

Joining Ceramics, Glass and Metal

Lectures and poster show contributions
of the 5th International Conference
taking place in Jena on May, 12–14, 1997

Organizer:

Deutsche Glastechnische Gesellschaft e.V. (DGG)
Deutsche Gesellschaft für Materialkunde e.V. (DGM)
Deutsche Keramische Gesellschaft e.V. (DKG)
Deutscher Verband für Schweißtechnik e.V. (DVS)

Table of contents

Preface

Plenary Lecture

M. Turwitt, Mülheim

Metal/ceramic joints – An overview 1

Joining techniques I

S. Kasch, G. Köhler, H. Müller, Jena, R. Daferner, D. Mund and H. Paschke, Landshut

Application of laser-beam soldering for joining ceramics and glasses by using solder glasses 15

H. K. Tönshoff, F. von Alvensleben and C. Graumann, Hannover

Joining of Al₂O₃ with a CO₂-Laser 18

R. S. Dohedoe, D. Holland, Coventry, and W. B. Hanson, Cambridge

Strength and microstructure of silicon nitride ceramics joined using magnesium aluminosilicate glass-ceramics 23

M. Futakawa, Ibaraki-ken, and R. W. Steinbrech, Jülich

Oxide scale bonding of SiSiC 26

Joining techniques II

J. E. Indacochea, Illinois, and W. Tillmann, Schaan

Joining techniques in advanced ceramics 29

L. Dorn and N. Munasinghe, Berlin

Development of new active brazing procedure for ceramic-metal joints for elevated service temperatures 34

A. Gasse, G. Chaumat and F. Saint-Antonin, Grenoble

Brazing of siliconcarbide with non reactive Co-Si alloys 37

Joining techniques III

U. Schlicker, E. Roeder and D. Eifler, Kaiserslautern

Joining of glasses with metals by ultrasonic roll seam welding 39

M. J. Greitmann and K. Zuckschwerdt, Stuttgart

Ultrasonic welding of ceramic/metal joints 42

K. Kaschlik, J. Pfeifer, Ch. Stopsack, S. Wächter, H. Bartuch and G. Köhler, Jena

Micro bonding techniques for high temperature stable fibre optic sensors 45

G. Soyez, G. Elssner, G. Petzow and M. Rühle, Stuttgart	
Diffusion bonded dental implants	51
 Joining techniques IV	
H. Lange, M. Dogigli and M. Bickel, Karlsfeld	
Ceramic fasteners for high temperature applications	55
W. Brockmann, M. Graf and S. Lotz, Kaiserslautern	
Long term durability and shear stress strain behaviour of adhesive bonded glass joints . . .	59
 Fundamentals	
F. J. J. van Loo and A. A. Kodentsov, Eindhoven	
Diffusion bonding of Si-containing ceramics to transition metals: Chemical aspects	60
M. Diemer, M. Hoffmann, A. Neubrand, J. Rödel, Darmstadt, H. Müllejans and M. Rühle, Stuttgart	
The role of oxygen partial pressure on the wetting behaviour and the interface chemistry of copper-alumina interfaces	64
H. J. Grabke, Düsseldorf	
The role of the interface oxide/metal in high temperature oxidation and corrosion	68
 Applications	
P. Batfalsky, U. Diekmann, J. Godziemba-Maliszewski and T. Koppitz, Jülich	
Joining and sealing of anode-supported planar SOFC stacks using glass and glass	72
K. Schwab, H. Baier, W. Schäfer and D. Stolten, Friedrichshafen	
Thermomechanical analysis of the joining process of a planar, ceramic hightemperature fuel cell system	76
H. van Benthem, Münster	
Parameters improving the quality of manually laser welded dentures	79
F. Sernetz and F. Binder, Ispringen	
Improvement of bond strength of orthodontic titanium brackets and tubes by laser structuring	82
 New concepts	
A. PlöbI and H. Stenzel, Halle	
Ultrahigh-vacuum-bonding of silicon wafers	85
K. Ikeuchi, A. Morsy, K. Ishizaki and M. Ushio, Osaka	
Interfacial phenomena in field-assisted bonding and debonding processes of glass-kovar alloy joint	88
B. Fritsche, A. Satir-Kolorz, Dübendorf, and H. K. Feichtinger, Zürich	
Joining of zirconia to metal by applying an electric potential	92

Interface reactions

- J. C. Feng, Harbin, T. Fukai, M. Nakra, Osaka, and J. C. Schuster, Wien
Interfacial structure and phase reactions in SiC/metal couples 94
- M. Ilmer, M. Seibold, A. Langer, Augsburg, and C. Rüssel, Jena
Studies of the interface silica glass – yttria-doped molybdenum 98
- T. Fujimura and S. Tanaka, Yokohama
In-Situ high temperature X-ray diffraction study of Ni/Al₂O₃ interface reaction 101

Materials engineering I

- W. König, H.-D. Schnabel and T. Moritz, Zwickau
Joining by active metal brazing – variation of active components 103
- V. Düwel, H. Haniel, A. Schram and W. Xia
New aspects for the production of metal/ceramic bonds by modification of the ceramic
joining component 106

Materials engineering II

- H. R. Maier, M. Magin, W. Kruhöffler and F. Schmitz, Aachen
Reliability analysis of active brazed ceramic-metal-joints 110
- B. Wielage and H. Schüler, Chemnitz
Simulation of thermal residual stresses in brazed metal-ceramic joints using the Finite
Element Method 114
- M. A. Sckuhr, A. Brückner-Foit, D. Munz and Y. Y. Yang, Karlsruhe
Stresses near the singular point of a two materials joint considering elastic-plastic material
behaviour 117
- S. Nagasawa, Y. Fukuzawa, H. Takahashi, T. Yamada, Nagaoka, H. Sakuta
and M. Tateno, Tokyo
Analysis of cooling effects on residual stress distribution of joined cylindrical dissimilar
materials 120

Materials engineering III

- T. Meininghaus, H. Schüler, H.-D. Steffens, J. Wilden, Dortmund, and B. Wielage, Chemnitz
An approach to simulate successive processes – brazing ceramic and metal by means of
PVD-coating 122
- H. Dannheim, M. Faber, Erlangen, D. Brunner, Bindlach, E. Auerswald, R. Dudek and
W. Faust, Chemnitz
Active brazed copper layer on AlN-ceramic 126

New filler materials

- M. Ito, S. Iio, Y. Matsuo and T. Tanaka, Iwasaki
Al alloy/ceramics joining with a low-melting-point-braze 129
- E. Lugscheider and I. Buschke, Aachen
New Ni-Hf-based filler metals for hightemperature joining of innovative materials 132

Mechanical properties of joints

- G. H. M. Gubbels, J. P. G. M. van Eijk and J. A. van Heeswijk, Eindhoven
Aspects of the strength of nickel-silicon nitride joints 133
- A. Satir-Kolorz, M. Faller and B. Fritsche, Dübendorf
Mechanical behaviour of corroded active brazed zirconia-invar joints 138
- B. Schreieck, B. Eigenmann and D. Löhe, Karlsruhe
Residual stresses and failure of brazed joints of cemented carbide and steel similar to cutting tools 140
- J. Neuenschwander, A. Flisch, Th. Lüthi, A. Satir and P. Wyss, Dübendorf
Nondestructive testing of brazed joints 144

Poster Contributions

- R. Schmidt, Jena
Modelling of nucleation in and on solids 148
- M. Frant, G. Hildebrand and K. Liefeith, Heiligenstadt
The variation of surface energy parameters of solid phases as a possibility for optimization of adhesive joints 150
- H. Cramer and A. Nentwig, München
Friction welding of powder metallurgical manufactured hard alloys 153
- L. Dorn, A. El Ashram, M. Shaker and H. Abd El-Hafez, Berlin
Strength improvement of Si_3N_4 -metal joints using alternative braze metal and brazing procedure 154
- O. Hahn and A. Ewerszumrode, Paderborn
The influence of bonding conditions upon the property profile of binded connections consisting of joints with varying coefficients of expansion 157
- G. Köhler, H. Müller and A. Petrich, Jena
Welding of quartz glass with laser 159
- Ya. Setina and Yu. Auzans, Riga
Structure of protective and binding coatings for semiconductors on the base of glass 161
- G. Sedmale, L. Laukmanis and Y. Vulfson, Riga
Investigation of interaction between glass coating and metal 167

A. Fröhlich, Karlsfeld	
Oxidation protection system for C-fiber reinforced SiC-ceramic	169
H. Klose, H. Podlesak and B. Wielage, Chemnitz	
Reaction layer formation on the metal side of active brazed metal-ceramic joints	170
R. Sikora, D. Rohländer and H. Ludwig, Hermsdorf	
Characterization of ceramic/metal interfaces	173
H.-D. Schnabel and W. Zahn, Zwickau	
Stability of titanium silicides inside brazed silicon nitride joints	175
M. Ilmer, T. Höche, M. Seibold and C. Rüssel, Jena	
TEM investigations of an yttria-doped molybdenum to silica interface	177
E. Lugscheider, K. Schlimbach, Aachen, W. Tillmann, Schaan, and W. F. Gale, Auburn	
Optical hot stage microscope for brazing investigations	180
S. Spauszus, G. Köhler, M. Neuhäuser and Th. Furche, Jena	
Green tapes – a new material for joining of ceramics, glass and glass-ceramics	182
H. Klose and B. Wielage, Chemnitz	
Reinforcement concept for active brazing filler alloys	185
M. I. Budd, Porsgrunn	
Fabrication of a graded expansion seal segment by co-sintering of glass-ceramic powders.	187
A. Harnisch, K. Feindt and D. Hülsenberg, Ilmenau	
Joining of microcomponents made out of photostructured glass	190
H.-D. Steffens, B. Wielage, J. Wilden, K. Möhwald, T. Meininghaus and A. Nölle, Dortmund	
Investigations on production, design and calculation of joined composites	192
L. Dorn and U. Neuhoﬀ, Berlin	
A new type of ceramic-metal-joint by press fitting	195
S. Kessler and H. Paschke, Landshut	
Matched sealing of glass to NiCo 29 18	196
G. Surzhenkov, Tallinn	
Experience in industrial implementation of diffusion welding and brazing at the production of hard-alloyed tools and electrotechnical devices	198
R. Primas, A. Satir-Kolorz and O. Maus, Dübendorf	
Strength behaviour of straight and chamfered HPSN/HPSN joint in four-point-bending	200
H.-D. Schnabel and M. Teichgräber, Zwickau	
Characterizing of residual stresses in brazed laminated TiC/SiC ceramics	203
Y. Fukuzawa, H. Katougi, Nagaoka, N. Mohri, Nagoya, and T. Tani, Tukuba	
Machining of the ceramics – metal joint by electrical discharge machining	205

J. Wagner (S), E. Roeder and D. Eifler, Kaiserslautern	
Monotonic and cyclic strength of ultrasonically welded ceramic/metal-joints	208
H. Miura, K. Saijo and T. Sakai, Tokyo	
Grain-boundary strength of Cu-SiO ₂ bicrystals at high-temperatures	212
E. Zimmermann, J. Unangst, J. Reglin and St. Köhler, Jena	
Diffusion welding – a joining technology for various materials, high precision and strength and optical application	215
E. Monreal, R. Späh and D. Stolten, Friedrichshafen	
Sealing materials for SOFC manifolds	217
A. Palatzky, H. Ludwig and S. Seifert, Hermsdorf	
Ceramic joining for corrosion – stable sensors	220
W. Grünling, Weinheim, and G. Linssen, Neuss	
Ceramic-to-metal joints in Germany – a review about activities and trends	222
G. Haufler, Stuttgart	
Ring shaped Al ₂ O ₃ – steel flange bonds and prototype cells for high-energy batteries	224
G. Kräuter and A. Schumacher, Halle	
Low temperature silicon wafer bonding via surface modification	227
H. Bartuch, K. Kaschlik, J. Unangst, Jena, G. Kürbis and C. Dietrich, Sacka	
Modular system for micro diffusion bonding and anodic bonding	230
Weiping Liu, Dongming Zhou and Fengxiang Zhai, Dalian	
Joining advanced materials by pressurized combustion synthesis	231
R. Eberhardt, T. Scheller, G. Tittelbach and V. Guyenot, Jena	
Assembly of microoptical elements by adhesive bonding	235
