

## CONTENTS

PREFACE TO THE SERIES	iii
PREFACE TO VOLUME 13	v
CONTRIBUTORS	xi
CONTENTS OF OTHER VOLUMES	xiii
Chapter 1	
THE EVOLUTION OF COPPER PROTEINS	1
Earl Frieden	
1. Association of Copper and Iron in the Biochemical Evolution of the Copper Proteins	2
2. Evolutionary Relationships Among the Blue Copper Oxidases	5
3. Evolutionary Relationships of the Metallo- superoxide Dismutases	11
4. Conclusions	12
References	13
Chapter 2	
PROPERTIES OF COPPER "BLUE" PROTEINS	15
A. Graham Lappin	
1. Introduction	16
2. Structural and Physical Properties	17
3. Electron Transfer Reactions	39
4. Conclusions	62
5. Abbreviations and Common Names	62
References	63

## Chapter 3

THE PROPERTIES OF BINUCLEAR COPPER CENTERS IN  
MODEL AND NATURAL COMPOUNDS 73

F. L. Urbach

1. Binuclear Copper Centers in Proteins 73
2. Synthetic Models for Binuclear Copper Centers 90
3. General Conclusions 105
4. Abbreviations 106
- References 106

## Chapter 4

CERULOPLASMIN: A MULTIFUNCTIONAL METALLOPROTEIN  
OF VERTEBRATE PLASMA 117

Earl Frieden

1. Introduction and Evolutionary Implications 118
2. The Chemistry of Ceruloplasmin: Molecular Properties and the State of Copper 120
3. Ceruloplasmin as a Single Polypeptide Chain 123
4. The Catalytic Activity of Ceruloplasmin 123
5. The Ferroxidase Activity of Ceruloplasmin 127
6. Alternative Ferroxidase Activities 127
7. Pseudoferroxidase Activity 128
8. Other Oxidase Activities of Ceruloplasmin 130
9. Ceruloplasmin as a Copper Transport Protein 131
10. The Control of Iron Mobilization by Ceruloplasmin 133
11. Regulation of Plasma or Tissue Levels of Biogenic Amines 134
12. The Role of Ceruloplasmin as a Serum Antioxidant 136
13. Ceruloplasmin as an Acute Phase Reactant 138
14. Summary 139
- References 140

## Chapter 5

COPPER MONOOXYGENASES: TYROSINASE AND DOPAMINE  
 $\beta$ -MONOOXYGENASE 143

Konrad Lerch

1. Introduction 144
2. Tyrosinases 146
3. Dopamine  $\beta$ -Monooxygenase 178
- References 180

## Chapter 6

## CYTOCHROME C OXIDASE: AN OVERVIEW OF RECENT WORK 187

Maurizio Brunori, Eraldo Antonini, and M. T. Wilson

1. Introductory Remarks 188
2. Chemical Features 190
3. Physical Properties of the Metals 194
4. Functional Investigations 204
- Further Developments 221
- References 221

## Chapter 7

## THE ACTIVE SITES OF MOLLUSCAN AND ARTHROPODAN HEMOCYANINS 229

René Lontie and Rafaël Witters

1. Introduction 230
2. Domain Structure of Molluscan Hemocyanins 230
3. Subunits of Arthropodan Hemocyanins 233
4. Oxyhemocyanins 237
5. The Binding of Ligands of Cu(I) 241
6. Formation and Properties of Methemocyanin 243
7. The Regeneration of Methemocyanins 248
8. Models of the Active Site 249
9. Conclusions 250
- Abbreviations and Definitions 251
- References 252

## Chapter 8

## THE COPPER/ZINC SUPEROXIDE DISMUTASE 259

James A. Fee

1. Introduction: General Background and Scope 260
2. Physical Properties of the Zn/Cu Protein from Bovine Tissues 261
3. Mechanism(s) of Metal-Catalyzed Superoxide Dismutation 286
- References 294

## Chapter 9

## THE CHEMISTRY AND BIOLOGY OF COPPER METALLOTHIONEINS 299

Konrad Lerch

1. Introduction 299
2. Molecular Structure 301
3. Copper Electronic Structure 307
4. Biological Significance 310
5. Conclusions 315
- Abbreviations 315
- References 315

## Chapter 10

## METAL REPLACEMENT STUDIES OF BLUE COPPER PROTEINS 319

Bennett L. Hauenstein, Jr. and David R. McMillin

1. Introduction 320
2. Methodology and Experimental Aspects of  
Metal Replacement 321
3. Metal Replacement Studies of Small Blue Proteins 323
4. Studies of Blue Copper Oxidases 333
5. Concluding Remarks 340
- Abbreviations 341
- References 342
