Introduction, motivation and historical remarks	ix
Chapter 1. Generalities on maximal Cohen–Macaulay modules	1
1.1. Maximal Cohen–Macaulay modules over surface singularities	1
1.2. On the category $\text{CM}^{\text{lf}}(A)$	3
Chapter 2. Category of triples in dimension one	5
Chapter 3. Main construction	11
Chapter 4. Serre quotients and proof of Main Theorem	17
Chapter 5. Singularities obtained by gluing cyclic quotient singularities	27
5.1. Non–isolated surface singularities obtained by gluing normal rings	27
5.2. Generalities about cyclic quotient singularities	30
5.3. Degenerate cusps and their basic properties	31
5.4. Irreducible degenerate cusps	32
5.5. Other cases of degenerate cusps which are complete intersections	33
Chapter 6. Maximal Cohen–Macaulay modules over $\mathbb{k}[[x, y, z]]/(x^2 + y^3 - xyz)$	35
Chapter 7. Representations of decorated bunches of chains–I	41
7.1. Notation	41
7.2. Bimodule problems	41
7.3. Definition of a decorated bunch of chains	46
7.4. Matrix description of the category $\text{Rep}(\mathfrak{X})$	47
7.5. Strings and Bands	49
7.6. Idea of the proof	53
7.7. Decorated Kronecker problem	55
Chapter 8. Maximal Cohen–Macaulay modules over degenerate cusps–I	59
8.1. Maximal Cohen–Macaulay modules on cyclic quotient surface singularities	59
8.2. Matrix problem for degenerate cusps	62
8.3. Reconstruction procedure	64
8.4. Cohen–Macaulay representation type and tameness of degenerate cusps	66
Chapter 9. Maximal Cohen–Macaulay modules over degenerate cusps–II	71
9.1. Maximal Cohen–Macaulay modules over $\mathbb{k}[[x, y, z]]/(xyz)$	71
9.2. Maximal Cohen–Macaulay modules over $\mathbb{k}[[x, y, u, v]]/(xy, uv)$	76
9.3. Degenerate cusp $\mathbb{k}[[x, y, z, u, v]]/(xz, xu, yu, yv, zv)$	78

Chapter 10. Schreyer's question	79
Chapter 11. Remarks on rings of discrete and tame CM-representation type	83
11.1. Non-reduced curve singularities	83
11.2. Maximal Cohen-Macaulay modules over the ring $\widetilde{D}((1, 0))$	83
11.3. Other surface singularities of discrete and tame CM-representation type	85
11.4. On deformations of certain non-isolated surface singularities	86
Chapter 12. Representations of decorated bunches of chains-II	89
12.1. Decorated conjugation problem	89
12.2. Some preparatory results from linear algebra	91
12.3. Reduction to the decorated chessboard problem	92
12.4. Reduction procedure for the decorated chessboard problem	94
12.5. Indecomposable representations of a decorated chessboard	98
12.6. Proof of the Classification Theorem	101
