

Claudia Angelini
Paola M.V. Rancoita
Stefano Rovetta (Eds.)

Computational Intelligence Methods for Bioinformatics and Biostatistics

12th International Meeting, CIBB 2015
Naples, Italy, September 10–12, 2015
Revised Selected Papers

Contents

A Commentary on a Censored Regression Estimator	1
<i>Antonio Eleuteri</i>	
Selecting Random Effect Components in a Sparse Hierarchical Bayesian Model for Identifying Antigenic Variability	14
<i>Vinny Davies, Richard Reeve, William T. Harvey, and Dirk Husmeier</i>	
Comparison of Gene Expression Signature Using Rank Based Statistical Inference	28
<i>Kumar Parijat Tripathi, Sonali Gopichand Chavan, Seetharaman Parashuraman, Marina Piccirillo, Sara Magliocca, and Mario Rosario Guarracino</i>	
Managing NGS Differential Expression Uncertainty with Fuzzy Sets	42
<i>Arianna Consiglio, Corrado Mencar, Giorgio Grillo, and Sabino Liuni</i>	
Module Detection in Dynamic Networks by Temporal Edge Weight Clustering	54
<i>Paola Lecca and Angela Re</i>	
A Novel Technique for Reduction of False Positives in Predicted Gene Regulatory Networks	71
<i>Abhinandan Khan, Goutam Saha, and Rajat Kumar Pal</i>	
Unsupervised Trajectory Inference Using Graph Mining	84
<i>Leen De Baets, Sofie Van Gassen, Tom Dhaene, and Yvan Saeys</i>	
Supervised Term Weights for Biomedical Text Classification: Improvements in Nearest Centroid Computation	98
<i>Mounia Haddoud, Aïcha Mokhtari, Thierry Lecroq, and Saïd Abdeddaïm</i>	
Alignment Free Dissimilarities for Nucleosome Classification	114
<i>Giosué Lo Bosco</i>	
A Deep Learning Approach to DNA Sequence Classification	129
<i>Riccardo Rizzo, Antonino Fiannaca, Massimo La Rosa, and Alfonso Urso</i>	
Clustering Protein Structures with Hadoop	141
<i>Giacomo Paschina, Luca Roverelli, Daniele D'Agostino, Federica Chiappori, and Ivan Merelli</i>	

Comparative Analysis of MALDI-TOF Mass Spectrometric Data in Proteomics: A Case Study	154
<i>Eugenio Del Prete, Diego d'Esposito, Maria Fiorella Mazzeo, Rosa Anna Siciliano, and Angelo Facchiano</i>	
Binary Particle Swarm Optimization Versus Hybrid Genetic Algorithm for Inferring Well Supported Phylogenetic Trees	165
<i>Bassam Alkindy, Bashar Al-Nuaimi, Christophe Guyeux, Jean-François Couchot, Michel Salomon, Reem Alsrraj, and Laurent Philippe</i>	
Computing Discrete Fine-Grained Representations of Protein Surfaces	180
<i>Sebastian Daberdaku and Carlo Ferrari</i>	
The Challenges of Interpreting Phosphoproteomics Data: A Critical View Through the Bioinformatics Lens	196
<i>Panayotis Vlastaridis, Stephen G. Oliver, Yves Van de Peer, and Grigoris D. Amoutzias</i>	
Bioinformatics Challenges and Potentialities in Studying Extreme Environments	205
<i>Claudio Angione, Pietro Liò, Sandra Pucciarelli, Basarbatu Can, Maxwell Conway, Marina Lotti, Habib Bokhari, Alessio Mancini, Ugur Sezerman, and Andrea Telatin</i>	
Improving Genome Assemblies Using Multi-platform Sequence Data	220
<i>Pınar Kavak, Bekir Ergüner, Duran Üstek, Bayram Yüksel, Mahmut Şamil Sağtıroğlu, Tunga Güngör, and Can Alkan</i>	
Validation Pipeline for Computational Prediction of Genomics Annotations . . .	233
<i>Davide Chicco and Marco Masseroli</i>	
Advantages and Limits in the Adoption of Reproducible Research and R-Tools for the Analysis of Omic Data	245
<i>Francesco Russo, Dario Righelli, and Claudia Angelini</i>	
NuchaRt: Embedding High-Level Parallel Computing in R for Augmented Hi-C Data Analysis	259
<i>Fabio Tordini, Ivan Merelli, Pietro Liò, Luciano Milanese, and Marco Aldinucci</i>	
A Web Resource on Skeletal Muscle Transcriptome of Primates	273
<i>Daniela Evangelista, Mariano Avino, Kumar Parijat Tripathi, and Mario Rosario Guarracino</i>	
Author Index	285
