

CONTENTS

Preface	v
24. 3-FORMYLACRYLIC ACID	1
I. Physical and Spectral Properties	1
References	1
25. FUMARALDEHYDE	2
I. Physical and Spectral Properties	2
References	2
26. FURFURAL	3
I. Physical and Spectral Properties	3
II. Reagents	4
A. Aromatic amines	5
B. <i>m</i> -Aminophenol	7
C. Aniline	8
D. <i>p</i> -Bromoaniline	10
E. Anthrone	11
F. 4-Azobenzenehydrazine sulphonic acid	12
G. Azulenes	12
H. Cyclopentanone	13
I. 1,3-Diketones	14
J. <i>N,N</i> -Dimethyl- <i>p</i> -phenylenediamine	15
K. 2,4-Dinitrophenylhydrazine	15
L. Orcinol	16
M. <i>m</i> -Phenylenediamine	16
N. Phloroglucinol	17
O. Pyrogallol	17
References	17
27. GLUTACONALDEHYDE	21
I. Physical and Spectral Properties	21
References	22
28. GLUTARALDEHYDE	23
I. Introduction	23
A. 2,4-Dinitrophenylhydrazine	25
References	26
29. GLYCERALDEHYDE	27
I. Introduction	27
II. Spectrophotometric Methods	27
A. Nicotinamide adenine dinucleotide	27
B. Naphthoresorcinol	30
C. 3-Methyl-2-benzothiazolinone hydrazone	30
D. 2,4-Dinitrophenylhydrazine	30
E. Other phenylhydrazines	31
III. Fluorimetric methods	31
References	32

30. GLYCERALDEHYDE-3-PHOSPHATE	33
I. Physical Properties	33
II. Introduction	33
III. Enzymatic Methods	33
References	35
31. GLYCIDAL	36
I. Physical and Spectral Properties	36
References	36
32. GLYCOLALDEHYDE	37
I. Introduction	37
II. Reagents	37
A. 2,4-Dinitrophenylhydrazine	37
B. Diphenylamine	38
C. 3-Methyl-2-benzothiazolinone hydrazone	39
D. Naphthoresorcinol	39
E. Nicotinamide adenine dinucleotide	39
F. Pyrogallol	40
G. Resorcinol	41
H. Fluorescent 2-aminobiphenyl procedure	41
References	41
33. GLYOXAL	42
I. Introduction	42
II. Reagents	42
A. <i>o</i> -Aminophenol	42
B. Azulenes	44
C. Chromotropic acid	45
D. 2,3-Diaminophenazine	45
E. 1,2-Dianilinoethane	47
F. Dimedone	47
G. 2,4-Dinitrophenylhydrazine	47
H. 2-Hydrazinobenzothiazole	49
I. 2-Hydroxy-1-naphthalhydrazone	49
J. 3-Hydroxythianaphthene	51
K. 3-Methyl-2-benzothiazolinone hydrazone	51
L. 2-Methylindole	52
M. 4-Nitrophenylhydrazine	52
N. Phenylhydrazines	56
O. <i>o</i> -Phthalaldehyde	57
P. Resorcinol	57
Q. Salicylalhydrazone	57
References	58
34. GLYOXALS	60
A. 2,4-Dinitrophenylhydrazine	60
B. 3-Methyl-2-benzothiazolinone hydrazone	62
C. Diphenylamine	63
References	63

35. GLYOXYLIC ACID	65
I. Introduction	65
II. Reagents	65
A. <i>o</i> -Aminobenzaldehyde	65
B. 2,7-Dihydroxynaphthalene	68
C. 2,4-Dinitrophenylhydrazine	69
D. 4'-Hydrazino-2-stilbazole	71
E. Indoles	72
F. 3-Methyl-2-benzothiazolinone hydrazone	73
G. Enzymatic methods	74
H. <i>p</i> -Nitrophenylhydrazine	74
I. <i>o</i> -Phenylenediamine	74
J. Phenylhydrazine	75
K. Pyrogallol	79
L. Resorcinol	80
M. Semicarbazide	82
References	83
36. 2,4-HEXADIENAL	86
I. Physical and Spectral Properties	86
References	86
37. 4-HYDROXYBENZALDEHYDE	88
I. Physical Properties	88
II. pH Effects	88
III. Phosphorimetry	89
IV. Reagents	90
A. Azulene	90
B. Hydrazines and barbituric acid	91
References	92
38. 5-HYDROXYMETHYLFURFURAL	93
I. Physical Properties	93
II. Spectral Properties and Applications	93
III. Reagents	95
A. Aniline	95
B. Azulene	97
C. Barbituric acid	97
D. Benzidine	98
E. Bisulphite and aluminium amalgam	99
F. N,N-Dimethyl- <i>p</i> -phenylenediamine	99
G. Diphenylamine	100
H. Hydrazine	101
I. 5-Hydroxy-1-tetralone	102
J. 3-Methyl-2-benzothiazolinone hydrazone	103
K. 2-Thiobarbituric acid	103
L. Thioglycolic acid	104
References	104
39. 3-HYDROXYPYRUVALDEHYDE	107
I. Physical and Spectral Properties	107
References	107

40. INDOLE-3-ACETALDEHYDE	108
I. Introduction	108
A. Ferric sulphate determination of indole-3-acetaldehyde	108
References	110
41. INDOLE-3-CARBOXALDEHYDE	111
I. Physical and Spectral Properties	111
References	113
42. ISOBUTYRALDEHYDE	114
I. Physical and Spectral Properties	114
References	114
43. MALONALDEHYDE	115
I. Introduction	115
II. Techniques	115
A. pH and solvent effects	115
B. Iodine	117
C. Standards	118
D. 4'-Aminoacetophenone	119
E. Other aromatic amines	124
F. Amino acids	126
G. Anthrone	127
H. Azulene	129
I. Barbituric acid	130
J. Benzenediazonium salts	130
K. 10,9-Borazonaphthalene	131
L. 9,10-Diacetoxanthracene	131
M. 4-Hexylresorcinol	131
N. Indole	132
O. 3-Methyl-2-benzothiazolinone hydrazone	132
P. 2-Methylindole	132
Q. N-Methylpyrrole	133
R. <i>p</i> -Nitroaniline	133
S. <i>p</i> -Phenylazoaniline	133
T. Quinaldinium salts	133
U. 4,4'-Sulphonyldianiline	133
V. 2-Thiobarbituric acid	134
References	136
44. 5-METHYLFURFURAL	138
I. Physical and Spectral Properties	138
A. Aniline determination of 5-methylfurfural	139
References	139
45. 1-NAPHTHALDEHYDE	140
I. Physical and Spectral Properties	140
References	141
46. 2-NAPHTHALDEHYDE	142
I. Physical Properties	142

II. Reagents	142
A. Acid	142
B. Azulene	143
C. Nitrophenylhydrazines	143
References	144
47. <i>p</i> -NITROBENZALDEHYDE	145
I. Physical and Spectral Properties	145
A. Indole determination of <i>p</i> -nitrobenzaldehyde	146
References	146
48. 5-NITRO-2-FURFURAL	148
I. Physical and Spectral Properties	148
References	149
49. OXYBENZALDEHYDES	150
I. Introduction	150
II. Techniques	150
A. Spectra	150
B. Acetal formation	153
C. <i>o</i> -Aminothiophenol	155
D. Anionic, cationic and neutral forms	157
E. Azulene and Barbituric Acid	157
F. Hydrazines	157
G. Thioglycolic acid	158
H. Vinylogs	158
References	160
50. PALMITALDEHYDE	162
I. Physical Properties	162
A. Determination of free aldehydes in tissue lipids	162
References	163
51. PROPIONALDEHYDE	164
I. Physical Properties	164
II. Spectra	164
III. Reagents	164
A. 1,3-Diketones	164
B. 2,4-Dinitrophenylhydrazine	164
C. 3-Methyl-2-benzothiazolinone hydrazone	165
D. Ninhydrin	165
E. Nitrophenylhydrazines	166
F. <i>m</i> -Dinitrobenzene	166
References	167
52. PEPTIDE AND PROTEIN ALDEHYDES	168
I. Physical Properties	168
References	169
53. 1-PYRENEALDEHYDE	170
I. Spectral Properties	170
II. Acetal Formation	172
III. Reagents	172

A. Azulene	172
B. Borohydride	173
C. Phenylhydrazines	175
D. Bisulphite	179
References	179
54. PYRIDOXAL	180
I. Introduction	180
II. Structures	180
III. Spectral Properties	185
IV. Direct Photometric Analysis	187
V. Reactions	188
A. Acetone	188
B. Ammoniacal silver nitrate	189
C. Acid hydrazides	189
D. Amino acids	190
E. Cyanide	194
F. Diazotized amines	196
G. Oxidation	198
H. 2,6-Dichloroquinone chloroimide	198
I. N,N-Diethyl- <i>p</i> -phenylenediamine	198
J. Miscellaneous reactions	200
References	201
55. PYRIDOXAL PHOSPHATE	204
I. Introduction	204
II. Spectral Properties	204
III. Reagents	207
A. Alkaline cyanide	208
B. Amines	210
C. Bisulphate and dithionate	211
D. Enzymatic methods	212
E. Apotryptophanase	213
F. Apoaminotransferase	217
G. 3-Methyl-2-benzothiazolinone hydrazone	219
H. Hydrazines	221
References	222
56. PYRUVALDEHYDE	225
I. Introduction	225
II. Reagents	225
A. Anthrone	225
B. Carbazole	225
C. Chromotropic acid	226
D. 2,3-Diaminophenazine	227
E. 2,4-Dinitrophenylhydrazine	228
F. Diphenylamine	229
G. 2-Hydrazinobenzothiazole	229
H. 2-Methylindole	229
I. Hydrazines	230
J. Glutathione	231
References	232

57. RETINAL	233
I. Introduction	233
II. Spectral Properties	235
III. Spectra of Schiff Bases	237
IV. Reagents	240
A. Amines	240
B. Antimony trichloride	242
C. Glycerol dichlorohydrin	243
D. 2,4-Dinitrophenylhydrazine	244
E. Hydroxylamine	244
F. Hydrazides	245
G. Opsin	245
H. 2-Thiobarbituric Acid	246
References	248
58. SALICYLALDEHYDE	251
I. Physical Properties	251
II. Absorptiometric Properties	251
III. Fluorescence Properties	251
IV. Quenchofluorimetry	253
V. Phosphorescence	255
VI. Reagents	255
A. Aluminium salts	255
B. Boric acid	256
C. Nitrophenylhydrazines	257
D. Hydrazines	257
E. Picolinium and analogous salts	258
F. Salicyloylhydrazide	258
References	259
59. STREPTOMYCIN	260
I. Introduction	260
II. Reagents	260
A. Hydrazines	260
B. 2-Thiobarbituric acid	261
References	262
60. SUCCINALDEHYDE	264
I. Physical Properties	264
II. Preparation	264
III. Reagents	264
A. 4-Dimethylaminobenzaldehydes	264
B. 3-Methyl-2-benzothiazolinone hydrazone	268
C. <i>o</i> -Phenylenediamine	268
References	270
61. SUCCINALDEHYDIC ACID	271
I. Physical and Spectral Properties	271
A. Estimation of succinaldehydic acid with 3,5-diaminobenzoic acid	271
References	272

62. TEREPHTHALALDEHYDE	273
I. Physical and Spectral Properties	273
A. Estimation of terephthalaldehyde with <i>p</i> -nitrophenylhydrazine	273
63. TEREPHTHALALDEHYDIC ACID	274
I. Physical Properties	274
A. Determination of terephthalaldehydic acid	274
References	274
64. 2-THIOPHENECARBOXALDEHYDE	275
I. Physical and Spectral Properties	275
References	275
65. TRIFORMYLMETHANE	276
I. Physical and Spectral Properties	276
References	278
66. α,β -UNSATURATED ALDEHYDES	279
I. Introduction	279
II. Spectral Properties	279
III. Techniques	281
A. Anthrone and N,N-dimethyl- <i>p</i> -phenylenediamines	281
B. Hydrazines	284
C. 2-Thiobarbituric acid	287
D. Girard-T reagent	287
E. High pressure liquid chromatography	288
References	288
67. VANILLIN	291
I. Physical Properties	291
II. Spectral Properties and Applications	291
III. Paper Chromatography	292
IV. Thin Layer Chromatography	293
V. Liquid-Solid, Liquid-Liquid, Gas-Solid and Gas-Liquid Chromatography	293
VI. Problems in Ultraviolet Assay	295
VII. Phosphorimetry	295
VIII. Reagents	295
A. Acetone	295
B. 2,4-Dinitrophenylhydrazine	295
C. Indole	297
D. Millon's reagent	297
E. <i>p</i> -Nitrophenylhydrazine	298
F. Phosphomolybdic acid	298
G. 2-Thiobarbituric acid	299
References	299
Author Index	303
Subject Index	321
