |
| 2.5 | Spectral Theory of $D^{(F)}$ and Its Extensions | 43 |

| | | |
|----------|--|-----|
| 3 | The Case of More General Groups | 47 |
| 3.1 | Locally Compact Abelian Groups | 47 |
| 3.2 | Lie Groups | 54 |
| 3.2.1 | The GNS Construction | 59 |
| 3.2.2 | Local Representations | 61 |
| 3.2.3 | The Convex Operation in $Ext(F)$ | 63 |
| 4 | Examples | 67 |
| 4.1 | The Case of $G = \mathbb{R}^n$ | 67 |
| 4.2 | The Case of $G = \mathbb{R}/\mathbb{Z}$ | 72 |
| 4.3 | Example: $e^{i2\pi x}$ | 75 |
| 4.4 | Example: $e^{- x }$ in $(-a, a)$, Extensions to $\mathbb{T} = \mathbb{R}/\mathbb{Z}$ | 77 |
| 4.4.1 | General Consideration | 78 |
| 4.5 | Example: $e^{- x }$ in $(-a, a)$, Extensions to \mathbb{R} | 81 |
| 4.6 | Example: A Non-extendable p.d. Function in a Neighborhood of Zero in $G = \mathbb{R}^2$ | 89 |
| 4.6.1 | A Locally Defined p.d. Functions F on $G = \mathbb{R}^2$ with $Ext(F) = \emptyset$ | 91 |
| 5 | Type I vs. Type II Extensions | 93 |
| 5.1 | Pólya Extensions | 93 |
| 5.2 | Main Theorems | 99 |
| 5.2.1 | Some Applications | 103 |
| 5.3 | The Deficiency-Indices of $D^{(F)}$ | 106 |
| 5.3.1 | Pólya-Extensions | 108 |
| 5.4 | The Example 5.3, Green's Function, and an \mathcal{H}_F -ONB | 110 |
| 6 | Spectral Theory for Mercer Operators, and Implications for $Ext(F)$ | 115 |
| 6.1 | Groups, Boundary Representations, and Renormalization | 116 |
| 6.2 | Shannon Sampling, and Bessel Frames | 133 |
| 6.3 | Application: The Case of F_2 and Rank-1 Perturbations | 137 |
| 6.4 | Positive Definite Functions, Green's Functions, and Boundary | 142 |
| 6.4.1 | Connection to the Energy Form Hilbert Spaces | 147 |
| 7 | Green's Functions | 151 |
| 7.1 | The RKHSs for the Two Examples F_2 and F_3 in Table 5.1 | 151 |
| 7.1.1 | Green's Functions | 152 |
| 7.1.2 | The Case of $F_2(x) = 1 - x $, $x \in (-\frac{1}{2}, \frac{1}{2})$ | 155 |
| 7.1.3 | The Case of $F_3(x) = e^{- x }$, $x \in (-1, 1)$ | 161 |
| 7.1.4 | Integral Kernels and Positive Definite Functions | 165 |
| 7.1.5 | The Ornstein-Uhlenbeck Process Revisited | 166 |
| 7.1.6 | An Overview of the Two Cases: F_2 and F_3 | 167 |
| 7.2 | Higher Dimensions | 169 |

| | | |
|-----------|--|-----|
| 8 | Comparing the Different RKHSs \mathcal{H}_F and \mathcal{H}_K | 171 |
| 8.1 | Applications | 177 |
| 8.2 | Radially Symmetric Positive Definite Functions | 179 |
| 8.3 | Connecting F and \bar{F} When F Is a Positive Definite Function | 181 |
| 8.4 | The Imaginary Part of a Positive Definite Function | 183 |
| 8.4.1 | Connections to, and Applications of, Bochner's Theorem | 187 |
| 9 | Convolution Products | 193 |
| 10 | Models for, and Spectral Representations of, Operator Extensions | 197 |
| 10.1 | Model for Restrictions of Continuous p.d. Functions on \mathbb{R} | 197 |
| 10.2 | A Model of ALL Deficiency Index-(1, 1) Operators | 203 |
| 10.2.1 | Momentum Operators in $L^2(0, 1)$ | 207 |
| 10.2.2 | Restriction Operators | 209 |
| 10.3 | The Case of Indices (d, d) Where $d > 1$ | 209 |
| 10.4 | Spectral Representation of Index (1, 1) Hermitian Operators | 211 |
| 11 | Overview and Open Questions | 217 |
| 11.1 | From Restriction Operator to Restriction of p.d. Function | 217 |
| 11.2 | The Splitting $\mathcal{H}_F = \mathcal{H}_F^{(atom)} \oplus \mathcal{H}_F^{(ac)} \oplus \mathcal{H}_F^{(sing)}$ | 217 |
| 11.3 | The Case of $G = \mathbb{R}^1$ | 218 |
| 11.4 | The Extreme Points of $Ext(F)$ and $\mathfrak{S}\{F\}$ | 218 |
| | References | 219 |
