## CHAPTER 1

### DIMENSIONS OF ENVIRONMENT-BEHAVIOR RESEARCH: ORIENTATIONS TO PLACE, DESIGN, PROCESS, AND POLICY

M. POWELL LAWTON  
IRWIN ALTMAN  
JOACHIM F. WOHLWILL

Introduction.....	1
Orientation to Place.....	3
Orientation to Design.....	5
Orientation to Social and Psychological Processes.....	6
Orientation to Environmental Policy.....	9
Organization of the Volume.....	11
References.....	13

## CHAPTER 2

### HOUSING OLDER AMERICA

SANDRA J. NEWMAN  
JAMES ZAIS  
RAYMOND STRUYK

Introduction.....	17
Housing Needs, Conditions, and Problems of the Elderly.....	18
Population Change.....	18
Household Status.....	19
Income and Poverty Status.....	21

Health Limitations . . . . .	24
Residential Mobility . . . . .	24
Housing Costs . . . . .	26
Housing Conditions . . . . .	29
Neighborhood Conditions . . . . .	32
Directions for Future Research . . . . .	33
Government Response . . . . .	34
Renter Programs . . . . .	36
Homeowner Programs . . . . .	39
Future Prospects . . . . .	50
References . . . . .	52

### CHAPTER 3

#### RETIREMENT COMMUNITIES

ROBERT W. MARANS  
MICHAEL E. HUNT  
KATHLEEN L. VAKALO

Introduction . . . . .	57
Retirement Community Research—A Review . . . . .	58
A Framework for Examining Person–Environment Relations . . . . .	60
Defining and Classifying Retirement Communities . . . . .	61
Past Efforts—Definition . . . . .	62
Past Efforts—Classification . . . . .	63
Classifying Retirement Communities—A Broader Perspective . . . . .	64
Five Types of Retirement Communities . . . . .	66
Retirement New Towns . . . . .	67
Retirement Villages . . . . .	71
Retirement Subdivisions . . . . .	74
Retirement Residences . . . . .	76
Continuing-Care Retirement Centers . . . . .	79
Overview . . . . .	83
The Future of Retirement Communities . . . . .	86
Prospects for New Retirement Communities . . . . .	87
Prospects for Existing Retirement Communities . . . . .	89
Some Directions for Future Research . . . . .	90
References . . . . .	91

CHAPTER 4

ALTERNATIVE MODES OF LIVING FOR THE ELDERLY: A  
CRITICAL REVIEW

J. KEVIN ECKERT  
MARY ITTMAN MURREY

Introduction and Macrosocial Analysis .....	95
What Is Alternative Housing? .....	96
Determinants of Housing Choice .....	97
Ecological Housing Model .....	99
The Individual .....	100
The Microsystem .....	100
The Exosystem .....	101
The Macrosystem .....	102
Alternative Housing Modes .....	103
Alternatives within the Community Residence Category .....	103
Alternatives within the Congregate Housing Category .....	113
Alternatives within the Domiciliary and Personal Care Residential Category .....	116
Specific Phenomena at the Macrolevel .....	119
Future Research and Conclusion .....	122
References .....	123

CHAPTER 5

AGING IN RURAL ENVIRONMENTS

GRAHAM D. ROWLES

Introduction .....	129
Characteristics of Rural Environments .....	130
The Problem of Definition .....	130
Contrasts with Urban Environments .....	131
Characteristics of Rural Elderly People .....	133
Objective Conditions .....	133
Subjective Well-Being .....	134
Explaining the Paradox .....	134
Well-Being of the Small Town Elderly: A Case Study .....	135

Methodological Issues in Developing an Environmental Psychology of Rural Aging .....	137
The Need for an Exploratory Inductive Approach .....	137
Ethnographic and Case Study Research .....	138
Elderly People in Rural Environments: Some Emergent Themes ..	139
The Colton Study .....	140
Physical Participation in the Environment .....	140
Cognitions of Space .....	143
Emotional Attachments to Place .....	146
The Sociocultural Milieu of Rural Aging .....	148
Where from Here? .....	150
References .....	152

## CHAPTER 6

### SUPPORTIVE RESIDENTIAL SETTINGS FOR OLDER PEOPLE

RUDOLF H. MOOS  
SONNE LEMKE

Introduction .....	159
Conceptual Perspectives .....	161
Elaborating the Environmental System .....	164
Development of the MEAP .....	165
Describing Supportive Residential Settings .....	169
Exploring Environmental Domains and Their Impacts .....	172
Person-Setting Selection and Allocation .....	172
Opportunities for Environmental Choice and Control .....	174
Environmental Change Accompanying Relocation .....	177
Identifying Design and Program Preferences .....	180
Preferences for Physical Design Features .....	181
Preferences for Program Features .....	182
Practical Applications .....	184
Highlighting Design Choices .....	185
Monitoring and Improving Residential Settings .....	186
Educating Gerontological Practitioners .....	187
Future Directions .....	187
References .....	188

CHAPTER 7

HUMAN FACTORS RESEARCH AND FUNCTIONAL ENVIRONMENTS FOR THE AGED

MARTIN V. FALETTI

Overview . . . . . 191

Functional Ability: A Person–Environment Problem . . . . . 192

    Functional Ability in Activities of Daily Living . . . . . 192

    Daily Activities as Person–Environment Transactions . . . . . 193

    Person–Environment Transactions and Functioning: Unresolved Issues . . . . . 194

Human Factors Research: A Person–Environment Paradigm . . . . . 197

    Human Factors Research: Characteristic Problems and Methods . . . . . 197

    Human Factors Research and Aging: Application Issues . . . . . 198

    Human Factors Models of Person–Environment Transactions . . . . . 201

Human Factors Analysis of Functional Ability . . . . . 204

    Elder–Environment Transactions: Sampling Activities and Performance . . . . . 205

    Human Factors Data in Field Settings . . . . . 209

    Task Analysis of Daily Activities . . . . . 211

    Person Capabilities . . . . . 220

    Environmental Demands . . . . . 227

    Elder–Environment Transactions: Analyses and Results . . . . . 228

Human Factors Research in Aging: A Possible Agenda . . . . . 231

References . . . . . 234

CHAPTER 8

THE EFFECTS OF RESIDENTIAL AND ACTIVITY BEHAVIORS ON OLD PEOPLE’S ENVIRONMENTAL EXPERIENCES

STEPHEN M. GOLANT

Introduction . . . . . 239

Definition of Behavioral Relationships . . . . . 240

Mechanisms by Which Behavioral Relationships Influence Environmental Experiences . . . . . 241

Objectively Defined Environment .....	241
Direct and Tangible Environmental Contact Resulting from Individual's Behavioral Relationships .....	242
Cognitive and Motivational Strategies Associated with Individual's Behavioral Relationships .....	242
Precedents for Proposing Residential and Activity Behaviors as Antecedents of Environmental Experiences .....	243
Alternative Conceptualizations of Individual Differences as Antecedents of Environmental Experiences .....	245
Influence of Residential Behavior on Old People's Environmental Experiences .....	246
Patterns of Residential Behavior in Old Age .....	247
Amount of Unchanging, Continuous Exposure .....	247
Adjustment Problems of the Recent Elderly Mover .....	249
Strength of Community Social Bonds .....	251
Development of Psychological Attachment .....	252
Degree of Familiarity with Environment's Contents .....	254
Amount of Residential Satisfaction .....	255
Conclusions .....	256
Influence of Activity Behavior on Old People's Environmental Experiences .....	257
Patterns of Activity Behavior in Old Age .....	259
Activity Behavior's Influence on the Content of People's Environmental Experiences .....	260
Activity Behavior's Influence on the Consequences of People's Environmental Experiences .....	263
Experiential Impact of Cognitive and Motivational Strategies Associated with Old People's Activity Behavior .....	267
Future Directions .....	270
References .....	274

## CHAPTER 9

### A COMPLEMENTARY/CONGRUENCE MODEL OF WELL-BEING OR MENTAL HEALTH FOR THE COMMUNITY ELDERLY

FRANCES M. CARP  
ABRAHAM CARP

Introduction .....	279
Overview .....	280

Relevant Contemporary Models . . . . .	285
The Ecological Model . . . . .	285
Moos' Multiphasic Environmental Assessment Procedure (MEAP) . . . . .	285
Windley's and Scheidt's Model . . . . .	286
Congruence Approaches . . . . .	286
Further Model Development . . . . .	288
Geographical Units . . . . .	289
Person Components ( <i>P</i> ) . . . . .	290
Part 1 of the Model . . . . .	290
Part 2 of the Model . . . . .	294
Objective Environmental Components ( $E_o$ ) . . . . .	299
Definition of "Objective" . . . . .	302
Objective <i>E</i> and the Support Systems . . . . .	303
Physical $E_o$ . . . . .	304
Suprapersonal $E_o$ . . . . .	305
Direct Measurement of Objective Environmental Quality . . . . .	305
$E_o$ Scales for the Model . . . . .	308
Observer-Based Measures . . . . .	310
Consonance and Dissonance of Suprapersonal $E_o$ with <i>P</i> . . . . .	312
Congruence . . . . .	314
Mediating Variables . . . . .	317
Situational Resources and Deprivations . . . . .	317
Intrapsychic Variables . . . . .	319
Outcomes . . . . .	322
Domains and Subdomains . . . . .	322
Satisfaction with Living Unit and Local Area . . . . .	323
Ultimate Outcomes . . . . .	323
Future Work . . . . .	326
References . . . . .	328
 INDEX . . . . .	 337
