

Contents

1	Inner Functions	1
1.1	The Poisson Integral of a Measure	1
1.2	The Hardy Space $H^p(\mathbb{D})$	6
1.3	Two Classes of Inner Functions	8
1.4	The Canonical Factorization	12
1.5	A Characterization of Blaschke Products	17
1.6	The Nevanlinna Class $\mathcal{N}$ and Its Subclass $\mathcal{N}^+$	20
1.7	Bergman Spaces	23
2	The Exceptional Set of an Inner Function	27
2.1	Frostman Shifts and the Exceptional Set $\mathcal{E}_\varphi$	27
2.2	Capacity	30
2.3	Hausdorff Dimension	32
2.4	$\mathcal{E}_\varphi$ Has Logarithmic Capacity Zero	35
2.5	The Cluster Set at a Boundary Point	37
3	The Derivative of Finite Blaschke Products	39
3.1	Elementary Formulas for B'	39
3.2	The Cardinality of the Zeros of B'	40
3.3	A Formula for $ B' $	42
3.4	The Locus of the Zeros of B' in $\mathbb{D}$	46
3.5	B Has a Nonzero Residue	48
4	Angular Derivative	51
4.1	Elementary Formulas for B' and S'	51
4.2	Some Estimations for H^p -Means	54
4.3	Some Estimations for A^p -Means	57
4.4	The Angular Derivative	60
4.5	The Carathéodory Derivative	62
4.6	Another Characterization of the Carathéodory Derivative	68

5	H^p-Means of S'	71
5.1	The Effect of Singular Factors	71
5.2	A Characterization of $\phi' \in H^p(\mathbb{D})$	73
5.3	We Never Have $S' \in H^{\frac{1}{2}}(\mathbb{D})$	74
5.4	The Distance Function	76
5.5	A Construction of S with $S' \in H^p(\mathbb{D})$ for All $0 < p < \frac{1}{2}$	79
6	B^p-Means of S'	83
6.1	We Always Have $\phi' \in \cap_{0 < p < \frac{1}{2}} B^p(\mathbb{D})$	83
6.2	When Does $\phi' \in B^p(\mathbb{D})$ for Some $\frac{1}{2} \leq p < 1$?	84
6.3	We Never Have $S' \in B^{\frac{2}{3}}(\mathbb{D})$	87
6.4	A Construction of S with $S' \in B^p(\mathbb{D})$ for All $0 < p < \frac{2}{3}$	90
6.5	A Generalized Cantor Set	93
6.6	An Example of S with $S' \in B^p(\mathbb{D})$ for All $0 < p < \frac{2}{3}$	94
7	The Derivative of a Blaschke Product	99
7.1	Frostman's Theorem, Local Version	99
7.2	The Radial Variation	102
7.3	Frostman's Theorems, Global Version	107
7.4	An Example of B with $B' \notin \mathcal{N}$	114
7.5	A Sufficient Condition for the Existence of $B'(e^{i\theta})$	117
7.6	The Global Behavior of B'	119
8	H^p-Means of B'	125
8.1	When Do We Have $B' \in H^1(\mathbb{D})$?	125
8.2	A Sufficient Condition for $B' \in H^p(\mathbb{D})$, $0 < p < 1$	129
8.3	What Does $B' \in H^p(\mathbb{D})$, $0 < p < 1$, Imply?	131
8.4	Some Examples of Blaschke Products	134
8.5	The Study of $\ B'\ _p$ When Zeros Are in a Stolz Domain	138
8.6	The Effect of Argument of Zeros on $\ B'\ _p$	142
9	B^p-Means of B'	145
9.1	A Sufficient Condition for $B' \in B^p(\mathbb{D})$	145
9.2	What Does $B' \in B^p(\mathbb{D})$ Imply?	147
9.3	An Example of Blaschke Products	151
9.4	The Effect of Argument of Zeros on $\ B'\ _{B_p}$	152
10	The Growth of Integral Means of B'	157
10.1	An Estimation Lemma	157
10.2	H^p -Means of the First Derivative	159
10.3	H^p -Means of Higher Derivatives	162
10.4	A_γ^p -Means of the First Derivative	164
