

1	Introduction	7
2	Economy and Energy in Iran; an Overview	11
2.1	Macroeconomic Structure and Trends	11
2.2	Energy Sector	13
2.3	Energy Policies	17
2.3.1	Energy Subsidies	18
2.3.2	Oil Policy	20
2.3.3	Natural Gas Development	21
2.3.4	Electrification	21
2.3.5	Other Energy Policies	22
3	Historical Trends and Future Energy Consumption	23
3.1	Introduction	23
3.2	Methodology	24
3.3	BAU Scenario	26
3.3.1	Households	27
3.3.2	Manufacturing Industries	35
3.3.3	Power Generation Plants	39
3.3.4	Transportation	41
3.3.5	Other Sectors	45
3.3.6	Total Energy Demand	49
3.3.7	Environmental Impacts of the BAU Scenario	52
4	Alternative Scenarios	55
4.1	Scenario I: Efficiency	56
4.1.1	Households	56
4.1.2	Manufacturing Industries	59
4.1.3	Transportation	62
4.1.4	Other Sectors	63
4.1.5	Total Energy Savings in the Efficiency Scenario	66
4.2	Scenario II: Renewables	68
4.2.1	Wind Power	68
4.2.2	Biomass	69
4.2.3	Geothermal	69
4.2.4	Solar Irradiance	70
4.2.5	Hydropower	71
4.2.6	Economic and Infrastructural Analysis	72
4.2.7	Final Energy Demand in the "Renewables" Scenario	75

4.3	Scenario III: The Combined Scenario	76
4.4	A Comparison among Scenarios	77
4.5	Energy Intensity	79
4.6	Economic and Ecological Impacts of Scenarios	80
4.6.1	Economic Impacts	80
4.6.2	Ecological Impacts	82
4.7	Conclusion	84
5	Renewable Energy Sources	87
5.1	Introduction	87
5.2	Support Instruments for Renewable Energies	88
5.2.1	Why is government support needed?	88
5.2.2	Feed-In Tariff Systems	90
5.2.3	Quota System and Tradable Green Certificates	91
5.2.4	Comparison of FIT and Quota Systems	92
5.3	International Experiences in Renewable Energy Policies	93
5.3.1	India	96
5.3.2	Algeria	99
5.3.3	Lessons Learned from the Experiences in India and Algeria	101
5.3.4	Germany	102
5.4	Renewable Energies in Iran	110
5.4.1	Development Objectives for Renewable Energies	111
5.4.2	Renewable Energy Potentials	111
5.4.3	Renewable Energy Organizations	114
5.4.4	The Renewable Energy Development Act	116
5.4.5	Power Generation Plant Applications	116
5.4.6	SWOT Analysis of the Renewable Energy Organization in Iran	117
5.4.7	Renewable Energy Challenges in Iran	119
5.4.8	Improving the Feed-in Tariff System	121
6	Policies to Promote Energy Efficiency	125
6.1	Introduction	125
6.2	Energy Efficiency Challenges	125
6.2.1	Widespread Deployment of Efficient Technology	125
6.2.2	Energy Subsidies	128
6.2.3	Rebound Effects	128
6.2.4	Consumer Behavior	130

6.3	Energy Efficiency Policies; an Overview	131
6.3.1	A Hybrid Efficiency Policy	131
6.3.2	Policy Approaches to Increase Energy Efficiency	132
6.4	Energy Efficiency Policies Concerning Buildings using the Example of Germany	139
6.4.1	Background Information about Energy Efficiency in Buildings	139
6.4.2	The Economics of Highly Efficient Buildings	141
6.4.3	Policies and Measures to Improve Energy Efficiency in Buildings	142
6.5	Energy Efficiency in Iran	148
6.5.1	Background	148
6.5.2	Energy Efficiency Policies in Iran	150
6.6	Conclusion	161
7	Combined Heat and Power (CHP)	163
7.1	Introduction	163
7.2	Cogeneration in Germany	165
7.2.1	Development of Cogeneration	165
7.2.2	Policy Instruments Targeting Cogeneration	166
7.3	Cogeneration in Iran	168
7.3.1	Development of Cogeneration and Policy Instruments	168
7.3.2	A Brief Feasibility Study	170
8	Energy Price Reform and Efficiency	171
8.1	Introduction	171
8.2	Energy Subsidies: Objectives and Challenges	171
8.3	The Energy Price Reform in Iran	174
8.3.1	Removal of Energy Subsidies	174
8.3.2	The Effects of the Energy Price Reform	175
8.4	Conclusion	181
	Appendix	183
	A. Work Flow for the Energy Scenario Analysis	184
	B: Feed-in Tariff Laws in Iran	186
