

CONTENTS

PREFACE TO THE SERIES	iii
PREFACE TO VOLUME 10	v
CONTRIBUTORS	xiii
CONTENTS OF OTHER VOLUMES	xv
Chapter 1	
THE FUNCTION OF METAL IONS IN GENETIC REGULATION	1
Gunther L. Eichhorn	
1. Introduction	2
2. Metal Ions in Genetic Processes	5
3. Metal-Ion-Induced Errors in Genetic Regulation	9
4. Effects of Metal Ions on Structure of Nucleic Acids and Nucleoproteins	11
5. Conclusion: Significance of These Phenomena in Metal Carcinogenesis	17
References	19
Chapter 2	
A COMPARISON OF CARCINOGENIC METALS	23
C. Peter Flessel, Arthur Furst, and Shirley B. Radding	
1. Introduction	24
2. Principles and Problems	25
3. Metals as Carcinogens	29
4. Cellular Mechanisms	33
5. An Index of Carcinogenicity	41
6. Conclusions	47
Acknowledgments	48
References	48

Chapter 3

THE ROLE OF METALS IN TUMOR DEVELOPMENT AND INHIBITION 55

Haleem J. Issaq

- | | |
|---|----|
| 1. Introduction | 56 |
| 2. Metals as Carcinogens | 57 |
| 3. Metal Levels in Blood, Serum, and Plasma of Normal Persons and Cancer Patients | 59 |
| 4. Metal Levels in Tissue of Normal Persons and Cancer Patients | 63 |
| 5. Metals in Nucleic Acids of Normal Persons and Cancer Patients | 70 |
| 6. Relationship Between Tumor Development and Trace Metal Levels | 72 |
| 7. Metals in Enzymes and Their Effects on Tumor Development | 73 |
| 8. Effect of Metal Diet Supplementation on Tumor Development and Inhibition | 74 |
| 9. Metal Complexes as Chemotherapeutic Agents | 80 |
| 10. Mechanism of Metal Carcinogenesis | 82 |
| 11. Conclusions | 84 |
| References | 85 |

Chapter 4

PARAMAGNETIC METAL IONS IN TISSUE DURING MALIGNANT DEVELOPMENT 95

Nicholas J. F. Dodd

- | | |
|--|-----|
| 1. Introduction | 96 |
| 2. ESR Studies of Tissue | 101 |
| 3. Nature of the Signals in Tissue | 106 |
| 4. Systematic Studies of Normal and Malignant Tissue | 116 |
| 5. Summary | 122 |
| Acknowledgment | 123 |
| References | 123 |

Chapter 5

CERULOPLASMIN AND IRON TRANSFERRIN IN HUMAN MALIGNANT DISEASE 129

Margaret A. Foster, Trevor Pocklington, and Audrey A. Dawson

- | | |
|---------------------------|-----|
| 1. Introduction | 130 |
| 2. Work with Solid Tumors | 140 |

CONTENTS	ix
3. Work on Malignant Lymphoma	145
4. Leukemia and Proliferative Disorders of the Bone Marrow	152
5. General Discussion	158
Abbreviations	161
Acknowledgments	161
References	161
 Chapter 6	
HUMAN LEUKEMIA AND TRACE ELEMENTS	167
E. L. Andronikashvili and L. M. Mosulishvili	
1. Introduction	167
2. Trace Elements in Whole Blood and Serum in Leukemic Diseases	169
3. Trace Elements in Bone Marrow	178
4. Trace Elements in Erythrocytes and Plasma	181
5. Trace Elements in Leukocytes	183
6. Trace Elements in Subcellular Organelles	189
7. Trace Elements at the Molecular Level	191
8. General Conclusions	202
Acknowledgments	204
References	204
 Chapter 7	
ZINC AND TUMOR GROWTH	207
Andre M. van Rij and Walter J. Pories	
1. Introduction	208
2. Zinc Carcinogenesis: Epidemiology	209
3. Zinc Carcinogenesis: Experimental Studies	211
4. Serum Zinc Levels in Cancer Patients	217
5. Zinc Levels in Neoplastic Tissues	224
6. Zinc Uptake in Tumors	230
7. Zinc and Tumor Growth	231
8. Zinc and Immune Functions in Tumor Growth	234
9. Zinc and Therapeutic Control of Tumor Growth	236
Abbreviations	241
References	241
 Chapter 8	
CYANOCOBALAMIN AND TUMOR GROWTH	253
Sofija Kanopkaitė and Gediminas Bražėnas	
1. Introduction	254

2.	Level of Cobalamins in Tissues and Organs of Animals During Tumor Growth	255
3.	Effect of CN-B ₁₂ and Cobamide Coenzymes on Growth of Some Transplanted Forms of Rat Tumors and Prolongation of Rat Survival	256
4.	Influence of Multiple Injections of CN-B ₁₂ and Ado-B ₁₂ on Levels of Cobalamin-Protein Complexes in Some Organs	261
5.	Effect of Ado-B ₁₂ on Levels of Na ⁺ , K ⁺ , Li ⁺ , and Ca ²⁺ in Tumorous Rats	263
6.	Synthesis of Ado-B ₁₂ in Vitro by Mitochondria of Tumorous Rat Liver	263
7.	Effect of CN-B ₁₂ and Ado-B ₁₂ on Protein Synthesis and Absorption of Oxygen by Mitochondria of Healthy and Tumorous Rat Liver	265
8.	Some Peculiarities of High-Molecular-Weight RNA Metabolism After Multiple Injections of CN-B ₁₂ and Ado-B ₁₂ into Tumorous Rats	269
9.	CN-B ₁₂ , Ado-B ₁₂ , CH ₃ -B ₁₂ , and the Methylation of RNAs and Proteins	270
10.	Summary and Conclusions	272
	Abbreviations	273
	References	274

Chapter 9

THE ROLE OF SELENIUM AS A CANCER-PROTECTING TRACE ELEMENT	281
---	-----

Birger Jansson

1.	Introduction	281
2.	Occurrence	283
3.	Absorption, Distribution, and Excretion	285
4.	Selenium in the Food Chain	287
5.	Is Selenium a Carcinogen?	287
6.	Selenium as a Cancer Inhibitor	289
7.	Selenium in Cancer Treatment	302
8.	Elements Antagonistic to Selenium	304
9.	Conclusions and Problems for Further Study	305
	References	307

Chapter 10

TUMOR DIAGNOSIS USING RADIOACTIVE METAL IONS AND THEIR COMPLEXES	313
--	-----

Akira Yokoyama and Hideo Saji

1.	Introduction	314
2.	⁶⁷ Ga Citrate	316

CONTENTS

xi

3. Biological Behavior of ^{67}Ga , ^{169}Yb , and ^{170}Tm Citrate	319
4. $^{99\text{m}}\text{Tc}$ Polymer Complexes	321
5. Bleomycin Complexes	328
6. Clinical Application of $^{99\text{m}}\text{Tc}$ BLM and ^{67}Ga Citrate	331
7. Metal-Related Tumor Diagnosis in the Future	334
Acknowledgments	336
Abbreviations	336
References	337
AUTHOR INDEX	341
SUBJECT INDEX	369
