PREFACE	xiii
GENERAL INTRODUCTION	xv
 CHAPTER ONE—THE VARIOUS MEANINGS OF THE TERMS 'SCIENCE'	
1. The Terms 'Science' and 'to Know'	1
2. Sensitive and Intellectual Knowledge	2
3. Scientific Knowledge	3
4. The Various Meanings of 'Science' and 'Scientific'	4
 CHAPTER TWO—SCIENCE AS A SYSTEM	
Introduction	7
1. Science is a System	8
2. A Science is Concerned With a Definite Field of Knowl- edge	9
3. Science is Preferably Expressed in Universal Statements	10
4. The Statements of Science Must be True or Probably True	11
5. Science is Concerned With the Essence, Foundation, Causes, and Finality of its Objects	12
6. The Statements of Science Must be Logically Ordered	13
7. Science Must Explain its Investigations and Arguments	13
8. Descriptive Definition of Science	14
9. Further Division of this Work	14
 CHAPTER THREE—ABSTRACTION IN SCIENCE	
I. The Meaning of Abstraction	16
II. Total Abstraction	17
1. The Meaning of Total Abstraction	17
2. Total Abstraction Does Not Falsify Reality	18
3. Total Abstraction, Universality, and Necessity	18
4. Total Abstraction and the Division of the Sciences	19

	PAGE
CHAPTER SEVEN—SCIENTIFIC METHODS	55
Introduction. Method in General	55
I. Deduction and Induction	57
1. Explanation of Terms. Difference Between Abstractly General and Collectively General	57
2. Deduction	60
3. Pseudo-Deduction	62
4. Induction in General. Different Kinds of Induction	65
5. Complete Induction and by-Analogy-Completed Induction	68
6. Schema of Deduction and Induction	70
II. Analytic and Synthetic Methods. <i>A Posteriori</i> and <i>A Priori</i> Methods	72
1. Analytic and <i>A Posteriori</i> Methods	72
2. Synthetic and <i>A Priori</i> Methods	73
3. The Connection Between Analysis and Synthesis on the One Hand, and Induction and Deduction on the Other	74
4. Combination of Methods: Deductive-Inductive, Analytico-Synthetic Methods	75
5. Some Remarks Concerning the Use of Analysis and Synthesis	76
CHAPTER EIGHT—INCOMPLETE OR SCIENTIFIC INDUCTION	77
Introduction	77
I. The Proper Character of Scientific Induction	78
II. Critical Examination of the Foundation of Scientific Induction	81
1. Immediate Foundation	81
2. Ultimate Foundation	82
III. The Meaning and Foundation of the Principle of Regularity	83
1. The Meaning and Foundation of Regularity	83
2. Regularity and Free Causes	85
3. Regularity and Necessary Causes	85
4. Regularity and Probability	86
IV. The Species-Individual Structure	89

	PAGE
III. Formal and Analytic Abstraction	20
1. The Meaning of Formal Abstraction	20
2. The Meaning of Analytic Abstraction	22
3. Formal Abstraction Does Not Falsify Reality	23
4. Formal Abstraction, Universality, and Necessity	23
5. Formal Abstraction and the Division of the Sciences	24
6. Formal and Total Abstraction	25
IV. Degrees of Abstraction	26
1. First Level of Abstraction	27
2. Second Level of Abstraction	28
3. Third Level of Abstraction	29
4. Levels of Abstraction and Cognitive Functions ...	29
5. Abstraction and Knowability	31
6. Gradation on the Same Level of Abstraction	32
V. Simplifying or Idealizing Abstraction	33
CHAPTER FOUR—NECESSITY IN SCIENCE	35
I. Absolute Necessity	35
II. Hypothetical Necessity	36
1. Necessity in the Mathematical Order or Math-	
ematical Necessity	36
2. Necessity in the Physical Order or Physical	
Necessity	37
3. Necessity in the Order of Human Activities or	
Moral Necessity	39
III. Necessity and Contingency	41
CHAPTER FIVE—THE OBJECT OF SCIENCE	43
1. Material and Formal Object	43
2. Division of Sciences According to the Object	45
3. Specialization and Integration	49
CHAPTER SIX—THE FOUNDATION OF SCIENCE	50
1. Starting Point and Presuppositions	50
2. Truth of the Foundation of a Science	53
3. Starting Point and the Division of Sciences	54
4. Starting Point and the Subordination of Sciences	54

	PAGE
V. Problems Concerning the Combination of Experiential Data	92
1. Irrelevancy of Time	92
2. Irrelevancy of Place	93
VI. The Foundation of the Special Methods of Investigation	94
1. Acausal Induction	95
2. Causal Induction	95
3. The Principles upon Which the Methods are Based	96
4. Special Norms of Scientific Investigation	97
VII. Character and Value of the General Conclusions Obtained by Scientific Induction	99
VIII. Various Philosophical Views of Scientific Induction ..	100
IX. Some Remarks Concerning the History of Scientific Induction	102
CHAPTER NINE—HYPOTHESIS AND THEORY	104
Introduction	104
I. The Theory in the Ideal Sciences	105
II. The Theory in the Experiential Sciences	107
1. Theories of a Temporary Nature	108
2. Theories of a Permanent Nature	110
a. Phenomenological or Descriptive Theories	111
b. Explanatory Theories	114
III. The Formulation of Hypotheses and Theories	117
1. General Difficulties in the Formulation of a Hypothesis	118
2. Hypothesis and Analogy	119
3. Dangers of Inexpert Use of Analogy. Superfluous Elements in a Hypothesis	121
IV. The Verification of Hypotheses and Theories	123
1. General Considerations	123
2. First Rule of Verification	126
3. Second Rule of Verification	127
4. The Use of Verified Theories	128

	PAGE
V. The Truth Value of Theories in the Sciences of Experience	129
1. The Idealistic View	130
2. The Positivistic View	130
3. The Realistic View	131
CHAPTER TEN—DEMONSTRATION IN SCIENCE	134
Introduction	134
I. The Strict Demonstration or Apodictic Proof	135
1. True and Certain Premises	136
2. The Character of Necessity of the Apodictic Proof	137
II. The Probable Argument	138
1. General Considerations	138
2. Proof from Analogy	139
a. The Principle of Analogy	139
b. Analogy in Essential Points	140
c. Examples of the Use of Analogy in Science	141
d. <i>A Pari</i> and <i>A Fortiori</i> Proofs	142
3. Convergence	143
III. The Causal and Factual Proofs	144
1. The Causal Proof	144
2. The Factual Proof	147
IV. <i>A Priori</i> , <i>A Posteriori</i> , <i>A Simultaneo</i> , and Circular Proofs	148
V. The Indirect Proof	151
1. The Indirect Proof in the Narrow Sense	151
2. The Proof by Exclusion	151
3. The Proof by Reduction to Absurdity	151
4. The Proof from Silence	152
5. The Proofs Against Opponents	153
VI. The Argument from Authority	154
1. General Considerations	154
2. Requirements of the Argument from Authority	154
3. Communications Through Intermediaries	157
4. Value of the Argument from Authority	157
INDEX OF SUBJECT MATTER	161
