

Contents

Preface	7
1. Surfaces—Favorite Media of Evolution	21
Principles of Operation	21
Some of the Unique Physical-Chemical Properties of Surfaces	25
The Surface of a Solid Is Heterogeneous on the Atomic Scale	25
The Heterogeneous Surface Is Covered with a Near-Monolayer of Adsorbate under Most Experimental Conditions	27
Two-Dimensional Phase Approximation	29
The Surface Free Energy Is Always Positive	30
Surface Dipole	34
References	35
2. Tools of the Surface Scientist's Trade	37
Sample Preparation	37
Generation of Ultrahigh Vacuum (UHV) and Controlled Pressures for Surface Studies	39
Principles of Surface Analysis by Electrons, Atoms, and Ions	40
Methods Sensitive to Atomic Geometry at Surfaces	45
Low-Energy Electron Diffraction (LEED)	45
Reflection High-Energy Electron Diffraction and Medium-Energy Electron Diffraction (RHEED and MEED)	54
Electron Microscopy	56
Field-Ion Microscopy (FIM)	58
Low-, Medium-, and High-Energy Ion Scattering (LEIS, MEIS, and HEIS)	60
Atomic Scattering and Diffraction	61
Surface-Sensitive Extended X-ray Absorption Fine Structure (SEXAFS)	65

Contents

X-ray and Ultraviolet Photoelectron Spectroscopies of Surfaces (XPS and UPS)	65
Ion-Neutralization Spectroscopy (INS)	70
Surface Penning Ionization (SPI)	70
Techniques Sensitive to Electron Distribution at Surfaces:	
Work-Function Measurements	71
Methods Sensitive to Chemical Composition at Surfaces	72
Auger Electron Spectroscopy (AES)	72
Thermal Desorption Spectroscopy (TDS)	77
Ellipsometry	79
Secondary-Ion Mass Spectroscopy (SIMS)	81
Ion-Scattering Spectroscopy (ISS)	82
Methods Sensitive to Vibrational Structure of Surfaces	84
Infrared Spectroscopies (IR) and Raman Spectroscopy	84
High-Resolution Electron Energy Loss Spectroscopy (HREELS)	86
Electron Tunneling Spectroscopy	87
Modeling of Surfaces	89
Model Calculations	89
Clusters	90
Techniques for Studies of the Dynamics of Surface Processes	91
References	95
3. Composition of Surfaces: Thermodynamic Guidelines and Experimental Results	100
Role of Surface Forces in the Control of Surface Composition	100
Surface Composition of Alloys from Model Calculations	107
Empirical Correlation	111
How the Surface Composition Is Measured	112
Experimental Data and Correlation to the Various Models	
Predicting Surface Enrichment	116
Surface Composition of Systems with Complex Phase	
Diagrams: The Au-Sn System	116
δ Phase	118
ζ Phase	119
α Phase	119
Surface-Phase Diagram	120
Bimetallic Clusters	123
Effect of the Ambient Condition on the Surface Composition	123
References	124
4. Structure of Clean Surfaces	126
Results of Surface Crystallography Studies	126
Conversion of the Diffraction Pattern to a Surface Structure;	

Notation of the Surface Structures on Low-Miller-Index Crystal Planes	127
Surface Structures of Clean Low-Miller-Index Metal Surfaces	135
Surface Structure of Alloys	147
Structure of Low-Miller-Index Semiconductor Surfaces	148
Elemental Semiconductors	148
Compound Semiconductors	151
Structure of Ionic Crystal Surfaces	152
Structure of Oxide Surfaces	153
Structure of Molecular Crystal Surfaces	155
Structure of Inert-Gas Crystal Surfaces	156
Stepped, High-Miller-Index Surfaces	156
Nomenclature of High-Miller-Index Surfaces	162
Structure and Stability of High-Miller-Index Surfaces	162
Studies of Antiferromagnetic Phase Transformations by LEED	168
Surface-Atom Vibrations: The Debye-Waller Factor	169
References	171
5. Structure of Adsorbed Monolayers on Solid Surfaces	176
Introduction	176
Principles of Monolayer Adsorption	177
Principles of Ordering of Adsorbed Monolayers	181
Causes of Ordering	181
Degree of Ordering	184
Effect of Temperature on the Ordering of Adsorbed Monolayers	187
Effect of Surface Irregularities on Ordering	189
Unit Cells of Adsorbed Monolayers	192
Review of Ordered Adsorbate Structures	194
Introduction	194
Metals on Metals	195
Surface Structures of Small Molecules on Low- and High-Miller-Index Surfaces	209
Ordered Organic Monolayers	245
Surface Crystallography of Ordered Monolayers of Atoms	252
Effect of the Adsorbate on the Clean Substrate Surface Structure	252
Adsorption Geometry of Atoms	267
Surface Crystallography of Ordered Multiatomic and Molecular Monolayers	274
Coadsorption of Atoms	275
Dissociative Adsorption of Carbon Monoxide	276
Adsorption Geometry of Molecules	276
References	281

6. The Surface Chemical Bond	283
Introduction	283
Heats of Adsorption of Small Molecules on Solid Surfaces	284
Sequential Filling of Surface Binding Sites by Adsorbates	295
Temperature-Dependent Changes in the Character of the Surface Chemical Bond	299
Pressure Dependence of Chemical Bond Breaking on Surfaces	302
Effects of Surface Irregularities on Bonding	303
Effects of Other Adsorbates on the Bonding of Adsorbed Gases	305
Surface Compounds	306
Cluster Model of the Surface Chemical Bond	308
References	311
Appendix Tables	314
7. Energy Transfer in Gas-Surface Interactions	331
Introduction	331
$T-V_s$ Energy Transfer	336
Effect of Diatomic Adsorbates on the $T-V_s$ Energy Transfer	338
$R-V_s$ Energy Transfer	338
$V-V_s$ Energy Transfer	342
Gas-Surface Interaction Potential	342
Alkali-Halide and Graphite Surfaces	343
Metal Surfaces	344
Rainbow Peaks	345
Elementary Surface Processes: Introduction	346
Modes of Signal Detection	348
Analysis of the Molecular Beam Surface Scattering and Thermal Desorption Data	349
Adsorption	353
Surface Diffusion	359
Desorption	360
Surface Reactions	361
Corrosion Reactions	366
Catalyzed Surface Reactions	367
H_2-D_2 Exchange	368
Dissociation Reactions	374
Exothermic Small-Molecule and Atom-Recombination Reactions	376
References	377

8. Catalyzed Surface Reactions: Principles	381
Catalytic Action	381
Selective Catalysis	382
Kinetic Expressions	383
Tabulated Kinetic Parameters for Catalytic Reactions	386
Large Surface Area	387
Surface Intermediates	389
Active Sites	392
Acid or Base Character of a Catalyst	395
Catalyst Additives	396
Deactivation and Regeneration	399
Some Frequently Used Concepts of Catalysis	400
The Business of Catalysis	402
Synthetic Approach to Catalytic Chemistry	405
Techniques to Characterize and Study the Reactivity of	
Small-Area Catalyst Surfaces	408
High-Pressure Reactors	408
Low-Pressure Reactors	409
References	412
9. Hydrocarbon Conversion on Platinum	479
Introduction	479
Structures of Clean, Single-Crystal Platinum Surfaces with	
Distinguishable Catalytic Activities	484
Structure-Sensitive Deactivation of Clean Platinum Surfaces	
during Hydrocarbon Reactions	486
Structure Sensitivity of the H—H, C—H, and C—C Bond	
Breaking of Clean Platinum Crystal Surfaces	488
Identical Reaction Rates for Single-Crystal and Dispersed	
Platinum Catalysts for Structure-Insensitive Reactions at	
High Pressures: The Ring Opening of Cyclopropane	493
Effects of Additives That Modify the Catalytic Behavior of	
Platinum	494
The Carbonaceous Deposit	494
Oxygen Additive to Platinum Surfaces	499
Reconstruction of the Platinum Catalyst Surface Structure	
under the Reaction Conditions	507
Building of Platinum Catalysts	510
References	514

Contents

10. Catalytic Hydrogenation of Carbon Monoxide	516
Brief History	516
Thermodynamic Considerations	519
Different Reaction Paths and Selectivity during the Hydrogenation and Insertion of Carbon Monoxide	525
Methanation	526
Methanol Formation	530
Polymerization Reactions	531
Formation of Oxygenated Organic Molecules	539
Insertion of CO Molecules (Carbonylation) to Form C ₂ or C ₃ Products	541
Research Directions in the Near Future	542
References	543
11. Photochemical Surface Reactions	545
Introduction, Photosynthesis, and the Photoelectrochemical Dissociation of Water	545
Photocatalytic Dissociation of Water Using SrTiO ₃ Crystals	551
Studies of Hydrogen Photoproduction on SrTiO ₃ Crystals	554
Studies of the Location of Hydrogen Production on Platinized and Metal-Free SrTiO ₃ Crystals	557
Hydroxide Concentration Dependence of Hydrogen Photoproduction	558
Electron Spectroscopy Studies of the Active Surface Species for the Photodissociation of Water on SrTiO ₃ Crystal Surfaces	560
Interaction of Ti ³⁺ Surface Sites with Oxygen, Hydrogen, and Water in Dark and in Light	561
Identification of Hydroxyl Groups on the SrTiO ₃ Surface	563
Mechanistic Considerations	563
References	565
Index	567
