<i>Preface</i>	ix
<b>1 Transfer Matrix</b>	1
1.1 A Scattering Experiment	2
1.2 Scattering Matrix and Transfer Matrix	3
1.3 Transmission and Reflection Amplitudes	10
1.4 Properties of the Transfer Matrix	12
1.5 Supplementary Notes	19
1.6 Problems	24
<b>2 Rectangular Potentials</b>	28
2.1 Transfer Matrix	29
2.2 Transmission Coefficient: $E > V_0$	32
2.3 Tunneling: $0 < E < V_0$	38
2.4 Current Density	42
2.5 Bound States: $V_0 < E < 0$	45
2.6 Inverse Problem for Rectangular Potential	47
2.7 Problems	49
<b>3 <math>\delta</math>-Function Potential</b>	56
3.1 Single $\delta$ -Function Potential	56
3.2 Two $\delta$ -Function Repulsive Potentials	60
3.3 Bound States of Double $\delta$ -Function Attractive Potentials	62
3.4 $N$ Identical $\delta$ -Function Barriers	64

3.5	Supplementary Notes	68
3.6	Problems	69
<b>4</b>	<b>Kronig-Penney Model</b>	<b>74</b>
4.1	The Periodic Model	75
4.2	Allowed Energy Bands	76
4.3	The Density of States	81
4.4	Wave Function	83
4.5	Single Impurity	84
4.6	$N$ $\delta$ -Function Barriers versus Infinite Kronig-Penney Model	87
4.7	Supplementary Notes	88
4.8	Problems	91
<b>5</b>	<b>Tight Binding Model</b>	<b>98</b>
5.1	Periodic Model	100
5.2	The Transfer Matrix	104
5.3	Transmission Coefficient	106
5.4	Single Impurity	107
5.5	Transmission through Impurities	108
5.6	Coupled Pendulum Analogy of the Tight Binding Model	111
5.7	Problems	114
<b>6</b>	<b>Tight Binding Models of Crystals</b>	<b>120</b>
6.1	Periodic One-Dimensional System with Two Different Atoms	120
6.2	Periodic Model with Different Distances between Neighboring Atoms	125
6.3	Periodic One-dimensional System with Two Different Atoms and Spatial Period $\ell = 4a$	126
6.4	Reduced Zone Scheme	129
6.5	Problems	130
<b>7</b>	<b>Disordered Models</b>	<b>137</b>
7.1	Random Tight Binding Model	138
7.2	Random Kronig-Penney Model	150
7.3	Supplementary Notes	159
7.4	Problems	168
<b>8</b>	<b>Numerical Solution of the Schrödinger Equation</b>	<b>173</b>
8.1	Numerical Procedure	173
8.2	Accuracy of Numerical Data	174
8.3	Numerical Data for Transmission	177
8.4	Problems	179

<b>9 Transmission and Reflection of Plane Electromagnetic Waves on an Interface</b>	181
9.1 Plane Wave at the Interface	181
9.2 Transmission and Reflection Coefficients	184
9.3 Interface between Two Dielectric Materials	189
9.4 Interface between a Dielectric Material and a Metal	190
9.5 Total Transmission	195
9.6 Total Reflection	198
9.7 Problems	200
<b>10 Transmission and Reflection Coefficients for a Slab</b>	205
10.1 Transmission and Reflection Amplitudes: TE and TM modes	206
10.2 Dielectric Slab Embedded in Vacuum	209
10.3 Transmission through a Metallic Slab	220
10.4 Problems	223
<b>11 Surface Waves</b>	225
11.1 Surface Waves at the Interface between Two Media	226
11.2 Surface Modes on a Slab	233
11.3 Experimental Observation of Surface Waves	237
11.4 Problems	241
<b>12 Resonant Tunneling through Double-Layer Structures</b>	243
12.1 Transmission through Two Dielectric Layers	243
12.2 Transmission through Two Metallic Layers	246
12.3 Problems	248
<b>13 Layered Electromagnetic Medium: Photonic Crystals</b>	249
13.1 Photonic Crystals: Infinite Periodic Layered Medium	250
13.2 Periodic Arrangement of Dielectric Layers	252
13.3 Band Structure of Photonic Crystals	254
13.4 Coupling to a Finite Photonic Crystal	258
13.5 Layered Dispersive Media	263
13.6 Kronig-Penney Model of a Photonic Crystal	269
13.7 Problems	271
<b>14 Effective Parameters</b>	275
14.1 Effective Parameters of a Layered Medium	276
14.2 Retrieval Procedure	279
14.3 Alternating Layers with Negative Permittivity and Negative Permeability	282
14.4 Problem	285

<b>15 Wave Propagation in Nonlinear Structures</b>	286
15.1 Single $\delta$ -Function Layer of a Nonlinear Dielectric	286
15.2 Nonlinear Kronig-Penney $\delta$ -Function Model	290
15.3 Problems	296
<b>16 Left-Handed Materials</b>	298
16.1 Electromagnetic Properties of Left-Handed Materials	299
16.2 Transmission through a Slab of Left-Handed Material	303
16.3 Structure of Left-Handed Materials	309
16.4 Problems	317
<b>Appendix A Matrix Operations</b>	321
A.1 The Determinant and the Trace of the Matrix	321
A.2 Inverse, Transpose, and Unitary Matrices	322
A.3 Eigenvalues and Eigenvectors	324
A.4 Similarity Transformations	324
A.5 Degeneracy	325
<b>Appendix B Summary of Electrodynamics Formulas</b>	327
B.1 Maxwell's Equations	327
B.2 Wave Equation	330
B.3 Group Velocity and Phase Velocity	331
B.4 Poynting Vector	333
B.5 Boundary Condition at an Interface	334
B.6 Permittivity and Permeability	335
B.7 Metals	337
<i>Bibliography</i>	341
<i>Index</i>	349
