

## TABLE OF CONTENTS

|   |     |
|---|-----|
| Preface   | vii |
| Computational Complexity of Restricted Polygon<br>Decompositions      |     |
| A. Aggarwal, S.K. Ghosh, and R.K. Shyamasundar                        | 1   |
| Computing Monotone Simple Circuits in the Plane                       |     |
| D. Avis and D. Rappaport  | 13  |
| Circular Separability of Planar Point Sets                            |     |
| B.K. Bhattacharya   | 25  |
| Symmetry Finding Algorithms   |     |
| P. Eades  | 41  |
| Computing the Relative Neighbour Decomposition of a<br>Simple Polygon |     |
| H.A. ElGindy and G.T. Toussaint                                       | 53  |
| Polygonal Approximations of a Curve –<br>Formulations and Algorithms  |     |
| H. Imai and M. Iri  | 71  |
| On Polygonal Chain Approximation                                      |     |
| A. Melkman and J. O'Rourke  | 87  |
| Uniqueness of Orthogonal Connect-the-Dots                             |     |
| J. O'Rourke   | 97  |
| On the Shape of a Set of Points                                       |     |
| J.D. Radke  | 105 |

|  |     |
|--|-----|
| Ortho-Convexity and Its Generalizations<br>G.J.E. Rawlins and D. Wood  | 137 |
| Guard Placement in Rectilinear Polygons<br>J.R. Sack and G.T. Toussaint  | 153 |
| Realizability of Polyhedrons from Line Drawings<br>K. Sugihara   | 177 |
| Voronoi and Related Neighbours on Digitized Two-Dimensional<br>Space with Applications to Texture Analysis<br>J. Toriwaki and S. Yokoi | 207 |
| A Graph-Theoretical Primal Sketch<br>G.T. Toussaint  | 229 |
| Author Index   | 261 |
