Volume 214

## Algebras of Sets and Combinatorics

L. Š. Grinblat

**American Mathematical Society**  
Providence, Rhode Island

## Contents

Chapter 1.	Introduction	1
Chapter 2.	Main Results	11
Chapter 3.	The Main Idea	25
Chapter 4.	Finite Sequences of Algebras (1). Proof of Theorems 2.1 and 2.2	39
Chapter 5.	Countable Sequences of Algebras (1). Proof of Theorem 2.4	57
Chapter 6.	Proof of the Gitik–Shelah Theorem, and More from Set Theory	71
Chapter 7.	Proof of Theorems 1.17, 2.7, 2.8	83
Chapter 8.	Theorems on Almost $\sigma$ -Algebras. Proof of Theorem 2.9	93
Chapter 9.	Finite Sequences of Algebras (2). The Function $\mathbf{g}(n)$	109
Chapter 10.	A Description of the Class of Functions $\Psi_*^7$	145
Chapter 11.	The General Problem. Proof of Theorems 2.15 and 2.20	163
Chapter 12.	Proof of Theorems 2.21(1,3), 2.24	175
Chapter 13.	The Inverse Problem	179
Chapter 14.	Finite Sequences of Algebras (3). Proof of Theorems 2.27, 2.31, 2.36, 2.38	181
Chapter 15.	Preliminary Notions and Lemmas	197
Chapter 16.	Finite Sequences of Algebras (4). Proof of Theorems 2.39(1,2), 2.45(1,2)	207
Chapter 17.	Countable Sequences of Algebras (2). Proof of Theorems 2.29, 2.32, 2.46	229
Chapter 18.	A Refinement of Theorems on $\sigma$ -Algebras. Proof of Theorems 2.34, 2.44	235
Chapter 19.	Semistructures and Structures of Sets. Proof of Theorem 2.48	239
Chapter 20.	Final Comments. Generalization of Theorem 2.1	245
Appendix.	On a Question of Grinblat by Saharon Shelah	247

Bibliography	251
Index	255
