

BRIEF CONTENTS

Preface	xv
Notes to the Reader/Professor	xix
What Is New in the Second Edition	xxv
Acknowledgments	xxvii
CHAPTER 1 Intuition and Proof	1
CHAPTER 2 Basics of Number Theory	27
CHAPTER 3 Theory of Equations	79
CHAPTER 4 Measurement: Area and Volume	121
CHAPTER 5 The Triangle: Its Study and Consequences	175
CHAPTER 6 Introduction to Non-Euclidean Geometry	223
CHAPTER 7 Constructions and Three Problems of Antiquity	253
CHAPTER 8 Building the Real Number System	269
CHAPTER 9 Building the Complex Numbers	359
CHAPTER 10 Functions and Modeling	409
CHAPTER 11 Geometric Transformations	499
CHAPTER 12 Trigonometry	565
CHAPTER 13 Data Analysis and Probability	653
Hints and Answers for Selected Problems	737
Bibliography	753
Index	755
