**Quantum Bounded
Symmetric Domains**

Leonid L. Vaksman

Translated by Olga Bershtein
and Sergey D. Sinel'shchikov

American Mathematical Society
Providence, Rhode Island

Contents

Foreword	vii
Preface	ix
Chapter 1. Quantum Disc	1
1.1. A caution to pedants	1
1.2. Topology	2
1.3. Symmetry	15
1.4. An invariant integral	37
1.5. Differential calculi	46
1.6. Integral representations	69
1.7. On kernels of intertwining integral operators	97
Chapter 2. Basic Quantum Theory of Bounded Symmetric Domains	107
2.1. Summary on quantum universal enveloping algebras	107
2.2. Summary on algebras of functions on compact quantum groups	125
2.3. Quantum vector spaces and Harish-Chandra modules	137
2.4. Spaces of functions in quantum bounded symmetric domains	165
2.5. The canonical embedding	182
2.6. Covariant differential calculi and invariant differential operators	209
Chapter 3. Conclusion	233
3.1. Boundaries and spherical principal series	233
3.2. The analytic continuation of holomorphic discrete series and the Penrose transform	235
Bibliography	239
Index	253
