PREFACE FOR GENERAL READERS	v
-----------------------------	---

PREFACE FOR INSTRUCTORS	vii
-------------------------	-----

PART ONE *Meaning and Verifiability*

INTRODUCTION <i>Science and Philosophical Criticism</i>	3
---	---

1 <i>Semantical Concepts</i>	6
------------------------------	---

Semantic Meaning and Verifiability $\approx$ Semantic and Pragmatic Meaning
 $\approx$ Syntactic Meaning $\approx$ A Priori and Empirical Statements $\approx$
Meaning and Meaningfulness

2 <i>Verifiability, Confirmability, and the Empiricist Language</i>	16
---	----

Verification and Confirmation $\approx$ Logical and Empirical Possibility of
Confirmation $\approx$ Knowing the Truth-Condition and Knowing a
Method of Verification $\approx$ Meaningfulness and Observation Statements
 $\approx$ Reducibility of Meaningful Terms to Observable Predicates $\approx$
Complete and Incomplete Definition $\approx$ Operationism and Ambiguity
of Symbols $\approx$ Is a Statement Composed of Meaningful Terms
Necessarily Confirmable?

3 <i>Theoretical Constructs and the Limitations of Operationism</i>	39
---	----

The Impossibility of Introducing Theoretical Constructs by Reduction
Chains $\approx$ The Argument from the Application of Mathematics $\approx$
Postulational Definition and Partial Interpretation $\approx$ Relativization of
Significance to Theories

4 <i>The Principle of Verifiability in Physics and Psychology</i>	58
---	----

The Law of Inertia and Absolute Time $\approx$ Einstein and Simultaneity
 $\approx$ Force and Absolute Motion $\approx$ Behaviorism and the Postulate of
Public Verifiability

PART TWO *Mathematics, Logic, and Experience*

- 5 *The Nature of Arithmetical Statements* 77
 A Priori Knowledge and Analytic Statements $\approx$ Are the Equations of Arithmetic Analytic? $\approx$ The Logician Interpretation of Arithmetic $\approx$ Mill's Empiricism
- 6 *The Laws of Logic* 94
 Tautologies and Analytic Statements $\approx$ Tautologies and Linguistic Conventions
- 7 *Geometry* 107
 The Question of Synthetic A Priori Knowledge about Space $\approx$ Non-Euclidean Geometry and the Question of Consistency $\approx$ Physical Geometry and Poincaré's Conventionalism
- 8 *Logical Analysis of Measurement* 125
 Quantity and Quality $\approx$ The Topological Conditions of Measurement $\approx$ The Metrical Conditions of Measurement; Additivity $\approx$ Derived Measurement

PART THREE *Induction and Probability*

- 9 *Deductive and Inductive Inference* 139
 Inadequacy of the Traditional Definition $\approx$ Classification of Inductive Inferences $\approx$ The Concept of Truth-Frequency
- 10 *Induction by Elimination and Its Postulates* 151
 Mill's Theory of Induction $\approx$ The Charge of Circularity $\approx$ Addition and Multiplication of Probabilities $\approx$ Keynes' Theory of Induction $\approx$ The Attempt to Justify Induction by Postulates
- 11 *The Frequency Interpretation of Probability* 174
 Exposition $\approx$ Some Standard Objections to the "Limiting-Frequency" Interpretation $\approx$ The Problem of the "Infinity" of the Reference Class
- 12 *The Range Interpretation of Probability* 191
 The Laplacian Definition and the Principle of Indifference $\approx$ Logical and Statistical Probability
- 13 *The Probability of Universal and Statistical Hypotheses* 213
 The Frequency Interpretation $\approx$ Carnap's "Qualified-Instance Confirmation" $\approx$ Is Bayes' Theorem of Any Use? $\approx$ Maximum Likelihood $\approx$ Utilitarian Justifications $\approx$ The Neyman-Pearson Theory of Testing Statistical Hypotheses $\approx$ Concluding Reflections on the "Justification of Induction"

PART FOUR *Causality and Laws of Nature*

- 14 *Causation as Regular Succession* 251
 The Contingency of Causal Propositions $\approx$ Refinement of a Regularity Analysis $\approx$ The Plurality of Causes $\approx$ Coincidental and Causal Sequences $\approx$ Can a Causal Connection Be Established by a Single Observation? $\approx$ Motivational Causation $\approx$ Contiguity and Memory
- 15 *Counterfactuals and Dispositions* 273
 Material, Analytic, and Causal Implication $\approx$ The Problem of the "Square of Opposition" $\approx$ The Problem of Explicit Definition of Disposition Concepts $\approx$ Probabilistic Dispositions
- 16 *What Is a Law of Nature?* 289
 Lawlike Generalizations and Counterfactual Inference $\approx$ The Criterion of Unrestricted Generality $\approx$ Temporal Invariability $\approx$ Relativistic Invariance $\approx$ Degree of Lawlikeness as Degree of Confirmation
- 17 *Determinism and Indeterminism* 307
 What Is Asserted by "Every Event Has a Cause"? $\approx$ Determination as a Relation between States $\approx$ Statistical Regularity and Microdeterminism $\approx$ Heisenberg's Uncertainty Principle $\approx$ Physical Reality, Probability, and Observation $\approx$ Is Determinism Compatible with Free Will?

PART FIVE *Explanation and Justification*

- 18 *Logical Analysis of Explanation* 343
 Explanation by Subsumption under Laws $\approx$ Subsumptive Explanation of Laws $\approx$ Theoretical Explanation $\approx$ Are Theories Descriptions of Reality or Instruments of Prediction?
- 19 *Teleology and Emergence* 359
 Are Teleological Explanations Scientific? $\approx$ Is Biology Reducible to Physics and Chemistry? $\approx$ Emergent Laws and Emergent Qualities
- 20 *Mind and Behaviorism* 374
 The Subject-Matter of Psychology $\approx$ Intervening Variables $\approx$ The Unconscious $\approx$ Interactionism and Epiphenomenalism $\approx$ Could a Machine Be Conscious?
- 21 *The Analysis of Value Judgments* 410
 Is Normative Science Possible? $\approx$ Metaethical Theories $\approx$ The "Naturalistic Fallacy" and the Question of Synonymy $\approx$ Emotivism or Emotive Naturalism?

GLOSSARY 421

EPILOGUE, *by Brand Blanshard* 427

INDEX 433
