CHAPTER 1. THE ROLE OF STATISTICS	1
1.1 The Basic Statistical Procedure, 1	
1.2 The Scientific Method, 7	
1.3 Experiments vs. Surveys, 18	
Review Exercises, 20	
Selected Readings, 22	
CHAPTER 2. POPULATIONS, SAMPLES, AND PROBABILITY DISTRIBUTIONS	23
2.1 Random Sampling, 23	
2.2 Recording Values of Variables, 28	
2.3 Random Variables and Probability Distributions, 31	
2.4 Expected Value and Variance of a Probability Distribution, 38	
Review Exercises, 45	
Selected Readings, 46	
CHAPTER 3. BINOMIAL DISTRIBUTIONS	48
3.1 The Nature of Binomial Distributions, 48	
3.2 Testing Hypotheses, 59	
3.3 Estimation, 72	
Review Exercises, 81	
Selected Readings, 83	
CHAPTER 4. POISSON DISTRIBUTIONS	84
4.1 The Nature of Poisson Distributions, 84	
4.2 Testing Hypotheses, 87	
4.3 Estimation, 90	
4.4 Poisson Distributions and Binomial Distributions, 93	

Review Exercises, 96
Selected Readings, 96

CHAPTER 5. CHI-SQUARE DISTRIBUTIONS 97

5.1 The Nature of Chi-Square Distributions, 97
5.2 Goodness-of-Fit Tests, 108
5.3 Contingency Table Analysis, 113
Review Exercises, 122
Selected Readings, 123

CHAPTER 6. SAMPLING DISTRIBUTION OF AVERAGES 125

6.1 Population Mean and Sample Average, 125
6.2 Population Variance and Sample Variance, 131
6.3 The Mean and Variance of the Sampling Distribution of
Averages, 137
Review Exercises, 141

CHAPTER 7. NORMAL DISTRIBUTIONS 143

7.1 The Standard Normal Distribution, 143
7.2 Inference About a Single Observation, 150
7.3 The Central Limit Theorem, 155
7.4 Inferences About a Population Mean and Variance, 156
7.5 Using a Normal Distribution to Approximate Other
Distributions, 164
Review Exercises, 170
Selected Readings, 172

CHAPTER 8. STUDENT'S t DISTRIBUTION 173

8.1 The Nature of t Distributions, 173
8.2 Inference About a Single Mean, 176
8.3 Inference About Two Means, 185
8.4 Inference About Two Variances, 192
Review Exercises, 198
Selected Readings, 200

CHAPTER 9. DISTRIBUTIONS OF PAIRED VARIABLES 201

9.1 Simple Linear Regression, 201
9.2 Model Testing, 213
9.3 Inferences Related to Regression, 224
9.4 Correlation, 229
Review Exercises, 239
Selected Readings, 241

CHAPTER 10. TECHNIQUES FOR ONE-WAY ANALYSIS OF VARIANCE	243
10.1 The Additive Model, 243	
10.2 One-Way Analysis of Variance Procedure, 251	
10.3 Multiple Comparison Procedures, 262	
10.4 One Degree of Freedom Comparisons, 274	
10.5 Estimation, 280	
Review Exercises, 284	
Selected Readings, 285	
 CHAPTER 11. THE ANALYSIS OF VARIANCE MODEL	 287
11.1 Random Effects and Fixed Effects, 287	
11.2 Testing the Assumptions for ANOVA, 294	
11.3 Transformations, 299	
Review Exercises, 302	
Selected Readings, 303	
 CHAPTER 12. OTHER ANALYSIS OF VARIANCE DESIGNS	 305
12.1 Nested Design, 305	
12.2 Randomized Complete Block Design, 313	
12.3 Latin Square Design, 322	
12.4 $a \times b$ Factorial Design, 330	
12.5 $a \times b \times c$ Factorial Design, 337	
12.6 Split-Plot Design, 349	
Review Exercises, 360	
Selected Readings, 361	
 CHAPTER 13. ANALYSIS OF COVARIANCE	 363
13.1 Combining Regression With ANOVA, 363	
13.2 One-Way Analysis of Covariance, 368	
13.3 Testing the Assumptions for Analysis of Covariance, 371	
13.4 Multiple Comparison Procedures, 377	
Review Exercises, 379	
Selected Readings, 380	
 CHAPTER 14. MULTIPLE REGRESSION AND CORRELATION	 381
14.1 Matrices, 381	
14.2 Procedure for Multiple Regression and Correlation, 392	
14.3 Inferences Relative to Multiple Regression, 404	
14.4 Model Fitting, 411	
14.5 Logarithmic Transformations, 422	

14.6 Polynomial Regression, 430	
Review Exercises, 440	
Selected Readings, 441	

APPENDIX OF USEFUL TABLES	443
