

## CONTENTS

PREFACE TO THE SERIES	iii
PREFACE TO VOLUME 17	v
CONTRIBUTORS	xi
CONTENTS OF OTHER VOLUMES	xiii

### Chapter 1

BIOINORGANIC CHEMISTRY OF CALCIUM	1
-----------------------------------	---

R. Bruce Martin

1. Introduction	2
2. Ionic Radii	4
3. Stability Constants and Structures	6
4. Ca <sup>2+</sup> Stability Comparisons	9
5. Ca <sup>2+</sup> versus Mg <sup>2+</sup>	10
6. Phosphate Solubilities	12
7. Ca <sup>2+</sup> Proteins	17
8. Ca <sup>2+</sup> Probes	32
9. Carbohydrate-Ca <sup>2+</sup> Binding	38
Abbreviations	42
References	43

### Chapter 2

CRYSTAL STRUCTURE STUDIES OF CALCIUM COMPLEXES AND IMPLICATIONS FOR BIOLOGICAL SYSTEMS	51
---	----

Howard Einspahr and Charles E. Bugg

1. Introduction	52
2. Stereochemical Principles Governing Calcium-Ligand Interactions	53
3. Examples of Crystallographic Results from Small Calcium Complexes	67

4. Crystallographic Studies of Calcium-Binding Proteins	73
5. Summary and Conclusions	93
Abbreviations and Definitions	95
References	95
Chapter 3	
INTESTINAL AND RENAL ABSORPTION OF CALCIUM	99
Piotr Gmaj and Heini Murer	
1. Introduction	99
2. Calcium Absorption and Secretion in the Intestine	100
3. Calcium Reabsorption and Excretion by the Kidney	110
4. Concluding Remarks	120
Abbreviations	121
References	122
Chapter 4	
CALCIUM TRANSPORT ACROSS BIOLOGICAL MEMBRANES	129
Ernesto Carafoli, Giuseppe Inesi, and Barry P. Rosen	
1. Introduction	130
2. Calcium Transport Across the Plasma Membrane	131
3. Calcium Transport Across Intracellular Membranes: Sarcoplasmic Reticulum	143
4. Calcium Transport Across Bacterial Membranes	165
5. Conclusions	174
Abbreviations	175
References	175
Chapter 5	
PHYSIOLOGICAL ASPECTS OF MITOCHONDRIAL CALCIUM TRANSPORT	187
Gary Fiskum	
1. Introduction	187
2. Mechanisms and Regulation of Mitochondrial $\text{Ca}^{2+}$ Transport	190
3. Mitochondrial Regulation of Intracellular $\text{Ca}^{2+}$	198
4. General Conclusions	204
References	209

## Chapter 6

## MODE OF ACTION OF THE REGULATORY PROTEIN CALMODULIN 215

Jos A. Cox, Michelle Comte, Armand Malnoë,  
Danielle Burger, and Eric A. Stein

1. Introduction 216
2. Structure of Calmodulin 219
3. Interaction of Calmodulin with Divalent Cations 227
4. Mechanism of Calmodulin-Activated Processes 243
5. Structural Characteristics of Calmodulin-Target Interaction 261
6. Perspectives 265
- References 266

## Chapter 7

## CALCIUM AND BRAIN PROTEINS 275

Stefano Alemà

1. Introduction 276
2. Functional Roles of Calcium in Nerve Cells 277
3. Calmodulin 286
4. Other Calcium-Modulated Brain Proteins 299
5. Calcium Channels 308
6. Conclusions 309
- Abbreviations 310
- References 311

## Chapter 8

THE ROLES OF  $\text{Ca}^{2+}$  IN THE REGULATION AND MECHANISM OF EXOCYTOSIS 319

Carl E. Creutz

1. Introduction 320
2. The Process of Exocytosis 322
3. Conclusion 344
- Abbreviations 348
- References 348

## Chapter 9

## CALCIUM FUNCTION IN BLOOD COAGULATION 353

Gary L. Nelsestuen

1. Introduction 354
2. Vitamin K-Dependent Plasma Proteins 356
3. Biological Function of Protein-Membrane Binding  
in Coagulation 371
4. Calcium in Other Coagulation Roles 374
5. General Conclusions 375
- Abbreviations and Definitions 376
- References 376

## Chapter 10

THE ROLE OF CALCIUM IN THE REGULATION OF THE SKELETAL  
MUSCLE CONTRACTION-RELAXATION CYCLE 381

Henry G. Zot and James D. Potter

1. Introduction 382
2.  $\text{Ca}^{2+}$  Binding to Skeletal Muscle Proteins 386
3. Summary 401
- Abbreviations 404
- References 404

## Chapter 11

## CALCIFICATION OF VERTEBRATE HARD TISSUES 411

Roy E. Wuthier

1. Introduction 412
2. Nature of Vertebrate Calcium-Phosphate Minerals 413
3. Nature of Calcium and Phosphate in Biological Fluids 422
4. Basic Concepts in Biological Mineralization 428
5. Current Theories on the Mechanism of Calcification 436
6. Summary and Conclusions 457
- Abbreviations 458
- References 459
