PREFACE TO THE SERIES	iii
PREFACE TO VOLUME 26	v
CONTRIBUTORS	xix
CONTENTS OF OTHER VOLUMES	xxiii
HANDBOOK ON TOXICITY OF INORGANIC COMPOUNDS	xxxvii
Chapter 1	
BIOINORGANIC CHEMISTRY OF MAGNESIUM	1
R. Bruce Martin	
1. Occurrences	1
2. Essentiality	2
3. Ionic Radii	3
4. Stabilities	3
5. Exchange	8
6. Mg^{2+} Versus Ca^{2+}	9
7. Mg^{2+} Probes	10
References	11
Chapter 2	
MAGNESIUM IN THE ENVIRONMENT	15
Raili Jokinen	
1. Magnesium in Bedrock	15
2. Soil Magnesium	17
3. Magnesium Content of Florae	26
4. Magnesium in Waters	27
5. Deposition of Magnesium	28
References	30

Chapter 3

MAGNESIUM IN PLANTS: UPTAKE, DISTRIBUTION, FUNCTION,
AND UTILIZATION BY MAN AND ANIMALS 33S. R. Wilkinson, Ross M. Welch, H. F. Mayland, and
D. L. Grunes

- | | |
|--|----|
| 1. Introduction | 34 |
| 2. Soils as a Source of Mg for Plant Uptake | 35 |
| 3. Climatic Factors Affecting Mg Concentration | 36 |
| 4. Magnesium Function, Uptake, and Utilization | 37 |
| 5. Crop Responses and Magnesium Fertilizers | 48 |
| 6. Plants as a Source of Mg for Animal and Human
Nutrition and Health | 50 |
| 7. Summary | 51 |
| References | 52 |

Chapter 4

MAGNESIUM IN ANIMAL NUTRITION 57

H. Meyer and J. Zentek

- | | |
|--|----|
| 1. Introduction | 58 |
| 2. Mg Content in the Animal Organism | 58 |
| 3. Mg Absorption | 60 |
| 4. Mg Requirements | 63 |
| 5. Mg Supply | 72 |
| 6. Problems in Mg Supply of Domestic Animals | 75 |
| 7. Use of Mg for Specific Purposes | 81 |
| References | 81 |

Chapter 5

DIETARY MAGNESIUM AND DRINKING WATER: EFFECTS ON HUMAN
HEALTH STATUS 85

J. R. Marier

- | | |
|--------------------------------------|-----|
| 1. Introduction | 86 |
| 2. Dietary Mg Intake | 86 |
| 3. Waterborne Mg | 96 |
| 4. Assessment of Metabolic Mg Status | 99 |
| 5. Overall Conclusions | 99 |
| Abbreviations | 100 |
| References | 100 |

Chapter 6

MAGNESIUM IN BIOLOGY AND MEDICINE: AN OVERVIEW 105

Nicholas John Birch

1. Introduction 105
2. Magnesium in Biology 106
3. Magnesium and Medicine and Veterinary Medicine 109
4. Magnesium and Biochemistry 113
5. Conclusion 115
- References 115

Chapter 7

ROLE OF MAGNESIUM IN ENZYME SYSTEMS 119

Frank W. Heaton

1. Introduction 119
2. Significance of Magnesium in Metabolism 120
3. Formation of Active Substrate 122
4. Activation of Enzyme Protein 123
5. Magnesium in Photosynthesis 125
6. Adenosine Triphosphatase (ATPase) 125
7. Alkaline Phosphatase 126
8. Adenylate Cyclase 128
9. Enzyme Function in Magnesium Deficiency 129
10. Conclusions 130
- References 131

Chapter 8

MAGNESIUM: A REGULATED AND REGULATORY CATION 135

Michael E. Maguire

1. Introduction 136
2. Criteria for a Regulatory Role of Magnesium 138
3. "Free" Mg^{2+} 139
4. Criterion 1 141
5. Criterion 2 143
6. Criterion 3 146
7. Criterion 4 147
8. Conclusions 148
- References 150

Chapter 9

MAGNESIUM TRANSPORT IN PROKARYOTIC CELLS 155

Marshall D. Snavely

1. Introduction	156
2. Mg ²⁺ Transport in <i>Escherichia coli</i>	158
3. Mg ²⁺ Transport in <i>Salmonella typhimurium</i>	161
4. Mg ²⁺ Transport in Other Prokaryotic Cells	169
5. Conclusions	170
6. Implications for Future Studies	172
Abbreviations	172
References	173

Chapter 10

HORMONAL REGULATION OF MAGNESIUM HOMEOSTASIS IN CULTURED MAMMALIAN CELLS 177

Robert D. Grubbs

1. Introduction	178
2. Hormonal Regulation of Mg ²⁺ Transport in Cultured Cells	178
3. Mechanisms of Hormonal Regulation of Mg ²⁺ Homeostasis	185
4. General Conclusions	189
Abbreviations	189
References	190

Chapter 11

FUNCTIONAL COMPARTMENTATION OF INTRACELLULAR MAGNESIUM 193

Theodor Günther

1. Introduction	194
2. Compartmentation of Intracellular Mg ²⁺ due to Cell Fractionation	194
3. Compartmentation of Intracellular Mg ²⁺ due to Electron Probe Microanalysis	197
4. Compartmentation of Mg ²⁺ in Cell Organelles	198
5. Intracellular Concentration and Compartmentation of Free Mg ²⁺	203
6. Compartmentation of Cellular Mg ²⁺ due to ²⁸ Mg ²⁺ Exchange	203
7. Compartmentation of Intracellular Mg ²⁺ due to Differential Mg ²⁺ Depletion	205
8. Metabolic Consequences of Mg ²⁺ Depletion	206
References	210

Chapter 12

MEMBRANE TRANSPORT OF MAGNESIUM 215

Theodor Günther and H. Ebel

1. Introduction 216
2. Experiments Indicating Net Mg^{2+} Transport 216
3. Mechanism of Net Mg^{2+} Efflux 217
4. Mechanism of Net Mg^{2+} Influx 223
- Abbreviations 224
- References 224

Chapter 13

INTESTINAL MAGNESIUM ABSORPTION 227

H. Ebel

1. Introduction 228
2. Balance Studies 228
3. Localization of Magnesium Absorption 232
4. Mechanism of Magnesium Uptake 233
5. Hormonal Regulation of Intestinal Magnesium Absorption 236
6. Magnesium Absorption in Disease 238
- References 244

Chapter 14

THE RENAL HANDLING OF MAGNESIUM 249

Michael P. Ryan

1. Introduction 250
2. Overview of the Role of the Kidneys in Magnesium Homeostasis 250
3. Renal Reabsorption of Magnesium 251
4. Renal Secretion of Magnesium: Does It Occur? 253
5. Physiological Factors Affecting the Renal Handling of Magnesium 253
6. Drugs Affecting Renal Magnesium Handling 257
7. Renal Disease and Magnesium Homeostasis 263
8. General Conclusions 264
- Abbreviations and Definitions 264
- References 264

Chapter 15

MAGNESIUM AND LIVER CIRRHOSIS 271

Leon Cohen

1. Relationship of Bone and Plasma Magnesium in Magnesium-Deficient Cirrhosis Patients 271
 2. Relationship of Cerebrospinal Fluid and Serum Magnesium in Liver Cirrhosis and Hepatic Coma 273
 3. Magnesium Status in Liver Cirrhosis 275
 4. Magnesium-Responsive Incomplete Distal Renal Tubular Acidosis in Patients with Liver Cirrhosis 277
 5. Functional Hypoparathyroidism in Hepatic Cirrhosis 278
 6. Conclusions 281
- References 281

Chapter 16

HYPOMAGNESEMIA AND HYPERMAGNESEMIA 285

Nachman Brautbar, Atul T. Roy, Philip Hom, and David B. N. Lee

1. Distribution of Magnesium 286
 2. Magnesium Requirements 286
 3. Hypomagnesemia and Magnesium Depletion 287
 4. Diagnosis 308
 5. Therapy of Magnesium Depletion and Hypomagnesemia 309
 6. Hypermagnesemia and Magnesium Toxicity 311
- Abbreviations 314
- References 315

Chapter 17

SYSTEMIC STRESS AND THE ROLE OF MAGNESIUM 321

H. G. Classen

1. Stress (Selye) and the General Adaptation Syndrome (GAS) 321
 2. Magnesium Depletion as a Stressor 324
 3. Aggravation by a Coexisting Mg Deficit of Harmful Stressor Effects and of Certain Stress Hormones 327
 4. Attenuation of Alarm Reactions by Optimal Mg Supply 332
 5. Summary and Outlook 334
- References 335

Chapter 18

MAGNESIUM AND LIPID METABOLISM 341

Yves Rayssiguier

1. Magnesium and Plasma Lipids in Animals 342
2. Magnesium and Lipoproteins 345
3. Mechanism 347
4. Cellular and Cardiovascular Implications 352
- Abbreviations 355
- References 355

Chapter 19

MAGNESIUM AND THE CARDIOVASCULAR SYSTEM: EXPERIMENTAL AND CLINICAL ASPECTS UPDATED 359

Burton M. Altura and Bella T. Altura

1. Introduction 360
2. Intracellular Mg^{2+} Levels in Various Cell Types 362
3. Association of Intracellular Mg^{2+} and K^+ 365
4. Myocardial Actions of Mg^{2+} 370
5. Peripheral Vascular Effects of Mg^{2+} 373
6. Effects of Mg^{2+} on Blood Vessels and Vascular Muscle 377
7. Mechanisms Whereby Mg^{2+} Controls and Stabilizes Vascular Tone and Reactivity 380
8. Experimental Evidence for Role of Mg^{2+} in Vascular Diseases 383
9. Myocardial Mg^{2+} Contents in Patients with Heart Disease 389
10. Clinical Myocardial Ischemic Syndromes and Drug-Induced Cardiac Arrhythmias: Association with Changes in Myocardial Mg^{2+} and/or Serum Mg^{2+} 393
11. Mg^{2+} and Hypertensive Vascular Disease in Human Subjects 395
12. Mg^{2+} : The Naturally Occurring Mimic Ca^{2+} Antagonist; Possible Relationship to Etiology and Treatment of Vascular Disease 397
13. Conclusions 398
- Abbreviations 401
- References 402

Chapter 20

MAGNESIUM AND THE PERIPHERAL (EXTRADURAL) NERVOUS SYSTEM:
METABOLISM, NEUROPHYSIOLOGICAL FUNCTIONS, AND CLINICAL
DISORDERS

417

Jerry G. Chutkow

1. Introduction	418
2. General Considerations	419
3. Mixed Peripheral Nerve	421
4. Somatic Neuromuscular Junction (NMJ)	425
5. Skeletal Muscle Sarcolemma	428
6. Peripheral Fusimotor System	429
7. Sensory Receptors	430
8. Peripheral Autonomic System	431
9. Clinical-Chemical-Electrophysiological Correlations in Animals and Humans	431
10. General Conclusions	433
Abbreviations	433
References	434

Chapter 21

MAGNESIUM AND THE CENTRAL (INTRADURAL) NERVOUS SYSTEM:
METABOLISM, NEUROPHYSIOLOGICAL FUNCTIONS, AND CLINICAL
DISORDERS

441

Jerry G. Chutkow

1. Introduction	442
2. General Considerations	442
3. Magnesium Metabolism in the Central Nervous System	444
4. Neurophysiological Effects of Magnesium on the CNS	449
5. Selected Biochemical Topics	453
6. General Conclusions	454
Abbreviations	454
References	455

Chapter 22

THE ROLE OF MAGNESIUM IN THE REGULATION OF MUSCLE FUNCTION

463

Christopher H. Fry and Sarah K. Hall

1. Measurement of Magnesium in Muscle Cells	464
2. Regulation of Intracellular Mg^{2+}	468
3. Role of Mg^{2+} in Muscle ATPase Reactions	470

CONTENTS	xv
4. Influence of Mg ²⁺ on Muscle Excitation and Conduction	472
5. Electrophysiological Effects of Mg ²⁺ and Its Influence on Ionic Currents	475
6. Effects of Magnesium on Activation of Contractile Events in Muscle	480
7. Summary	485
Abbreviations	486
References	486
 Chapter 23	
MAGNESIUM IN BONE AND TOOTH	489
Colin Robinson and John A. Weatherell	
1. Concentration and Distribution of Magnesium in Skeletal and Dental Tissues	489
2. Magnesium and the Formation of Bone and Tooth	495
3. Magnesium Deficiency in Bone and Tooth	498
4. Magnesium and Dental Caries	499
5. Relationship between Magnesium and Fluoride Concentrations in Tooth and Bone	500
References	501
 Chapter 24	
MAGNESIUM AND OSTEOPOROSIS	505
Leon Cohen	
1. Postmenopausal Osteoporosis	506
2. Senile Osteoporosis	507
3. Alcohol-Associated Osteoporosis	509
4. Osteoporosis Associated with β -Thalassemia	509
5. Interrelationship between Bone Mineral Crystal Size and Magnesium Concentration	509
6. Conclusions	511
References	512
 Chapter 25	
THE ROLE OF MAGNESIUM IN PREGNANCY, FOR THE NEWBORN, AND IN CHILDREN'S DISEASES	513
Ludwig Spätling	
1. Introduction	514
2. Magnesium in Pregnancy	514
3. Other Aspects	518

4. Magnesium in the Newborn	519
5. Magnesium in Children's Diseases	522
6. Conclusion	525
Abbreviations	526
References	526
 Chapter 26	
MAGNESIUM AND ITS ROLE IN ALLERGY	531
 Nicole Hunziker	
1. Introduction	532
2. Experimental Studies	532
3. Clinical Studies in Humans	536
4. Conclusion and Summary	541
Abbreviations	542
References	542
 Chapter 27	
MAGNESIUM AND ITS RELATIONSHIP TO ONCOLOGY	549
 Jean Durlach, Michel Bara, and Andrée Guiet-Bara	
1. Introduction	550
2. Interaction between Carcinogenesis and Magnesium Status	550
3. Cellular Interaction between Cancer and Magnesium Status	553
4. Systemic Mechanisms of the Relation between Mg and Cancer	559
5. New Personal Data	567
6. General Conclusions	571
References	573
 Chapter 28	
THE ASSESSMENT OF MAGNESIUM STATUS IN HUMANS	579
 Ronald J. Elin	
1. Introduction	579
2. Magnesium Metabolism	580
3. Assessment of Magnesium Status	584
References	593

Chapter 29

MAGNESIUM AND PLACEBO EFFECTS IN HUMAN MEDICINE 597

H. G. Classen

1. Introduction 597
2. Parenteral Magnesium Therapy 599
3. Oral Magnesium Therapy 603
- Abbreviations and Definitions 605
- References 606

Chapter 30

DETERMINATION OF MAGNESIUM IN BIOLOGICAL MATERIALS 611

Hans G. Seiler

1. General Aspects of the Analysis of Magnesium 612
2. Choice of Implements and Chemicals 612
3. Specimen Collection 613
4. Storage, Drying, and Homogenization 613
5. Sample Preparation 614
6. Determination Methods 617
- Abbreviations 623
- References 623
