

Dr.-techn. Jivka Ovtcharova, Darmstadt

A Framework for Feature- Based Product Design

**Fundamental Principles,
System concepts, Applications**

Reihe **20**: Rechnerunterstützte
Verfahren

Nr. **241**

Contents

Acknowledgements	III
List of Abbreviations	XIV
Preface	XVII
Abstract	XX
Chapter 1. Introduction	1
1.1 Feature-Based Product Design: Problems, Methods, Tools	4
1.1.1 Problems	4
1.1.2 Methods	5
1.1.3 Tools	6
1.2 Feature: What It Is and What It Is Not	7
1.3 Requirements for Feature-Based Product Design	8
1.4 Outline of the Thesis	11
1.4.1 Objectives	12
1.4.2 Organization	14
Chapter 2. State-of-the-Art in Feature Technology	16
2.1 Introduction	16

2.2 Geometry–Based Modeling Methods in the Context of Feature–Based Product Design	17
2.2.1 Wireframe Modeling	18
2.2.2 Surface Modeling	19
2.2.3 Solid Modeling	20
2.2.3.1 Boundary Representation (BRep)	21
2.2.3.2 Constructive Solid Geometry (CSG)	23
2.2.3.3 Hybrid CSG/BRep Models	23
2.2.4 Non–Manifold Modeling	25
2.2.5 Parametric Modeling	26
2.2.6 Constraint–Based Modeling	27
2.2.7 Limitations of Geometry–Based Modeling Methods	28
2.3 Definition and Systematization of Features in Product Design	29
2.3.1 Feature Definition	30
2.3.2 Feature Systematization	32
2.3.2.1 Scheme of Wilson and Pratt	33
2.3.2.2 Scheme of Deere	34
2.3.2.3 Scheme of Shah	35
2.3.2.4 Scheme of STEP, Part 214	36
2.4 Feature Modeling Methods, Design Systems, and Applications	41
2.4.1 Feature Modeling Methods	41
2.4.1.1 Feature Recognition	41
2.4.1.2 Design by Features	44
2.4.1.3 Integration of Design by Features and Feature Recognition	45

2.4.2 Assessment of Feature–based Design Systems	45
2.4.2.1 Criteria	45
2.4.2.2 Research Systems	46
2.4.2.3 Commercial Systems	52
2.4.2.4 Assessment Results	58
2.4.3 Applications	58
2.4.3.1 Design	60
2.4.3.2 Process Planning	60
2.4.3.3 Manufacturing	61
2.4.3.4 Inspection	61
2.5 Discussion	61

Part I

THEORETICAL PRINCIPLES 63

Chapter 3. Theoretical Principles of Features 64

3.1 Introduction	64
3.2 An Ontological Approach to the Terms <i>Product</i> and <i>Feature</i>	65
3.2.1 Main Principles of Ontology	65
3.2.2 Applying Ontology to Products and Features	69
3.3 An Object–Oriented Approach to the Terms <i>Product</i> and <i>Feature</i>	73
3.3.1 Main Principles of Object Orientation	73
3.3.1.1 What is <i>Object–Oriented</i> ?	73
3.3.1.2 Terms and Definitions	74

3.3.1.3	Objects and Data	76
3.3.1.4	Object–Oriented Formal Languages	77
3.3.2	Applying Object Orientation to Products and Features	79
3.3.2.1	An Object–Oriented Formal Specification of Features in EXPRESS	80
3.3.2.2	An Example	81
3.4	Discussion	88
 Chapter 4. Theoretical Principles of Feature–Based Product Design		 91
4.1	Introduction	91
4.2	Main Principles of the General Design Theory	92
4.2.1	General Design Theory	93
4.2.1.1	Definitions	94
4.2.1.2	Axioms	96
4.2.1.3	Theorems	97
4.2.2	Extended General Design Theory	102
4.2.2.1	Definitions	102
4.2.2.2	Meta Model	103
4.2.2.3	Function and Function Element	105
4.2.2.4	Applications	107
4.3	Applying General Design Theory to Feature–Based Product Design	110
4.3.1	Assumptions	110
4.3.2	Definitions	114

4.3.3 Recommendations for a Feature–Based Product Design	115
4.3.3.1 <i>Designing by Features via Meta Model</i>	116
4.3.3.2 Extensional and Intensional Feature–Based Product Representation	116
4.4 An Example	116
4.5 Discussion	120
Results of Part I: Theoretical Principles	122
Part II	
SYSTEM CONCEPTS	123
Chapter 5. Systematization of Features in Product Design	124
5.1 Introduction	124
5.2 Hierarchy of Features in Product Design	126
5.2.1 Product Design Features	127
5.2.2 Generic Features	129
5.2.3 Geometrical and Topological Evaluation	130
5.3 Systematization of Features in Product Design	130
5.3.1 Systematization of Product Design Features	130
5.3.1.1 Predefined Product Design Features	136
5.3.1.2 User–defined Product Design Features	136
5.3.1.3 Some Specific Product Design Features	137
5.3.2 Systematization of Generic Features	142
5.3.2.1 Form Features	142

5.3.2.2 Assembly Features	153
5.3.2.3 Material Features	154
5.3.2.4 Precision Features	154
5.4 Discussion	154

Chapter 6. A Reference Model for Feature–Based Product Design Systems 156

6.1 Introduction	156
6.2 Feature–Based Product Design Systems as Applications within an Open CAD Environment	158
6.2.1 Overview of the Open CAD Environment in the Context of the CAD Reference Model	158
6.2.2 Requirements of the Open CAD Environment to Support Feature–Based Product Design	160
6.2.2.1 User Interface System	160
6.2.2.2 Application	161
6.2.2.3 Constraints Solvers	161
6.2.2.4 Solid Modeler	163
6.2.2.5 Product Database	164
6.3 A Reference Model for Feature–Based Product Design Systems	166
6.3.1 Resources	166
6.3.1.1 Feature Libraries	166
6.3.1.2 Feature–Based Models	168
6.3.2 Tools	170
6.3.2.1 Feature Modeler	170

6.3.2.2 Semantic Consistency Manager	172
6.3.2.3 Feature Editor	173
6.3.2.4 Feature Evaluation Tool	173
6.3.2.5 Solid Modeler Interface	174
6.3.3 Reference Architecture	174
6.4 Discussion	176
Results of Part II: System Concepts	177
Part III	
APPLICATIONS	178
Chapter 7. SINFONIA as a Prototype of a Feature-Based Product Design System	179
7.1 Introduction	179
7.2 Architecture	180
7.2.1 CAD Environment	180
7.2.2 Requirements	183
7.2.3 The SINFONIA System	184
7.3 The Feature Modeler Component	189
7.4 An Example	192
7.5 Discussion	196
Chapter 8. Applications	197

8.1 Introduction	197
8.2 An Integrated System for Design by Features and Feature Recognition	197
8.3 An Integrated Rapid Prototyping Process Chain	200
Results of Part III: Applications	206
Chapter 9. Conclusion and Future Work	207
9.1 Contributions	207
9.2 Areas for Future Work	210
Bibliography	212
Glossary	234
