

## CONTENTS

Preface	v
Acknowledgements	vi
1. ACETALDEHYDE, PRECURSORS	1
I. Introduction	1
II. Alcohol	8
III. Reagents	12
IV. Acetals	12
A. Acetal assay	12
B. Assay for acetals and vinyl ethers	14
V. 2-Alkenes	14
VI. 2,3-Butanediol	16
A. The determination of 2,3-butanediol in beer	16
VII. 6-Deoxyhexoses	17
A. Assay for 6-deoxyhexoses	17
B. Assay for free 6-deoxyhexoses	18
VIII. Ethylene Oxide	18
IX. Ethylenecyclohexane	18
X. Lactic acid	18
A. Assay for lactic acid	19
B. <i>p</i> -Phenylphenol determination of body fluid lactic acid	20
C. Estimation of lactic acid in skim milk powder	21
D. Determination of lactic acid in natural water with 1-naphthol	21
E. Measurement of lactic acid in beet-sugar processing	22
XI. Paraldehyde	22
A. Enzymatic determination of paraldehyde	22
B. Determination of paraldehyde with 4-phenylphenol	23
XII. Phenothiazines	23
XIII. 1,2-Propanediol and Other Glycols	23
XIV. Pyruvic Acid	24
A. MBTH ultramicro determination of pyruvic acid	24
XV. Steroids	24
A. Assay for urinary 21-deoxy-17,20-dihydroxycorticosteroids	24
XVI. Threonine	25
A. Assay for threonine	25
XVII. Vinyl Acylates	25
References	25
2. $\beta$ -ACETYLACROLEIN, PRECURSORS	30
I. Diphenylamine Reaction Mechanism	30

II. Parameters of the Diphenylamine Method	31
III. Adipocytes	35
A. Determination of DNA in washed adipocytes	36
IV. Sialic Acid Interference	36
A. Estimation of DNA in the presence of sialic acid	36
V. Plant Tissue	37
A. Estimation of DNA in plant tissues	37
B. Diphenylamine determination of DNA	38
VI. Pyrimidine Deoxyribonucleotides	38
VII. Ribonucleotide Reductase	39
A. Assay for ribonucleotide reductase by estimation of purine deoxyribonucleotides	39
B. Assay for ribonucleotide reductase by estimation of pyrimidine deoxyribonucleotides	40
VIII. Brain DNA	40
A. Diphenylamine determination of DNA in brain samples	41
IX. Chromogen Extraction	41
A. Diphenylamine extraction procedure for DNA	41
X. DNA in Sea Urchin Eggs	42
A. Determination of DNA in sea urchin eggs	42
XI. <i>p</i> -Nitrophenylhydrazine—Mechanism of Reaction	43
XII. DNA in Tissues and Microorganisms	44
A. <i>p</i> -Nitrophenylhydrazine determination of DNA	44
XIII. DNA in Plant Tissue	45
A. <i>p</i> -Nitrophenylhydrazine determination of DNA in plant tissue	45
XIV. DNA in Spermatozoa	47
A. <i>p</i> -Nitrophenylhydrazine determination of DNA in bovine spermatozoa	47
XV. Improved NPH Method for DNA	47
A. Selective estimation of DNA with <i>p</i> -nitrophenylhydrazine	49
XVI. Anthrone Determination of Hexoses	50
XVII. Diphenylamine Determination of Fructose	51
A. Diphenylamine determination of fructose in sperm	51
References	51
 3. ACROLEIN, PRECURSORS	 54
I. Formation Reagents	54
II. <i>m</i> - and <i>o</i> -Aminophenols	57
A. <i>m</i> -Aminophenol determination of spermine or spermidine	58
B. <i>o</i> -Aminophenol determination of serum triglycerides	59
III. Anthrone	59
A. Anthrone determination of glycerol	61
B. Anthrone determination of casily-hydrolysable acrolein precursors	61
IV. Hexylresorcinol and Schiff's Reagent	61
References	62
 4. 2-ACROLEYL-3-AMINOFUMARATE, PRECURSORS	 64
I. 3-Hydroxyanthranilate	64
A. Procedure for determination of 2-acroleyl-3-aminofumarate	65
References	66

5. ADIPALDEHYDE, PRECURSORS	67
Reference	67
6. ALDEHYDE ACIDS, PRECURSORS	68
References	69
7. ALIPHATIC ALDEHYDES, PRECURSORS	70
I. Introduction	70
II. Acids	76
III. Acyl Halides	77
IV. Primary Alcohols	77
A. MBTH determinations of primary alcohols	77
V. Aldehyde Hydrazones	79
A. Determination of aldehyde derivatives with MBTH	80
VI. <i>vic</i> -Alkanolamines	80
VII. Alkenyl Ethers	80
A. Location of plasmalogens on a thin-layer plate	82
B. Pararosaniline determination of plasmalogens in the presence of free aldehydes	82
VIII. Alkyl Amines	83
IX. N-Alkylarylamines	84
X. Alkyl Halides	84
XI. $\alpha$ -Amino Acids	85
XII. <i>vic</i> -Aminoalcohols and Diamines	86
XIII. Azoalkanes	87
XIV. Benzylidenehexoses	87
XV. Cigarette Tobacco	87
XVI. Collagen	87
XVII. 1,2-Diols	88
XVIII. Enol Ethers	88
XIX. Epoxides	89
XX. Ethylene Acetyls or 1,3-Dioxolanes	90
XXI. Ethylene Glycols	91
A. Spectral determination of low levels of mono-, di- and tri- ethylene glycols in surface waters	92
XXII. Gangliosides	92
A. Vanillin determination of gangliosides	93
XXIII. Glyceride Oils	94
A. Anisidine determination of aldehydes in glyceride oils	94
XXIV. $\alpha$ -Glycols	95
A. DNPH determination of $\alpha$ -glycols	96
XXV. Glycolic Compounds	96
A. Location of glycolic compounds on thin layer plates	97
XXVI. Hydrazines	97
XXVII. Hydrocarbons	97
XXVIII. Hydroperoxides	97
XXIX. $\alpha$ -Hydroxy Acids	98
XXX. 17-Hydroxy Steroids	98
XXXI. Ketones	99
XXXII. Lipids	99
A. The trapping of volatile aldehydes from fat	100

XXXIII. Methyl Oleate	100
XXXIV. Nitroalkanes	101
XXXV. Nitrosamines	101
XXXVI. Olefins and Other Unsaturated Compounds	102
A. MBTH determination of unsaturated compounds	102
XXXVII. Oximes, etc.	104
XXXVIII. Phenothiazines	104
XXXIX. Phosphonoacetaldehyde	104
XL. Pyruvates and Other 2-Ketocarboxylic Acids	104
XLI. Styrenes	105
A. MBTH determination of <i>p</i> -hydroxystyrenes	108
XLII. Thiazolidines	108
XLIII. Unsaturated Acids	108
A. Location of unsaturated acids and unsaturated monoglycerides after thin-layer chromatography	108
B. DNPH determination of aldehydes in mixtures of mono- and dicarboxylic acids	110
XLIV. Vinyl Ethers and Bound Serum Aldehydes	111
References	112
8. ALDEHYDES. TOTAL. PRECURSORS	119
I. Acyl Derivatives	119
II. Alcohols, primary	119
A. Oxidation of primary alcohols or amines to aldehydes	120
III. Alkyl Halides	125
IV. Alkylarylamines	126
V. Amines, Aliphatic	126
A. Chemical oxidation	126
B. Enzymatic oxidation	127
VI. Amino Acids	128
VII. Dinitrophenylhydrazones	128
A. Regeneration of aldehydes from dinitrophenylhydrazones	129
VIII. 1,3-Dithianes	130
IX. Epoxides, Glycols and $\alpha$ -Hydroxy Acids	131
A. Water-soluble compounds	131
B. Analysis of epoxides, <i>vic</i> -glycols, and $\alpha$ -hydroxy acids	131
C. Water-Insoluble Compounds	133
X. Esters	134
XI. Hydrocarbons	134
XII. $\alpha$ -Hydroxy Acids	136
XIII. Miscellaneous Precursors	136
References	137
9. ALDOGLUCOSE. PRECURSORS	141
I. Introduction	141
II. Enzymatic Methods	141
A. Introduction	141
B. Glucose oxidase	142
C. Glucose oxidase-peroxidase	143
D. Glucose oxidase plus molybdate or vanadate	162

E. Hexokinase methods	164
F. Glucokinase	166
G. Glucose oxidase plus catalase	166
H. Glycogen and other glucose polymers	168
III. Non-enzymatic Methods	170
A. MBTH	170
B. <i>p</i> -Hydroxybenzoyl hydrazide	172
C. <i>o</i> -Toluidine	172
References	173
10. ALDOHEXOSAMINES, PRECURSORS	179
I. Introduction	179
A. Determination of hexosamines with <i>p</i> -nitrobenzaldehyde	179
References	180
11. ALDOHEXOSES, PRECURSORS	181
I. <i>o</i> -Toluidine	181
A. Introduction	181
B. Acetic acid methods	181
C. Aqueous acetic acid	184
D. Other acids	185
E. Automated methods	186
F. Other carbohydrates	190
II. <i>o</i> -Anisidine	191
A. Determination of hexoses with <i>o</i> -anisidine	191
References	191
12. ALDOHEXURONATES, PRECURSORS	193
I. Naphthoresorcinol	193
A. Mechanism of reaction	193
B. Extractive procedures	195
C. Thin-layer chromatography	196
D. Conjugated uronic acids	197
II. Enzymatic Methods	197
III. Other Methods	199
References	200
13. ALDOPHOSPHAMIDE, PRECURSORS	202
References	204
14. ALDOSES, PRECURSORS	205
I. Introduction	205
II. Redox Methods	209
A. Historical	209
B. Copper methods	209
C. Other reductive tests	213
D. Ferricyanide methods	213
E. Halogens	216
F. Molybdate	216
G. Tetrazolium salts	216

H. Polynitroarenes	223
III. Non-reductive Methods	228
A. Carbohydrate dyscrasias	228
B. Allergenic glycoproteins	228
C. <i>p</i> -Hydroxybenzoylhydrazide	228
D. Cyanide reagent	230
E. Ethylenediamine	231
F. Ethyl malonate	234
G. Quinaldinium and lepidinium salts	234
H. Hydrazines	235
1. HBT	236
2. MBTH	237
I. Final comments	240
References	240
15. ALDOSTERONE, PRECURSORS	245
References	246
16. ALKOXY AND ARYLOXYACETALDEHYDES, PRECURSORS	247
References	248
17. N-ALKYLPYRROL-2-CARBOXALDEHYDES, PRECURSORS	249
Reference	249
18. 2-AMINOADIPALDEHYDIC ACID, PRECURSORS	250
References	253
19. $\alpha$ -AMINOALDEHYDES, PRECURSORS	255
References	255
20. $\omega$ -AMINOALDEHYDES, PRECURSORS	257
References	260
21. (POLY)-AMINOALDEHYDES, PRECURSORS	261
References	262
22. <i>o</i> -AMINOBENZALDEHYDES, PRECURSORS	263
References	263
23. $\alpha$ -(2-AMINOBENZOYL)ACETALDEHYDE, PRECURSORS	264
References	264
24. 2-AMINO-3-CARBOXYMUCONATE SEMIALDEHYDE, PRECURSORS	265
References	265
25. 2-AMINOGLUTARALDEHYDIC ACID, PRECURSORS	266
References	266
26. 2-AMINO- $\delta$ -HYDROXYADIPIC- $\delta$ -SEMIALDEHYDE, PRECURSORS	267
References	268
