	<i>Preface</i>	vii	
CHAPTER 1.	Linear Algebra		1
1.1	<i>Linear Equations. Summation Convention</i>	1	
1.2	<i>Matrices</i>	5	
1.3	<i>Determinants</i>	9	
1.4	<i>Systems of Linear Algebraic Equations. Rank of a Matrix</i>	15	
1.5	<i>Vector Spaces</i>	19	
1.6	<i>Scalar Product</i>	26	
1.7	<i>Orthonormal Basis. Linear Transformations</i>	31	
1.8	<i>Quadratic Forms. Hermitian Forms</i>	36	
1.9	<i>Systems of Ordinary Differential Equations. Vibration Problems</i>	45	
1.10	<i>Linear Programming</i>	51	
CHAPTER 2.	Hilbert Spaces		59
2.1	<i>Infinite-dimensional Vector Spaces. Function Spaces</i>	59	
2.2	<i>Fourier Series</i>	68	
2.3	<i>Separable Hilbert Spaces</i>	76	
2.4	<i>The Projection Theorem</i>	80	
2.5	<i>Linear Functionals</i>	83	
2.6	<i>Weak Convergence</i>	84	
2.7	<i>Linear Operators</i>	88	
2.8	<i>Completely Continuous Operators</i>	93	
CHAPTER 3.	Calculus of Variations		101
3.1	<i>Maxima and Minima of Functions. Lagrange Multipliers</i>	101	
3.2	<i>Maxima and Minima of Functionals. Euler's Equation</i>	109	
3.3	<i>Hamilton's Principle. Lagrange's Equations</i>	122	

	3.4	<i>Theory of Small Vibrations</i>	129	
	3.5	<i>The Vibrating String</i>	132	
	3.6	<i>Boundary-value Problems of Mathematical Physics</i>		141
	3.7	<i>Eigenvalues and Eigenfunctions</i>	149	
	3.8	<i>Eigenfunction Expansions</i>	158	
	3.9	<i>Upper and Lower Bounds for Eigenvalues</i>		161
CHAPTER 4.		Boundary-value Problems. Separation of Variables		170
	4.1	<i>Orthogonal Coordinate Systems. Separation of Variables</i>		170
	4.2	<i>Sturm-Liouville Problems</i>	181	
	4.3	<i>Series Solutions of Ordinary Differential Equations</i>		195
	4.4	<i>Series Solutions of Boundary-value Problems</i>		210
CHAPTER 5.		Boundary-value Problems. Green's Functions		218
	5.1	<i>Nonhomogeneous Boundary-value Problems</i>		218
	5.2	<i>One-dimensional Green's Functions</i>	224	
	5.3	<i>Generalized Functions</i>	235	
	5.4	<i>Green's Functions in Higher Dimensions</i>		243
	5.5	<i>Problems in Unbounded Regions</i>	248	
	5.6	<i>A Problem in Diffraction Theory</i>	259	
CHAPTER 6.		Integral Equations		267
	6.1	<i>Integral-equation Formulation of Boundary-value Problems</i>		267
	6.2	<i>Hilbert-Schmidt Theory</i>	271	
	6.3	<i>Fredholm Theory</i>	287	
	6.4	<i>Integral Equations of the First Kind</i>		300
CHAPTER 7.		Analytic Function Theory		307
	7.1	<i>Introduction</i>	307	
	7.2	<i>Analytic Functions</i>	311	
	7.3	<i>Elementary Functions</i>	317	
	7.4	<i>Complex Integration</i>	321	
	7.5	<i>Integral Representations</i>	327	
	7.6	<i>Sequences and Series</i>	333	
	7.7	<i>Series Representations of Analytic Functions</i>		341
	7.8	<i>Contour Integration</i>	347	
	7.9	<i>Conformal Mapping</i>	352	
	7.10	<i>Potential Theory</i>	360	
CHAPTER 8.		Integral Transform Methods		368
	8.1	<i>Fourier Transforms</i>	368	
	8.2	<i>Applications of Fourier Transforms. Ordinary Differential Equations</i>		379

8.3	<i>Applications of Fourier Transforms. Partial Differential Equations</i>	385	
8.4	<i>Applications of Fourier Transforms. Integral Equations</i>		393
8.5	<i>Laplace Transforms. Applications</i>	399	
8.6	<i>Other Transform Techniques</i>	412	
	<i>Index</i>	419
