

Contents

To the Student	xix
To the Instructor	xxi
Chapter 1	
Introduction to Chemistry: What Is Chemistry?	1
Goals	1
What Do Chemists Do?	2
Synthesis / Determination of properties / Formulation / Manufacture / Analysis / Theory	
Chemistry—A Science	10
Science and scientific method / Natural science / Formal definition of chemistry / Areas of chemistry	
Classification of Chemical Substances	17
Gases, liquids, and solids: States of matter / Pure substances: Elements and compounds / Mixtures: Homogeneous and heterogeneous	
<i>Program: Classifying Matter</i>	27
Changes in Matter: Physical and Chemical Changes	28
<i>Program: Classifying Changes in Matter</i>	29
Properties of Matter: Physical and Chemical Properties	30
Study Guide	32
Terms to learn / Skill practice problems / Questions for discussion	
Chapter 2	
The Study of Chemistry: How to Succeed by Trying	35
Goals	35
Reasons for Studying Chemistry	36
Why the Study of Chemistry Is Challenging	37
Aids to the Study of Chemistry	38

Activities to Facilitate Learning	39
Study Guide	43
Questions and activities	
Chapter 3	
Chemistry and Society	45
Goals	45
Law Enforcement: Forensic Chemistry	46
Federal Government: Regulatory and Task-Oriented Agencies	49
FDA: Artificial sweeteners / EPA: The Times Beach story /	
NIH: Search for new drugs	
Industry	53
Educational Institutions	54
Religious Thought	54
Example: The Dead Sea scrolls	
Topics for Advanced Study: Federal Agencies	57
Food and Drug Administration (FDA) / Federal Trade	
Commission (FTC) / Environmental Protection Agency	
(EPA) / Occupational Safety and Health Agency (OSHA) /	
National Science Foundation (NSF) / National Institutes of	
Health (NIH) / National Bureau of Standards (NBS) /	
Other agencies	
Study Guide	61
Terms to learn / Questions for discussion	
Chapter 4	
Measurements, Conversions, and Energy	63
Goals	63
Scientific Notation	64
<i>Program: Expressing Numbers in Scientific Notation</i>	65
The Metric System of Measurement	69
<i>Program: Unit Conversions</i>	72
Simple (one-step) conversion	72
Multistep single-unit conversions	77
Significant Figures—Precision of Measurement	83
Energy	85
Temperature	86
The three temperature scales / Comparison of the	
three scales	
<i>Program: Temperature Conversions</i>	89
Percent Calculations	93
<i>Program: Calculating Percent</i>	93
Applications	95

Study Guide	96
Terms to learn / Skill practice problems	
Chapter 5	
What Is Matter Really Like?	99
Goals	99
Ancient Thought on the Nature of Matter	100
Early Use of Materials	101
Basic Laws of Matter	104
Dalton's Atomic Theory	107
Modern Atomic Theory	107
Subatomic particles / The nuclear atom / Terms associated with atomic structure / Numbers of subatomic particles	
<i>Program: Calculating Numbers of Subatomic Particles</i>	<i>119</i>
Study Guide	121
Terms to learn / Skill practice problems	
Chapter 6	
Electronic Structure of Atoms	123
Goals	123
The Periodic Law and the Periodic Chart	124
Light and Color	126
Electronic Energy Levels in Atoms	133
Atomic Orbitals	135
Electronic Structure and the Periodic Chart	138
Production of Colored Light	138
Study Guide	138
Terms to learn / Skill practice problems	
Chapter 7	
Chemical Change	141
Goals	141
The Language of Chemistry	142
Chemical equations / Chemical formulas / Balancing equations	
<i>Program: Balancing Chemical Equations</i>	<i>146</i>
Bonding	151
The octet rule: Why bonding occurs / Ionic bonding / Covalent bonding / Polar covalent bonding / Metallic bonding	
<i>Program: Determining Types of Bonds</i>	<i>160</i>
Solubility: How to Dissolve Materials	161

Physiological Properties of Elements and Compounds	162
Study Guide	163
Terms to learn / Skill practice problems	
Chapter 8	
The Mole Concept: Counting Atoms and Molecules	165
Goals	165
The Mole Concept	167
Calculations Using the Mole Concept	170
<i>Program: Calculating Number of Moles and Molecules or Atoms of a Substance</i>	<i>172</i>
Applications of the Mole Concept	175
Study Guide	176
Terms to learn / Skill practice problems	
Chapter 9	
The States of Matter	177
Goals	177
Kinetic Molecular Theory	178
Attractive forces between molecules / Distance between molecules / Motion of molecules / Ordering of molecules	
Phase Changes	180
Solids	185
Liquids	189
Liquid crystals—A special class	
Gases	192
Air / Behavior of gases	
Study Guide	198
Terms to learn / Skill practice problems	
Chapter 10	
Inorganic Chemistry	201
Goals	201
Inorganic Nomenclature	202
An outline of the inorganic system	
<i>Program: Naming Inorganic Compounds</i>	<i>208</i>
<i>Writing names for compounds whose formulas are known</i>	<i>210</i>
<i>Writing formulas for compounds whose names are known</i>	<i>217</i>
Chem-Deck / Chemantics	
Acidity and the pH Scale	217

Common Inorganic Materials	220
Fertilizers / Industrial and household inorganic compounds / Paint pigments	
Hard Water	224
Softening hard water / Hard water: Implications for consumers	
Study Guide	230
Terms to learn / Skill practice problems	
Chapter 11	
Organic Chemistry	233
Goals	233
Organic Compounds	234
Classification of Organic Compounds: Functional Groups	237
Alkanes and substituted alkanes	
<i>Program: Naming Alkanes and Substituted Alkanes</i>	239
Structure to name	239
Name to structure	248
Other functional groups / Learning the functional groups	
Synthetic Organic Chemistry	266
Envisioning a compound for a special purpose / Preparing the envisioned compound	
Common Applications of Organic Chemistry	271
Petroleum chemistry / Plastics and coatings / Medical applications of polymers / Organic chemicals for farm and garden use	
Study Guide	285
Terms to learn / Skill practice problems	
Chapter 12	
Chemistry and the Environment	289
Goals	289
The Problem of Pollution	290
Air Pollution	293
Industrial air pollution / Chemistry of the internal combustion engine: Automotive air pollution	
Water Pollution	312
Sources and effects of water pollution / The food chain / Solution to water pollution	
Land Pollution	318
The Pollution Game	320
Study Guide	320
Terms to learn / Skill practice problems / Questions for discussion	

Chapter 13	
Nuclear Chemistry	323
Goals	323
Nuclear Reactions	324
Natural Radioactivity	325
Measuring radioactivity / Half-life and radioisotope dating / Medical applications of natural radioactivity	
Transmutation	336
Nuclear Fission	338
Fission bombs / Fission reactors	
Fusion	346
Development of Nuclear Power	348
Study Guide	351
Terms to learn / Skill practice problems / Questions for discussion	
Chapter 14	
The Chemistry of Energy Production	353
Goals	353
Energy of Chemical Changes	354
Energy Needs	357
Heating / Cooling / Mechanical energy / Light	
Energy Sources	362
Fossil fuels / Solar energy / Nuclear energy / Hydroelectric power / Wind / Geothermal heat / Electrochemical energy / Synthetic fuels / Renewable energy sources	
Is There an Energy Crisis?	379
Study Guide	383
Terms to learn / Skill practice problems	
Chapter 15	
Biochemistry and Nutrition	385
Goals	385
Biochemistry—An Overview	386
Basic categories of biomolecules / Human nutritional needs / Basic categories of biochemical processes / The living cell	
Biomolecules	390
Amino acids and proteins / Carbohydrates / Fats / Vitamins and minerals / Nucleic acids	
Human Nutrition: Selected Topics	405
Weight control / Evaluating your own diet /	

Food additives / Natural and commercial foods / Hyperactivity / Dietary controversies / Artificial sweeteners	
Study Guide	427
Terms to learn / Skill practice problems	
Chapter 16	
Medicinal Chemistry for the Consumer	429
Goals	429
Drugs and Their Use	430
Common Medicinal Drugs	431
Aspirin / Acetaminophen / Penicillin / Sulfa drugs / Benzocaine / Dextromethorphan / Cetylpyridinium chloride / Topical antiseptics / Birth control pills	
Common Nonmedicinal Drugs	442
Ethyl alcohol / Barbiturates / Amphetamines / Lysergic acid diethylamide / Caffeine / Tobacco	
Medicinal Chemical Research	453
Sale and Advertising of Drugs	456
Brand names and generic names / Safety in packing	
Personal Use of Drugs	458
Study Guide	460
Terms to learn / Skill practice problems / Questions for discussion	
Chapter 17	
Household Chemistry	463
Goals	463
Cleaning Products	464
Soaps and detergents / Soap additives / Household bleach formulations / Window cleaners / Drain cleaners / Toilet bowl cleaners / Tub cleaners / Shampoo / Stain and material removers	
Chemistry of Fibers	479
Natural fibers / Synthetic fibers / Properties of fibers	
Preventing and Extinguishing Fires	485
Fireproofing / Fire extinguishing	
Chemistry of Cooking: Selected Topics	488
Cooking meat / Cooking fish / Preventing fruits from darkening / Curing meat / Boiling eggs / Leavening agents	
In Conclusion: A Note on Ingredients of Household Products	493
Study Guide	494
Terms to learn / Skill practice problems	

Appendix A	
Metric and United States Measurements	A-1
Metric Prefixes	A-2
Abbreviations	A-2
Conversion Tables	A-3
Length / Volume / Mass (weight)	
Appendix B	
Operations Using Scientific Notation	B-1
Multiplication and Division	B-2
<i>Program: Multiplying and Dividing Exponential Numbers</i>	B-2
Appendix C	
Complex Conversions	C-1
<i>Program: One-Step Conversions Using Units with Exponents</i>	C-2
<i>Program: Complex Conversions</i>	C-7
Appendix D	
Electronic Structure of Atoms: Further Studies	D-1
Quantum Mechanical Ideas	D-2
Atomic Orbitals	D-2
Electron Structures of Atoms	D-5
The electron game / The Aufbau rules / Expressing electron structures	
<i>Program: Writing Electron Structures of Atoms</i>	D-9
Appendix E	
Calculations Using Chemical Formulas and Equations	E-1
Calculating Empirical Formulas from Percent Composition	E-2
<i>Program: Calculating Empirical Formulas</i>	E-3
Calculating Molecular Formulas from Empirical Formulas	E-8
<i>Program: Calculating Molecular Formulas</i>	E-9
Calculating Percent Composition from Formulas	E-10
<i>Program: Calculating Percents from Formulas</i>	E-11
Stoichiometry	E-13
<i>Program: Stoichiometric Problems</i>	E-16
Study Guide	E-20
Skill practice problems	

Appendix F	
Common Chemicals	F-1
Glossary	G-1
Answers to Skill Practice Problems	ANS-1
Index	I-1
