<b>Preface</b>	v
<b>Acknowledgements</b>	vi
Chapter	
<b>1. Introduction</b>	
A. Scope of Multivariate Analysis	1
B. Types of Data	2
C. Problems and Methods	9
<b>2. The Multivariate Normal Distribution</b>	
A. Generalization of the Normal Distribution	13
B. The Multivariate Central Limit Theorem	14
C. The Wishart Distribution	15
D. Tests of Significance	15
E. Heterogeneity of Variances and Covariances; Transformations	16
<b>3. Principal Component Analysis</b>	
A. Procedure and Aims	18
B. Mathematical Treatment	18
C. Standardization	19
D. Tests of Significance	20
E. Applications	21
F. Principal Coordinates	24
<b>4. Canonical Variables</b>	
A. The Generalization of Multiple Regression	26
B. Mathematical Formulation	27
C. Tests of Significance	28
D. Applications	31
<b>5. Discriminant Analysis</b>	
A. Aims and Illustrations	32

B. Multivariate Analysis of Variance	33
C. Discrimination Between Two Groups	33
D. The Generalized Distance	35
E. Prior Information and Unequal Risks	37
F. Unequal Dispersion Matrices	37
G. A Distribution-Free Method	38
H. Quadratic Discriminant Functions	39
I. Estimation of the Proportion Misclassified	39
J. Concomitant Observations	40
K. Discrimination with More than Two Groups	42
<b>6. Factor Analysis</b>	
A. Basic Concepts	44
B. The Estimation Problem; Lawley's Method	46
C. Principal Components and Factor Analysis	48
D. Other Factor Models	48
E. Reification	49
F. Applications	50
<b>7. Distance, Similarity and Scaling</b>	
A. Distance as a Measure of Dissimilarity	51
B. Similarity and Dissimilarity Measures	53
C. Multidimensional Scaling	55
D. Applications	56
<b>8. Cluster Analysis and Related Problems</b>	
A. Introduction	59
B. Dissection	60
C. Clustering of Variables	61
D. Nested Groupings and Dendrograms	62
E. Classification or Cluster Analysis	67
<b>9. Examples</b>	
A. The Egyptian Skulls	79
B. Locomotor Discrimination in Primates	83
C. Studies of Soil Classification and Mapping	85
<b>Appendix A. Elements of Matrix Algebra</b>	
A. Introduction	90
B. Elementary Matrix Manipulations	91
C. Singular and Ill-Conditioned Matrices	93
D. Determinants	94
E. Pivotal Condensation	96
F. Transformations and Change of Axes	97
G. Quadratic Forms	98

<b>Appendix B. Multiple Regression</b>	
A. Basic Mathematics	101
B. Miscellaneous Applications	102
C. Selection of Variables	104
<b>Appendix C. Special Problems in Various Fields</b>	
A. Introduction	106
B. Taxonomy	106
C. Medicine and Psychiatry	107
D. Psychology	108
E. Soil Science	108
F. Archaeology	109
<b>References and Author Index</b>	111
<b>Subject Index</b>	115
