Contents

<i>Preface</i>	<i>page ix</i>
1 Representations, Maschke's Theorem, and Semisimplicity	1
1.1 Definitions and Examples	1
1.2 Semisimple Representations	7
1.3 Summary of Chapter 1	11
1.4 Exercises for Chapter 1	11
2 The Structure of Algebras for Which Every Module Is Semisimple	15
2.1 Schur's Lemma and Wedderburn's Theorem	15
2.2 Summary of Chapter 2	20
2.3 Exercises for Chapter 2	20
3 Characters	24
3.1 The Character Table	24
3.2 Orthogonality Relations and Bilinear Forms	30
3.3 Consequences of the Orthogonality Relations	33
3.4 The Number of Simple Characters	38
3.5 Algebraic Integers and Divisibility of Character Degrees	42
3.6 The Matrix Summands of the Complex Group Algebra	45
3.7 Burnside's $p^a q^b$ Theorem	48
3.8 Summary of Chapter 3	50
3.9 Exercises for Chapter 3	51
4 The Construction of Modules and Characters	56
4.1 Cyclic Groups and Direct Products	56

4.2	Lifting (or Inflating) from a Quotient Group	59
4.3	Induction and Restriction	60
4.4	Symmetric and Exterior Powers	70
4.5	The Construction of Character Tables	75
4.6	Summary of Chapter 4	75
4.7	Exercises for Chapter 4	76
5	More on Induction and Restriction: Theorems of Mackey and Clifford	82
5.1	Double Cosets	82
5.2	Mackey's Theorem	84
5.3	Clifford's Theorem	87
5.4	Summary of Chapter 5	90
5.5	Exercises for Chapter 5	91
6	Representations of p-Groups in Characteristic p and the Radical	95
6.1	Cyclic p -Groups	95
6.2	Simple Modules for Groups with Normal p -Subgroups	98
6.3	Radicals, Socles, and the Augmentation Ideal	100
6.4	Jennings's Theorem	106
6.5	Summary of Chapter 6	108
6.6	Exercises for Chapter 6	108
7	Projective Modules for Finite-Dimensional Algebras	115
7.1	Characterizations of Projective and Injective Modules	115
7.2	Projectives by Means of Idempotents	119
7.3	Projective Covers, Nakayama's Lemma, and Lifting of Idempotents	122
7.4	The Cartan Matrix	130
7.5	Summary of Chapter 7	132
7.6	Exercises for Chapter 7	132
8	Projective Modules for Group Algebras	135
8.1	The Behavior of Projective Modules under Induction, Restriction, and Tensor Product	135
8.2	Projective and Simple Modules for Direct Products of a p -Group and a p' -Group	138
8.3	Projective Modules for Groups with a Normal Sylow p -Subgroup	140
8.4	Projective Modules for Groups with a Normal p -Complement	145

8.5	Symmetry of the Group Algebra	147
8.6	Summary of Chapter 8	152
8.7	Exercises for Chapter 8	152
9	Changing the Ground Ring: Splitting Fields and the Decomposition Map	158
9.1	Some Definitions	159
9.2	Splitting Fields	159
9.3	The Number of Simple Representations in Positive Characteristic	163
9.4	Reduction Modulo p and the Decomposition Map	167
9.5	The cde Triangle	177
9.6	Blocks of Defect Zero	182
9.7	Summary of Chapter 9	186
9.8	Exercises for Chapter 9	187
10	Brauer Characters	192
10.1	The Definition of Brauer Characters	192
10.2	Orthogonality Relations and Grothendieck Groups	198
10.3	The cde Triangle in Terms of Brauer Characters	205
10.4	Summary of Chapter 10	208
10.5	Exercises for Chapter 10	208
11	Indecomposable Modules	213
11.1	Indecomposable Modules, Local Rings, and the Krull–Schmidt Theorem	214
11.2	Groups with a Normal Cyclic Sylow p -Subgroup	218
11.3	Relative Projectivity	219
11.4	Finite Representation Type	228
11.5	Infinite Representation Type and the Representations of $C_2 \times C_2$	232
11.6	Vertices, Sources, and Green Correspondence	237
11.7	The Heller Operator	245
11.8	Some Further Techniques with Indecomposable Modules	248
11.9	Summary of Chapter 11	249
11.10	Exercises for Chapter 11	250
12	Blocks	257
12.1	Blocks of Rings in General	258
12.2	p -Blocks of Groups	262
12.3	The Defect of a Block: Module Theoretic Methods	266

12.4	The Defect of a Block: Ring Theoretic Methods	270
12.5	The Brauer Morphism	276
12.6	Brauer Correspondence	282
12.7	Further Reading	286
12.8	Summary of Chapter 12	286
12.9	Exercises for Chapter 12	287
Appendix A: Discrete Valuation Rings		291
Appendix B: Character Tables		297
	<i>Bibliography</i>	321
	<i>Index</i>	323
