

Contents

1	The Nature of Patterns and Inductive Reasoning	2
1.1	Problem Solving	4
1.2	Magic Squares	11
1.3	Inductive Reasoning	20
1.4	Mathematical Patterns	26
* 1.5	A Golden Pattern	36
	Chapter 1 Outline	42
	Chapter 1 Test	43
2	The Nature of Sets and Deductive Reasoning	46
2.1	Sets	48
2.2	Combined Operations with Sets	54
2.3	Deductive Reasoning	62
2.4	The Conditional	71
2.5	Additional Connectives	80
2.6	The Nature of Proof in Problem Solving	86
* 2.7	Logic Circuits	95
	Chapter 2 Outline	99
	Chapter 2 Test	100
3	The Nature of Calculators and Computers	102
3.1	History of Computing Devices	104
3.2	Pocket Calculators	113
3.3	Introduction to Computers	120
3.4	BASIC Programming	130

*Optional sections.

3.5	Communicating with a Computer	142
* 3.6	Programming Repetitive Processes	151
	Chapter 3 Outline	160
	Chapter 3 Test	162

4 The Nature of Numbers 164

4.1	Early Numeration Systems	166
4.2	Hindu-Arabic Numeration System	174
4.3	Large and Small Numbers	179
4.4	Natural Numbers	188
4.5	Integers	198
4.6	Rational Numbers	212
* 4.7	Irrational Numbers	220
4.8	Real Numbers	230
	Chapter 4 Outline	237
	Chapter 4 Test	239

5 The Nature of Daily Arithmetic 242

5.1	Interest	244
5.2	Installment Buying	253
5.3	Buying an Automobile	260
5.4	Buying a Home	266
* 5.5	Buying Insurance	274
	Chapter 5 Outline	280
	Chapter 5 Test	281

6 The Nature of Algebra 284

6.1	Mathematical Systems	286
6.2	Linear Equations	293
6.3	Prime Numbers	299
6.4	Prime Factorization	307
6.5	Applications of Prime Factorization	313
6.6	Ratio, Proportion, and Problem Solving	321
* 6.7	A Finite Algebra	329
	Chapter 6 Outline	345
	Chapter 6 Test	346

*Optional sections.

7	The Nature of Geometry	348
7.1	Geometry	350
7.2	Measuring Length and Area	356
7.3	Angles	371
7.4	The Metric System—Volume, Mass, and Temperature	375
7.5	Coordinate Geometry	389
7.6	Königsberg Bridge Problem	397
* 7.7	Euclid Does Not Stand Alone	404
	Chapter 7 Outline	416
	Chapter 7 Test	419
8	The Nature of Counting	422
8.1	Counting Problems	424
8.2	Permutations	431
8.3	Combinations	437
8.4	Counting without Counting	443
* 8.5	Rubik's Cube and Instant Insanity	451
	Chapter 8 Outline	458
	Chapter 8 Test	458
9	The Nature of Probability	460
* 9.1	Some Experiments in Probability	462
9.2	Definition of Probability	471
9.3	Conditional Probability	480
9.4	Mathematical Expectation	485
* 9.5	Probability Models	496
	Chapter 9 Outline	506
	Chapter 9 Test	506
10	The Nature of Statistics	508
10.1	Frequency Distributions	510
10.2	Descriptive Statistics	520
10.3	The Normal Curve	530

*Optional sections.

*10.4	Sampling	535
	Chapter 10 Outline	538
	Chapter 10 Test	539
11	The Nature of Mathematical Modeling	542
11.1	Introduction to Matrices	544
11.2	Matrix Multiplication	551
11.3	Systems of Equations	558
11.4	Identity and Inverse Properties for Matrices	564
*11.5	Game Theory	570
	Chapter 11 Outline	580
	Chapter 11 Test	581
	Answers to the Odd-Numbered Problems	583
	Credits	615
	Subject Index	619
	Index of Special Problems	631
	Index of Mathematical Projects	633

*Optional sections.
