Contents

1	Carbonyl-Lewis Acid Complexes	1
	<i>Takashi Ooi and Keiji Maruoka</i>	
1.1	Introduction	1
1.2	Theoretical Study of Carbonyl-Lewis Acid Complexes	3
1.3	NMR Study of Carbonyl-Lewis Acid Complexes	7
1.4	X-ray Crystallographic Study of Carbonyl-Lewis Acid Complexes	12
1.5	Carbonyl-Lewis Acid Chelation Complexes	15
1.5.1	With Transition Metal Elements	15
1.5.2	With Main-group Metal Elements	18
1.6	Carbonyl-Bidentate Lewis Acid Complexes	22
1.6.1	Basic Study	22
1.6.2	Synthetic Aspect	27
	References	30
2	Carbonyl Recognition	33
	<i>Susumu Saito and Hisashi Yamamoto</i>	
2.1	General Scope	33
2.2	Recognition of Carbonyl Substrate with Bulky Lewis Acid	37
2.2.1	Design, Preparation and Availability of Bulky Aluminum Reagent	37
2.2.2	Selective Coordination with Carbonyl Oxygen	38
2.3	Chemoselective Functionalization of Different Carbonyl Group	42
2.3.1	Aldehyde vs Ketone	43
2.3.2	Ketone vs Ketone	47
2.3.2.1	Saturated vs saturated	47
2.3.2.2	Saturated vs conjugated	49
2.3.3	Aldehyde vs Aldehyde	51
2.3.3.1	Saturated vs saturated	51
2.3.3.2	Saturated vs conjugated	53
2.3.3.3	Conjugated vs nonconjugated	55
2.3.4	Aldehyde vs Acetal	55
2.3.5	Aldehyde vs Aldimine	58
2.3.6	Ester vs Ester	61
2.4	Carbonyl Recognition in Asymmetric Synthesis	62
2.5	Closing Remarks	65
