Genesis and Dedication xix

Introduction xxi

1 The Liquid–Vapor Interface 1

- 1.1 Some Characteristics of the Surfaces of Liquids 1
 - 1.1a Laplace Pressure (1); 1.1b Surface Energy and Surface Tension (2); 1.1c Contact Angle (3).
- 1.2 Measurement of the Surface Tension of Liquids 4
 - 1.2a Capillary Rise (4); 1.2b Drop Weight (4); 1.2c Du Noüy Tensiometer (6); 1.2d Wilhelmy Plate (6); 1.2e Drop Shapes, the Bashforth–Adams Equation (6); 1.2f Maximum Bubble Pressure (8); 1.2g Rotating Drop (9).
- 1.3 Values of the Surface Tension of Pure Liquids 10
 - 1.3a Thermodynamic Interfacial Excess Quantities (10);
 - 1.3b *Ab Initio* Calculations of Surface Tension (11);
 - 1.3c Surface Tension and Other Physical Properties (16).
- 1.4 The Surface Tension of Solutions and Interfacial Adsorption 17
 - 1.4a Surface Activity (17); 1.4b Interfacial (Gibbs) Adsorption (18).
- 1.5 The Surface Tension of Aqueous Solutions of Surfactants 23
- 1.6 Experimental Measurements of Surface Excess 27
- 1.7 Dynamic Surface Tension 28
 - 1.7a Experimental Measurement (29); 1.7b Kinetics of Adsorption from Solution (31).

Questions and Problems 34
