Contents

	Preface	iii
	Constants and Conversion Factors	viii
1	First Law of Thermodynamics	1
2	Second and Third Laws of Thermodynamics	19
3	The Gaseous State	47
4	Liquids, Vapours and Solutions	58
5	Surface Chemistry and Macromolecular Systems	86
6	Transport Numbers, Conductance and Ionic Equilibria	106
7	Electrochemical Cells	130
8	Phase Equilibria	151
9	Reaction Kinetics	171
10	Spectra and Statistical Thermodynamics	207
11	The Crystalline State	245
12	Radiochemistry	253
13	Statistical Treatment of Data	272
	Answers to Additional Examples	284
	Index	295
	Logarithm Tables	300
	Antilogarithm Tables	302
