FOREWORD (by Henri Berr).	
THE EFFECT OF ENVIRONMENT ON MAN AND MAN'S EXPLOITATION OF THE EARTH	v
INTRODUCTORY	I
THE PROBLEM OF GEOGRAPHICAL INFLUENCES	I
(1) History and Traditional Position of the Problem	I
(2) Human Geography and its Critics	17
(3) The Plan and Objects of the Book: The Geographical Spirit	25
PART I. HOW THE PROBLEM SHOULD BE STATED	33
CHAP.	
I. SOCIAL MORPHOLOGY OR HUMAN GEOGRAPHY	37
(1) The Objections of Social Morphology: Human Groups without Geographical Roots	38
(2) The Objections of Social Morphology: the Ambition of Geography	44
(3) Ratzel's Mistake: Why he does not cover the whole of Human Geography	49
(4) Human Geography the Heir of History	53
(5) Survivals of the Past: Old Problems and Old Prejudices	57
(6) A Modest Human Geography	62

CHAP.		PAGE
II.	THE QUESTIONS OF PRINCIPLE AND THE METHOD OF RESEARCH. HUMAN EVOLUTION, HISTORIC EVOLUTION	68
	(1) The Objection of Principle: Is there a Science of Geography?	69
	(2) Geography makes no claim to be a Science of Necessities	73
	(3) The Question of Regional Monographs	77
	(4) The Complete Solidarity of Political and Human Geography	82
	(5) The Legitimate Object of Research: The relation of environment to society in its historic evolution	85
 PART II. NATURAL LIMITS AND HUMAN SOCIETY 		
I.	THE PROBLEM OF BOUNDARIES, CLIMATE, AND LIFE	91
	(1) The Traditional Idea of Climate. The Pioneers	91
	(2) Climate and the Human Physical Organism	98
	(3) Climate, Human Character, and Actions	106
	(4) Climatic Action takes place through the Medium of the Vegetable Kingdom	115
II.	THE DETERMINATION OF NATURAL AREAS AND THEIR BOUNDARIES	122
	(1) Complexity of the Idea of Climate	122
	(2) The great Climatico-Botanical Areas in regard to Humanity	127
	(3) The Symmetry of the Terrestrial Organism and the Distribution of Human Societies	137

CONTENTS

xxiii

CHAP.	PAGE
III. NATURAL MAN AN INDIVIDUAL OR A MEMBER OF SOCIETY?	147
(1) The Old Conception: From the Human Pair to the Nation	147
(2) The Antiquity of National Groups	152
(3) Large Homogeneous Human Groups of Ancient Times corresponded with Homogeneous Geographical Areas	157
(4) The Savage and the Barbarian in their Natural State: Their Wants and Customs	162
PART III. POSSIBILITIES AND DIFFERENT WAYS OF LIFE	
I. ITS BASES: MOUNTAINS, PLAINS, AND PLATEAUX	171
(1) The Vicissitudes of Possibility: Recurring Rhythms	172
(2) The Definition of Possibility	181
(3) The Supporting Bases of Mankind—Plains, Plateaux, Mountains	188
II. THE MINOR NATURAL REGIONS AND THEIR BOUNDS: INSULAR UNITS	201
(1) Insularity from the Biological Point of View	203
(2) Island Coasts: The Idea of Littoralism	206
(3) The Productive Coast	213
(4) Island Navigation and Island Isolation	219
(5) The Islands of the Desert: The Oases	225
(6) The Idea of Isolation and its Geographical Value	232

CHAP.		PAGE
III.	TYPICAL WAYS OF LIVING: HUNTING AND FISHING	236
	(1) A Geography of the Needs or of the Manner of Life?	238
	(2) The Classifications of the Economists: The Hypothesis of the Three States	241
	(3) The Hunter Peoples	247
	(4) The Fisher Peoples	256
IV.	SHEPHERDS AND HUSBANDMEN: NOMADIC AND SEDENTARY POPULATIONS	261
	(1) Domestication and Nomadism	261
	(2) The Characteristics of the Pastoral Way of Life	267
	(3) Institutions and Religion of Pastoral Nomads	274
	(4) The Oscillations of Nomadism	281
	(5) Hoe-culture, and the Precarious Nature of Sedentary Existence	286
	(6) The Transitional Types	290
PART IV.	POLITICAL GROUPS AND HUMAN GROUPS	295
I.	THE PROBLEM OF FRONTIERS AND THE NATURAL BOUNDS OF STATES	296
	(1) The Theory of Natural Frontiers	297
	(2) Linear Boundaries or Frontier Zones?	301
	(3) The part played by Psychology	306
	(4) The State is never Natural, but always Man-made	309
	(5) The Natural Regions of States	314

CONTENTS

XXV

CHAP.	PAGE
II. COMMUNICATIONS: THE ROUTES	316
(1) The Track and the Terrain	317
(2) The Functions of Roads: Trade Routes	321
(3) Religious and Intellectual Routes	330
(4) Political Routes and the Genesis of States	334
III. TOWNS	338
(1) Exaggerated Interpretations	338
(2) Fortress Towns	341
(3) Formative Elements and Elements of Growth	344
(4) Man and Urban Possibilities	349
(5) Is the Action of Natural Conditions on Man Weakening?	352

CONCLUSION

THE TASK BEFORE US: BIOLOGICAL METHODS: GEOGRAPHICAL METHODS	358
BIBLIOGRAPHY	369
INDEX	381

MAPS

1. Maximum extent of Pleistocene Glaciers (<i>after De Morgan</i>)	116
2. Glaciers and the expansion of Paleolithic Industry— Chellean and Acheulean types (<i>after De Morgan</i>)	117
3. Rainfall: showing desert, dry, and humid regions	123
4. Northern circumpolar regions, showing the northern limits of sylvan plant life	136
5. Density of Human population	141
6. Distribution of Different ways of living	249
7. The domain of Nomadic Peoples, desert and steppes of Asia and of Africa	280
