

Elvira Albert Emil Sekerinski (Eds.)

Integrated Formal Methods

11th International Conference, IFM 2014
Bertinoro, Italy, September 9-11, 2014
Proceedings

Table of Contents

Invited Talks

- Shape and Content: A Database-Theoretic Perspective on the Analysis
of Data Structures 3
*Diego Calvanese, Tomer Kotek, Mantas Šimkus, Helmut Veith, and
Florian Zuleger*
- How to Break the Bank: Semantics of Capability Policies 18
Sophia Drossopoulou and James Noble

Tool Integration

- Model-Checking *Circus* State-Rich Specifications 39
*Marcel Vinicius Medeiros Oliveira, Augusto C.A. Sampaio, and
Madiel S. Conserva Filho*
- An Interactive Verification Tool Meets an IDE 55
Martin Hentschel, Stefan Käsdorf, Reiner Hähnle, and Richard Bubel
- An Analysis Pathway for the Quantitative Evaluation of Public
Transport Systems 71
Stephen Gilmore, Mirco Tribastone, and Andrea Vandin
- Modeling UML Template Classes with FoCaLiZe 87
Messaoud Abbas, Choukri-Bey Ben-Yelles, and Renaud Rioboo
- Integrating Event-B Modelling and Discrete-Event Simulation to
Analyse Resilience of Data Stores in the Cloud 103
*Linas Laibinis, Benjamin Byholm, Inna Pereverzeva,
Elena Troubitsyna, Kuan Eeik Tan, and Ivan Porres*
- Applying an Integrated Modelling Process to Run-time Management of
Many-Core Systems 120
Asieh Salehi Fathabadi, Colin Snook, and Michael Butler

Model Verification

- Verifying Behavioral UML Systems via CEGAR 139
Yael Meller, Orna Grumberg, and Karen Yorav
- Formal Refinement in SysML 155
Alvaro Miyazawa and Ana Cavalcanti

Verifying Modal Workflow Specifications Using Constraint Solving	171
<i>Hadrien Bride, Olga Kouchnarenko, and Fabien Peureux</i>	

Program Development

Proofs and Refutations in Invariant-Based Programming	189
<i>Johannes Eriksson, Masoumeh Parsa, and Ralph-Johan Back</i>	
Automated Theorem Prover Assisted Program Calculations	205
<i>Dipak L. Chaudhari and Om Damani</i>	
Managing LTL Properties in Event-B Refinement	221
<i>Steve Schneider, Helen Treharne, Heike Wehrheim, and David M. Williams</i>	

Security Analysis

Formal Security Analysis of the MaCAN Protocol	241
<i>Alessandro Bruni, Michal Sojka, Flemming Nielson, and Hanne Riis Nielson</i>	
A Probabilistic Framework for Security Scenarios with Dependent Actions	256
<i>Barbara Kordy, Marc Pouly, and Patrick Schweitzer</i>	
A Hybrid Analysis for Security Protocols with State	272
<i>John D. Ramsdell, Daniel J. Dougherty, Joshua D. Guttman, and Paul D. Rowe</i>	

Analysis and Transformation

Towards a Formal Semantics-Based Technique for Interprocedural Slicing	291
<i>Irina Măriuca Asăvoae, Mihail Asăvoae, and Adrián Riesco</i>	
Integrating Software and Hardware Verification	307
<i>Marie-Christine Jakobs, Marco Platzner, Heike Wehrheim, and Tobias Wiersema</i>	
Code Generation for Event-B	323
<i>Andreas Fürst, Thai Son Hoang, David Basin, Krishnaji Desai, Naoto Sato, and Kunihiko Miyazaki</i>	

Concurrency and Control

Verifying Linearizability on TSO Architectures	341
<i>John Derrick, Graeme Smith, and Brijesh Dongol</i>	

A Compositional Proof Method for Linearizability Applied to a Wait-Free Multiset	357
<i>Bogdan Tofan, Gerhard Schellhorn, and Wolfgang Reif</i>	
A Separation Principle for Embedded System Interfacing.....	373
<i>Lucian M. Patcas, Mark Lawford, and Tom Maibaum</i>	
Author Index	389
